Multicultural Approaches to Health and Wellness in America Regan A. R. Gurung, 2014-04-21 Led by a UCLA-trained health psychologist, a team of experts describes non-traditional treatments that are quickly becoming more common in Western society, documenting cultural variations in health and sickness practices to underscore the diversity among human society. This unique two-volume set describes the variety of cultural approaches to health practiced by people of varying cultural heritages and places them in stark context with traditional Western approaches to health care and medicine. Examining health practices such as Ayurveda, an ancient system of medicine that focuses on the body, the sense organs, the mind, and the soul; and traditional Chinese medicine (TCM), the author examines why these different approaches can explain some of the cultural variations in health behaviors, differences in why people get sick, and how they cope with illness. Traditional health care providers of all kinds—including clinicians, counselors, doctors, nurses, and social workers—will all greatly benefit by learning about vastly different approaches to health, while general readers and scholars alike will gain insight into the rich diversity of world culture and find the material fascinating.

The Political Economy and Media Coverage of the European Economic Crisis Julien Mercille, 2014-08-27 The European economic crisis has been ongoing since 2008 and while austerity has spread over the continent, it has failed to revive economies. The media have played an important ideological role in presenting the policies of economic and political elites in a favourable light, even if the latter's aim has been to shift the burden of adjustment onto citizens. This book explains how and why, using a critical political economic perspective and focusing on the case of Ireland. Throughout, Ireland is compared with contemporary and historical examples to contextualise the arguments made. The book covers the housing bubble that led to the crash, the rescue of financial institutions by the state, the role of the European institutions and the International Monetary Fund, austerity, and the possibility of leaving the eurozone for Europe's peripheral countries. Through a systematic analysis of Ireland's main newspapers, it is argued that the media reflect elite views and interests and downplay alternative policies that could lead to more progressive responses to the crisis.

Piracy in the Indian Film Industry Arul George Scaria, 2014-05-15 Piracy in the Indian Film Industry: Copyright and Cultural Consonance sheds light on how copyright law works at the grassroots level in India, by exploring the social, cultural, historical, legal and economic dimensions of piracy in one of the biggest copyright-based industries: the Indian film industry. Based on extensive fieldwork, this book provides novel and insightful findings on the complexity and diversity of perceptions regarding piracy within Indian society. The bottom-up approach to analysis adopted in the book elucidates how local factors influence copyright enforcement and the book proposes a mix of positive and negative incentives to increase the voluntary compliance of copyright law in India.

Paula Stamps Duston, 2015-12-24 Analyzing Form, Function, and Financing of the U.S. Health Care System tells the story of the U.S. health care system by using a narrative approach identifying function rather than the more common data-driven focus on structure. It presents policy decisions we have made about our health care system and analyzes some of their consequences to better

Configurations of Migration Jennifer Leetsch, Frederike Middelhoff, Miriam Wallraven, 2023-10-23 In a global context in which phenomena of migration play an ever more important role, the ways individual and collective experiences of migration are covered in the media, represented in culture, and interpreted are coming under increasing scrutiny. This book explores the complex relationship between creative engagements with migration on the one hand, and forms of knowledge about migration on the other, inquiring into the ways aesthetic practices are intertwined with knowledge structures. The book responds to three pressing research questions. First, it analyses how fictional texts, plays, images, films, and autobiographical accounts mediate forms of knowledge about migration. Second, it identifies the ways in which specific media approaches and aesthetic practices influence people's ideas about and awareness of migratory experiences in a globalized world. Finally, it delineates how historical perspectives help us compare epistemological approaches to migration in the nineteenth, twentieth, and early twenty-first centuries, and how these approaches affect the way critics and the public responded to and thought about different forms of (forced) migration. Bringing together renowned scholars working across disciplines, it investigates the possibilities and limitations that different media present when it comes to reflecting on, communicating, and imagining experiences of migration, and how these representations in turn create ways of knowing and understanding migration.

Never Give Up: Gerry Adams, 2017-11-03 Gerry Adams is known as a man of strong opinions and a quirky sense of humour. *Never Give Up* is a varied compilation of selected, reworked pieces that Gerry has written since 2009. They cover many issues. Some are fairly serious, others are very serious indeed. A few are whimsical. All will be enjoyed. The book gives an insight into the manoeuvring behind the scenes of political events, and how he became wrapped up in moments of history, both in Ireland and abroad, such as the funerals of Nelson Mandela and Fidel Castro. The book provides an insight into the private life of Ireland's best-known politician, including some very turbulent times in Gerry's life, such as his move from West Belfast to Co. Louth, and his passions, like hiking and the Antrim GAA teams. The book opens with a heartfelt tribute to his close friend and political ally, the late Martin McGuinness.

Financial Engineering of Climate Investment in Developing Countries

Søren E. Lütken, 2014-06-01 The Nationally Appropriate Mitigation Action (NAMA) is the new kid on the block in the battle against climate change. The NAMA is the most decisive instrument devised to address the fact that today the only source of growing emissions are the world's developing countries. But as it is based purely on voluntarism it crucially depends on financing models that

can lift the concept off the ground. This book provides the first insights as to how this concept can deliver on its promise – and challenges some of the fundamental mantras in international climate change collaboration.

