How to Disappear Frank Ahearn,Eileen Horan,2019-10 For the first time in paperback we bring you the authoritative and comprehensive guide for people who seek to protect their privacy as well as for anyone who's ever entertained the fantasy of disappearing--whether actually dropping out of sight or by eliminating the traceable evidence of their existence. Written by the world's leading experts on finding people and helping people avoid being found, How to Disappear covers everything from tools for disappearing to discovering and eliminating the nearly invisible tracks and clues we tend to leave wherever we go. Learn the three keys to disappearing, all about your electronic footprints, the dangers and opportunities of social networking sites, and how to disappear from a stalker. Frank Ahearn and Eileen Horan provide field-tested methods for maintaining privacy, as well as tactics and strategies for protecting personal information and preventing identity theft. They explain and illustrate key tactics such as misinformation (destroying all the data known about you); disinformation (creating fake trails); and, finally, reformation--the act of getting you from point A to point B without leaving clues. Ahearn illustrates every step with real-life stories of his fascinating career, from undercover work to nab thieving department store employees to a stint as a private investigator; and, later, as a career skip tracer who finds people who don't want to be found. In 1997, when news broke of President Bill Clinton's dalliance with a White House intern, Ahearn was hired to find her. When Oscar statuettes were stolen in Beverly Hills, Ahearn pinpointed a principal in the caper to help solve the case. When Russell Crowe threw a telephone at a hotel clerk in 2005, Ahearn located the victim and hid him from the media. An indispensable resource not just for those determined to become utterly anonymous, but also for just about anyone in the brave new world of on-line information, How to Disappear sums up Ahearn's dual philosophy: Don't break the law, but know how to protect yourself.

What if she could sprint like a deer, or roar like a bear? Mimicking the footprints of each creature in the snow, she makes her way home to the arms of her moms. Together, the three of them imagine beautiful and powerful creatures who always have courage - just like Thuy.

Sharenthood Leah A. Plunkett,2020-12-08 From baby pictures in the cloud to a high school's digital surveillance system: how adults unwittingly compromise children's privacy online. Our children's first digital footprints are made before they can walk—even before they are born—as parents use fertility apps to aid conception, post ultrasound images, and share their baby's hospital mug shot. Then, in rapid succession come terabytes of baby pictures stored in the cloud, digital baby monitors with built-in artificial intelligence, and real-time updates from daycare. When school starts, there are cafeteria cards that catalog food purchases, bus passes that track when kids are on and off the bus, electronic health records in the nurse's office, and a school surveillance system that has eyes everywhere. Unwittingly, parents, teachers, and other trusted adults are compiling digital dossiers for children that could be available to everyone—friends, employers, law enforcement—forever. In this incisive book, Leah Plunkett examines the implications of “sharenthood”—adults' excessive digital sharing of children's data. She outlines the mistakes adults make with kids' private information, the risks that result, and the legal system that enables “sharenting.” Plunkett describes various modes of sharenting—including “commercial sharenting,” efforts by parents to use their families' private experiences to make money—and unpacks the faulty assumptions made by our legal system about children, parents, and privacy. She proposes a “thought compass” to guide adults in their decision making about children's digital data: play, forget, connect, and respect. Enshrining every false step and bad choice, Plunkett argues, can rob children of their chance to explore and learn lessons. The Internet needs to forget. We need to remember.

The Technology Tail Julia Cook,2019-03-29 A cute, creative story about children and their texts, tweets, posts and pics. Don't be mean and irresponsible! Whether tapping out messages on their computers, tablets or phones, Screen wants kids to know their words – the kind and the cruel – will follow them for life, creating a digital trail that can't be erased.
