**Everyone Loves Live Music** Fabian Holt, 2021-01-27 For decades, millions of music fans have gathered every summer in parks and fields to hear their favorite bands at festivals such as Lollapalooza, Coachella, and Glastonbury. How did these and countless other festivals across the globe evolve into glamorous pop culture events, and how are they changing our relationship to music, leisure, and public culture? In *Everyone Loves Live Music*, Fabian Holt looks beyond the marketing hype to show how festivals and other institutions of musical performance have evolved in recent

decades, as sites that were once meaningful sources of community and culture are increasingly subsumed by corporate giants. Examining a diverse range of cases across Europe and the United States, Holt upends commonly-held ideas of live music and introduces a pioneering theory of performance institutions. He explores the fascinating history of the club and the festival in San Francisco and New York, as well as a number of European cities. This book also explores the social forces shaping live music as small, independent venues become corporatized and as festivals transform to promote mainstream Anglophone culture and its consumerist trappings. The book further provides insight into the broader relationship between culture and community in the twenty-first century. An engaging read for fans, industry professionals, and scholars alike, *Everyone Loves Live Music* reveals how our contemporary enthusiasm for live music is more fraught than we would like to think.

**Eastern European Popular Music in a Transnational Context** Ewa Mazierska, Zolt Győri, 2019-07-15 This volume examines the transnational character of popular music since the Cold War era to the present. Bringing together the cross-disciplinary research of native scholars, *Eastern European Popular Music in a Transnational Context* expands our understanding of the movement of physical music, musicians and genres through the Iron Curtain and within the region of Eastern Europe. With case studies ranging from Goran Bregović, Czesław Niemen, the reception of Leonard Cohen in Poland, the Estonian punk scene to the Intervision Song Contest, the book discusses how the production and reception of popular music in the region has always been heavily influenced by international trends and how varied strategies allowed performers and fans to acquire cosmopolitan identities. Cross-disciplinary in nature, the investigations are informed by political, social and cultural history, reception studies, sociology and marketing and are largely based on archival research and

interviews.

VERDICT - The Nero Award winning Knopf's sequel to the must-read *Dead Anyway* is a storytelling gem of a caper. The author is particularly talented at filling in a complicated backstory, balancing light humor with violence and maintaining a blistering pace. - Library Journal, Starred Review One of the best mysteries to read - 4.7 Stars! Just look at the reviews . . . A high-spirited romp with more exotic locations than the last three James Bond films. -Kirkus As a thriller, *Cries of the Lost* is hugely enjoyable. The prose is a joy to read with hardly a word surplus to requirements as we hurtle through to another moment of calm reflection at the end. From my point of view, the next in the series can't come quickly enough. --David Marshall, *Thinking About Books* *Cries of the Lost* is an engrossing novel that will challenge your cognition as you attempt to solve and unravel the plot. The Guggenheim Mystery Robin Stevens, Siobhan Dowd, 2018-07-30 My name is Ted Spark. I am 12 years and 281 days old. I have seven friends. Three months ago, I solved the mystery of how my cousin Salim disappeared from a pod on the London Eye. This is the story of my second mystery. This summer, I went on holiday to New York, to visit Aunt Gloria and Salim. While I was there, a painting was stolen from the Guggenheim Museum, where Aunt Gloria works. Everyone was very worried and upset. I did not see what the problem was. I do not see the point of paintings, even if they are worth 9.8 million pounds. Perhaps that's because of my very unusual brain, which works on a different operating system to everyone else's.

