Why Are Student Athletes Funding Your Future? Dr. Ernest E. Cutler, Jr., 2016-01-05 Scholarship shortfalls persist, leaving NCAA scholarship student-athletes to pay hundreds and sometimes thousands of dollars for additional educational expenses not covered by their current athletic scholarships. Meanwhile, NCAA campuses continue to generate money from the sale of apparel and other merchandise featuring star athletes. In this detailed study, Ernest Cutler explores the troubling history of

money changing hands, with none of it going to student athletes who are for some reason considered amateurs that should not be eligible for payment. He also takes a careful look about what such a system says about academic values and educational institutions, as well as how the system contributes to infractions by student-athletes, coaches, and athletic administrators. This research study is not intended to disrespect the NCAA, but it does seek to serve as a tool to change problematic policies that infringe upon the rights of current, former, and future student athletes.

Consumer Perception of Food Attributes Shigeru Matsumoto, Tsunehiro Otsuki, 2018-06-19 Food credence attributes are food features that are difficult to verify even after consumption. Consumers, today, are concerned about many food credence attributes, including animal rights, contamination risk, fair trade practice, genetic modification, geographical origin, and organic farming. For the past several decades, many scholars have analyzed the value consumers place on credence attributes and have reported that consumers will pay a premium for foods with these desirable properties. In addition, their studies reveal that individual consumers place greater importance on some credence attributes than others. For example, some are seriously concerned about animal welfare, while others are solely concerned about food safety. One of the objectives of this book is to summarize recent empirical findings from scholarly works on how consumers value food credence attributes. Such knowledge would benefit producers, processors, retailers, and policy makers. Another objective of this book is to discuss the effectiveness of the programs that have been introduced to strengthen the relationship between producers and consumers. Many programs have been developed to more effectively inform consumers regarding food production processes.
