Data Structures Using C++ D. S. Malik, 2010 The latest book from Cengage Learning on Data Structures Using C++, International Edition

Smalltalk by Example Alec Sharp, 1997 As Smalltalk is embraced by a growing number of corporate information systems departments, career prospects for programmers with Smalltalk development skills have never been better. This practical guide takes programmers beyond the basics, teaching them how to develop enterprise-class applications that provide real world solutions.

Mastering Unit Testing Using Mockito and JUnit Sujoy Acharya, 2014-07-15 A practical and easy-to-follow, yet comprehensive, guide to learning advanced JUnit testing. Each topic is explained and placed in context, and for the more inquisitive, there are more details of the concepts used. This book is for you if you are a developer with some experience in Java application development as well as a basic knowledge of JUnit testing. But for those whose skill set is void of any prior experience with JUnit testing, the book also covers basic fundamentals to get you acquainted with the concepts before putting them into practise.

Income And Wealth From Self-Directed Investing Ian Duncan MacDonald, 2019-09-17 In 2001, after an investment adviser lost \$300,000 of Ian MacDonald's money, he took what was left and self-managed it. His investment objective was to build a stock scoring program that would give him an annual dividend income worth 6% of his portfolio, while increasing the value of that portfolio every year by about 9% (his background was in building commercial risk scoring computer programs for the banks and other businesses). He succeeded in his objective. While he had developed that stock scoring program for his own use, in 2019 he used it to help an elderly lady who had suffered a catastrophic financial loss, due to an investment adviser's greed. After much of her loss had been recovered and her monthly income had doubled, she told Ian MacDonald that he needed to write a book to help people like her who knew little about investing and could easily be taken advantage of. He wrote that book. It is called, *Income and Wealth from Self-Directed Investing*. He includes that PC stock scoring program with his 300 page book. To further help investors, in the last 100 pages of the book, are charts listing all the companies traded on the TSX that pay a dividend of 3.5% or more. Four sorts of the data in these charts is provided: by score, stock price, dividend percent and by company name. The data sorts make it easy and fast to identify and weigh which stocks are the best ones to add to your portfolio. Like the elderly widow, there are many who fear that they will outlive their life savings? They feel forced to use investment advisers because no one has shown them how to invest safely. Ian MacDonald's book takes away the fear of investing by explaining, the following in easy to understand language: (1) The danger of entrusting your money to an investment adviser whose fees and hidden agenda could drain your savings. (2) Why investing in dividend paying common stock is the safest way for you to invest, as compared to bonds, mutual funds, etc. (3) How to open an online self-directed stock trading account without having to involve bank employees. (4) How to easily find for your portfolio the best twenty stocks for capital gain and the highest dividends. (5) How to find and sort potential stock purchases from best to worse, so you can pick the twenty best and safest. (6) How to verify that stocks have no harmful information attached to them that could potentially be a problem if purchased. (7) How to purchase a stock you have carefully chosen, in less than five minutes. (8) How to quickly and easily monitor your purchased stocks on a daily, monthly and quarterly basis. The stock market is not a casino and what Ian MacDonald teaches is not a get rich quick scheme. It is a logical, easy to understand method of investing. Since implementing his scoring system, his portfolio has grown by 300% while generating a steady ever growing retirement income. He thinks every investor should now know exactly what they are invested in and understand why they are invested in it. Through booming times and recessions there is no reason your self-directed portfolio can not generate a reliable monthly income and grow year-after-year.