**PI3K-mTOR in Cancer and Cancer Therapy** Nandini Dey, Pradip De, Brian Leyland-Jones, 2016-06-10 In the post human-genome project era, cancer specific genomic maps are redesigning tumor taxonomy by evolving from histopathology to molecular pathology. The success of a cancer drug today is fundamentally based on the success in identifying target genes that control beneficial pathways. The overwhelming power of genomics and proteomics has enlightened researchers about the fact that the PI3K-mTOR pathway is the most commonly up-regulated signal transduction pathway in various cancers, either by virtue of its activation downstream of many cell surface growth factor receptors or by virtue of its collateral and compensatory circuitry with RAS-MAPK pathway. Oncogenic signaling in the majority of solid tumors is sustained via the PI3K-AKT-mTOR pathway. Because of its prominent role in many cancer types, the PI3K-mTOR pathway has become a major therapeutic target. The volume includes two complementary parts which address the problem of etiology and disease progression and is intended to portray the very basic mechanisms of the PI3K-AKT-mTOR signaling pathway's involvement in various facets of the cancer, including stem cell renewal, cell metabolism, angiogenesis, genetic instability, and drug resistance. Significant progress has been made in recent years elucidating the molecular mechanism of cancer cell proliferation, angiogenesis, and drug-resistance in relation to the PI3K-mTOR pathway and this volume provides an in-depth overview of recent developments made in this area.

Weekend Societies Graham St John, 2017-01-12 From massive raves sprouting around the London orbital at the turn of the 1990s to events operated under the control of corporate empires, EDM (Electronic Dance Music) festivals have developed into cross-genre, multi-city, transnational mega-events. From free party teknivals proliferating across Europe since the mid-1990s to colossal corporate attractions like Tomorrowland Electric Daisy Carnival and Stereosonic, and from transformational and participatory events like Burning Man and events in the UK outdoor psytrance circuit, to such digital arts and new media showcases as Barcelona's Sónar Festival and Montreal's MUTEK, dance festivals are platforms for a variety of arts, lifestyles, industries and policies. Growing ubiquitous in contemporary social life, and providing participants with independent sources of belonging, these festivals and their event-cultures are diverse in organization, intent and outcome. From ethically-charged and “boutique” events with commitments to local regions to subsidiaries of entertainment conglomerates touring multiple nations, EDM festivals are expressions of “freedoms”

revolutionary and recreational. Centres of “EDM pop”, critical vectors in tourism industries, fields of racial distinction, or experiments in harm reduction, gifting culture, and co-created art, as this volume demonstrates, diversity is evident across management styles, performance legacies and modes of participation. *Weekend Societies* is a timely interdisciplinary volume from the emergent field of EDM festival and event-culture studies. Echoing an industry trend in world dance music culture from raves and clubs towards festivals, *Weekend Societies* features contributions from scholars of EDM festivals showcasing a diversity of methodological approaches, theoretical perspectives and representational styles. Organised in four sections: Dance Empires; Underground Networks; Urban Experiments; Global Flows, *Weekend Societies* illustrates how a complex array of regional, economic, social, cultural and political factors combine to determine the fate of EDM festivals that transpire at the intersections of the local and global.

**Music and the Broadcast Experience** Christina Baade, James A. Deaville, 2016-08-02 *Music and the Broadcast Experience* explores the complex ways in which music and broadcasting have developed together throughout the twentieth and into the twenty-first centuries. It brings into dialogue researchers working in media and music studies; explores and develops crucial points of

contact between studies of music in radio and music in television; and investigates the limits, persistence, and extensions of music broadcasting in the Internet era. The book presents a series of case studies that address key moments and concerns in music broadcasting, past and present, written by leading scholars in the field, who hail from both media and music studies. Unified by attentiveness both to musical sound and meaning and to broadcasting structures, practices, audiences, and discourses, the chapters in this collection address the following topics: the role of live orchestral concerts and opera in the early development of radio and their relation to ideologies of musical uplift; the relation between production culture, music, and television genre; the function of music in sponsored radio during the 1930s; the fortunes of musical celebrity and artistic ambition on television; questions of music format and political economy in the development of online radio; and the negotiation of space, community, and participation among audiences, online and offline, in the early twenty-first century. The collection's ultimate aim is to explore the usefulness and limitations of broadcasting as a concept for understanding music and its cultural role, both historically and today.
