**In Our Words** Markus Reuber MD, PhD, FRCP,Gregg Rawlings,Steven C Schachter,2018-05-28 Psychogenic Non-Epileptic Seizures (PNES) can cause blackouts, collapses, involuntary movements, loss of memory and have major impact on quality of life. Whereas epilepsy is caused by abnormal electrical activity in the brain, PNES are psychological-based responses to triggers inside or outside the body that are perceived as threatening by the person affected. PNES are poorly understood by the medical community. It is common for doctors to struggle to explain this diagnosis, which can leave their patients frustrated and confused. Often people are told that their PNES are caused by stress and sent away with no further support or advice. It is no wonder that those affected feel isolated, abandoned and hopeless about living with the condition. In Our Words: Personal Accounts of Living with Non-Epileptic Seizures shows those diagnosed with PNES that they are not alone, and how others have courageously managed to come to terms with their seizures. These heartfelt personal accounts will also allow family, friends, healthcare providers and researchers to gain more understanding of the condition and work to provide a better quality of life to those living with PNES.

Real-life scripts, screenwriting terms, and timely topics, make this an interesting read for teen girls as they delve into their own inner struggles and outward relationships. They'll also learn the importance of scripting their own responses BEFORE challenging life-situations arise so they are able to think about, pray about, and consider how to face these situations before the scene begins. By contrasting real-life with TV or movies, teens will understand they don't have to get caught up in the drama.

**Baby Steps** John Rollo,2016-05-13 When retiree John Rollo woke up from spinal surgery on June 21, 2013, he'd had calcium build-up removed and titanium rods inserted to stabilize his 6 foot 5 inch frame. The following morning he had a heart attack. On June 22, he was transferred to Toronto General Hospital for triple bypass surgery. Only then did the true nightmare begin. Intubated and in a drug-induced coma, blood being chemically controlled to support the vital organs, his feet were deprived of blood and they died. The family was told he'd have to undergo amputation. On July 22, he was transferred back to Toronto Western Hospital for treatment and rehab of his spinal surgery. By October, he was a bilateral below-the-knee amputee. Baby Steps tells the story of a man who beat all the medical odds to live and walk again. It's full of optimism, warmth, great love, and humour. It's also an honest exposé of a rehabilitation system that manages patients, attempting to care for people, in an environment with virtually no mental health support in the form of clinical psychologists to assist people to cope with such life-altering circumstances. Rollo's passionate belief is that this deficit needs to be addressed in order for patients to survive, without succumbing to depression and instead able to move forward with optimism and hope. He offers many valuable tips and strategies for coping with the physical and emotional challenges of life as an amputee, and reminds us that love, faith and hope are key ingredients for surviving and thriving....