AngularJS Brad Green, Shyam Seshadri, 2013-04-08 Develop smaller, lighter web apps that are simple to create and easy to test, extend, and maintain as they grow. This hands-on guide introduces you to AngularJS, the open source JavaScript framework that uses Model-view-controller (MVC) architecture, data binding, client-side templates, and dependency injection to create a much-needed structure for building web apps. Guided by two engineers who worked on AngularJS at Google, you'll walk through the framework's key features, and then build a working AngularJS app—from layout to testing, compiling, and debugging. If you have JavaScript experience, you'll learn how AngularJS helps reduce the complexity of your web app. Dive deep into Angular's building blocks and learn how they work together. Gain maximum flexibility by separating logic, data, and presentation responsibilities with MVC. Assemble your full app in the browser, using client-side templates. Use AngularJS directives to extend HTML with declarative syntax. Communicate with the server and implement simple caching with the \$http service. Use dependency injection to improve refactoring, testability, and multiple environment design. Get code samples for common problems you face in most web apps.

Angular: Up and Running Shyam Seshadri, 2018-05-31 This book will demystify Angular as a framework, as well as provide clear instructions and examples on how to get started with writing scalable Angular applications. *Angular: Up & Running* covers most of the major pieces of Angular, but in a structured manner that is generally used in hands-on training. Each chapter takes one concept, and use examples to cover how it works. Problems to work on (with solutions) at the end of each chapter reinforce the learnings of each chapter and allow readers to really get hands-on with Angular.

Plant Systematics Gurcharan Singh, 2019-06-07 This fourth edition of *Plant Systematics* is completely revised and updated. It incorporates the updated International Code of Nomenclature for Algae, Fungi and Plants (Shenzhen Code, 2018), the new version of PhyloCode (Beta version of PhyloCode 5, 2014), APweb version 14 (September, 2018), revised Angiosperm Phylogeny Group classification (APG IV, 2016), new Pteridophyte Phylogeny Group Classification (PPG I, 2016), besides the updates since the publication of third edition. The book is a blend of classical fundamental aspects and recent developments, especially in the field of molecular systematics, cladistics and computer identification. Special attention has been given to information on botanical nomenclature, identification, molecular systematics and phylogeny of angiosperms. The complicated concepts of phylogeny, taxometrics and cladistics have been explained with a view to providing a comparison between these diverse but interactive fields of study. An attempt has been made to build upon a common example when exploring different methods, especially in procedures of identification, taxometrics and cladistics. The major systems of

classification are evaluated critically. Discussion on major families of Pteridophytes, Gymnosperms and Angiosperms, especially those of major phylogenetic interest, form a major portion of this edition. The ebook includes nearly 500 color photographs set out in 36 pages covering plants from different parts of the world. In addition, 305 black & white illustrations have been included to provide a better understanding of the plants covered in the book.

Japanese Candlestick Charting Techniques Steve Nison, 2001-11-01 The ultimate guide to a critical tool for mastering the financial markets A longstanding form of technical analysis, Japanese candlestick charts are a dynamic and increasingly popular technical tool for traders of all skill levels. Known for its versatility, this ancient charting can be fused with every other technical tool available, including traditional Western technical analysis. Japanese Candlestick Charting Techniques is the most comprehensive and trusted guide to this essential technique. Informed by years of research from a pioneer trader, this book covers everything you need to know, including hundreds of examples that show how candlestick techniques can be used in all of today's markets. This totally updated revision focuses on the needs of today's traders and investors with:

- All new charts including more intra-day markets
- New candlestick charting techniques
- More focus on active trading for swing, online and day traders
- New Western techniques in combination with candles
- A greater spotlight on capital preservation.

From speculation and hedging to futures and equities, candlestick charting is the next level up for both amateur day traders and seasoned technicians, and this book provides expert guidance for putting it into action.

The Eastern Oyster Victor S. Kennedy, Roger I. E. Newell, Albert F. Eble, 1996 In 1966 Congress passed the National Sea Grant College Program Act to promote marine research, education, and extension services in institutions along the nation's ocean and Great Lakes coasts. In Maryland a Sea Grant Program -- a partnership among federal and state governments, universities, and industries -- began in 1977, and in 1982 the University of Maryland was named the nation's seventeenth Sea Grant College. The Maryland Sea Grant College focuses its efforts on the Chesapeake Bay, with emphasis on the marine concerns of fisheries, seafood technology, and environmental quality. The first comprehensive review of the biology of the eastern oyster in more than thirty years. The twenty-one chapters synthesize every aspect of oyster biology -- for instance, general anatomy, physiology, the circulatory system, reproduction, genetics, diseases -- and issues related to management and aquaculture.

Wood preservation with chemicals Esa Salminen, Risto Valo, Maarit Korhonen, Rikard Jernlås, 2014-09-01 The Nordic Council of Ministers, the BAT Group under the Working Group for Sustainable Consumption and Production, has requested the consultant to prepare a report on Best Available Techniques (BAT) in wood preservation with chemicals in the Nordic countries. The Nordic wood preserving industry produces around 2.1 million m³ of impregnated wood per year, which is about one third of the total supply of pressure-treated wood in Europe. This report describes the present status of the used technologies, their emissions and impacts on the environment and technologies that can be considered BAT. The report will also be used as an input from the Nordic countries to the EU process under the Industrial Emissions Directive (IED) for preparation of the BAT Reference Document for preservation of wood and wood products with chemicals (WPC BREF) which is foreseen to start in 2014.

Plant Systematics G Singh, 2016-04-19 The focus of the present edition has been to further consolidate the information on the principles of plant systematic, include detailed discussion on all major systems of classification, and significantly, also include discussion on the selected families of vascular plants, without sacrificing the discussion on basic principles. The families included for discussion are largely those which have wide representation, as also those that are less known but significant in evaluating the phylogeny of angiosperms. The discussion of the families also has a considerable focus on their phylogenetic relationships, as evidenced by recent cladistic studies, with liberal citation of molecular data. Several additional families have been included for detailed discussion in the present volume.

The Oosterschelde Estuary (The Netherlands): a Case-Study of a Changing Ecosystem P.H. Nienhuis, A.C. Smaal, 2012-10-23 The Oosterschelde estuary is one of the estuaries in the Netherlands which remained after the Delta scheme was completed in 1986. In the seventies the Oosterschelde became a national symbol of the change in political thinking and decision making about the values of our natural environment. As a result of political decision a storm surge barrier was built in the mouth of the estuary, as a compromise between safety for the human population and nature conservation. Owing to the broad interest in the meaning of the Oosterschelde estuary for Dutch and international societies, it became one of the most intensively studied coastal ecosystems in Western Europe. In an interdisciplinary approach of several state agencies and universities, a broad spectrum of physical, chemical and biological research has been carried out during the period of 1980--1989, dedicated to the structure and functioning of the saline ecosystem. The undisturbed estuary was studied during the period between 1980--1984. Large mathematical models had been constructed before 1986, to simulate future changes in the ecosystem. Further studies after the completion of the storm surge barrier (1986--1989) have been used for verification of the model. The integrated and summarized knowledge of the Oosterschelde ecosystem is used by water managers and nature and fisheries conservationists. A case study for professional civil engineers, ecologists, marine biologists, water managers, decision makers, university students and anyone interested in physical, chemical and biological estuarine and coastal sciences.

Full View Integrated Technical Analysis Xin Xie,2011-01-25 A fresh approach to technical analysis utilizing a full view (multi-time frame) integrated analytical system. Has the bear market ended? Is the rebound lasting? Everybody wants an answer but nobody can provide one with a good degree of confidence. While fundamental analysis is notoriously weak when it comes to market timing decisions and price target forecasts, technical analysis is equally timid in providing any concrete answers to the above fundamentally important questions for market participants. No existing system has produced a firm answer with a respectable degree of conviction. This book will present a system to answer those questions with a high degree of confidence. Xin Xie is the Director for Institute of International Trade and Investment at the Upper Yangtze River Economic Research Center, Chongqing University of Business and Technology and PRC Ministry of Education. He has a PhD in Economics from Columbia University in New York and a Master of Arts Degree in Statistics at Zhongnan University of Finance in China. He has extensive experiences in banking and investment industries as Senior Economists and Strategists in Bank of America and UBS AG.