Climate Change Mitigation Actions in Five Developing Countries Harald Winkler, 2017-10-02 Five case studies on mitigation actions (MAs) in developing countries illustrate the rich diversity of climate action. Researchers from Brazil, Chile, Colombia, Peru and South Africa reflect on what is possible in their countries. Case studies reflect the sheer diversity of NAMAs: from a 'Pronami' on efficient lighting in Peru, to longer-term challenges of rising energy emissions in Brazil, and much else. The book compares the similarities and differences across eight elements that could assist in developing and implementing mitigation. The comparative analysis highlights both how challenging implementation can be in the context of development, but also points to factors that might enable ambitious mitigation. The comparison suggests that choice of Mas may be linked to institutional capacity, the resources a country is endowed with and hence its emissions profile. International support can be an important global enabler. The authors find that addressing both development and climate objectives is key. This book fills an important gap in the literature from developing country authors about mitigation actions in their own countries. This book was published as a special issue of *Climate and Development*.

Varieties of Austerity Whiteside, Heather, McBride, Stephen, 2021-05-03 Austerity is not always one-size-fits-all; it can be a flexible, class-based strategy taking several forms depending on the political-economic forces and institutional characteristics present. This important book identifies continuity and variety in crisis-driven austerity restructuring across Canada, Denmark, Ireland and Spain. In their analysis, the authors focus on several components of austerity, including fiscal and monetary policy, budget narratives, public sector reform, labor market flexibilization, and resistance. In so doing, they uncover how austerity can be categorized into different dynamic types, and expose the economic, social, and political implications of the varieties of austerity.

Memory and Recovery in Times of Crisis Fiona Larkan, Fiona Murphy, 2017-11-09 This book presents a social scientific reading of the challenges of memory and recovery in times of crisis. Drawing on different interpretations of what constitutes 'crisis', this collection uses lenses of economics, identity and commemoration, to question how memory and recovery is being constituted through larger discourses of political claims of moving forward, healing and identity. *Memory and Recovery in Times of Crisis* examines how memory is dis- or re-interred through social processes and further, how recovered memories are challenged or legitimized. It also presents a set of questions that will stimulate further reflections on what kind of role understandings of memory of crisis can play in recovery. Given the world we find ourselves living in in 2017 – a world subject to multiple, intersecting crises – how we understand the dynamics of memory and recovery is a pressing issue indeed. This book will appeal to both scholars and students of anthropology and sociology.

Currency, Credit and Crisis Patrick Honohan, 2019-05-23 Ireland's experience of Europe's most spectacular financial bubble, bust and recovery is narrated and dissected by a central banking insider.

Teaching Comics Through Multiple Lenses Crag Hill, 2016-08-05 Building off the argument that comics succeed as literature—rich, complex narratives filled with compelling characters interrogating the thought-provoking issues of our time—this book argues that comics are an expressive medium whose moves (structural and aesthetic) may be shared by literature, the visual arts, and film, but beyond this are a unique art form possessing qualities these other mediums do not. Drawing from a range of current comics scholarship demonstrating this point, this book explores the unique intelligence/s of comics and how they expand the ways readers engage with the world in ways different than prose, or film, or other visual arts. Written by teachers and scholars of comics for instructors, this book bridges research and pedagogy, providing instructors with models of critical readings around a variety of comics.

The Routledge Companion to Remix Studies Eduardo Navas, Owen Gallagher, xtime burrough, 2014-11-27 The Routledge Companion to Remix Studies comprises contemporary texts by key authors and artists who are active in the emerging field of remix studies. As an organic international movement, remix culture originated in the popular music culture of the 1970s, and has since grown into a rich cultural activity encompassing numerous forms of media. The act of recombining pre-existing material brings up pressing questions of authenticity, reception, authorship, copyright, and the techno-politics of media activism. This book approaches remix studies from various angles, including sections on history, aesthetics, ethics, politics, and practice, and presents theoretical chapters alongside case studies of remix projects. The Routledge Companion to Remix Studies is a valuable resource for both researchers and remix practitioners, as well as a teaching tool for instructors using remix practices in the classroom.

Diachrony of differential argument marking Ilja A. Seržant, Alena Witzlack-Makarevich, 2018 While there are languages that code a particular grammatical role (e.g. subject or direct object) in one and the same way across the board, many more languages code the same grammatical roles differentially. The variables which condition the differential argument marking (or DAM) pertain to various properties of the NP (such as animacy or definiteness) or to event semantics or various properties of the clause. While the main line of current research on DAM is mainly synchronic the volume tackles the diachronic perspective. The tenet is that the emergence and the development of differential marking systems provide a different kind of evidence for the understanding of the phenomenon. The present volume consists of 18 chapters and primarily brings together diachronic case studies on particular languages or language groups including e.g. Finno-Ugric, Sino-Tibetan and Japonic languages. The volume also includes a position paper, which provides an overview of the typology of different subtypes of DAM systems, a chapter on computer simulation of the emergence of DAM and a chapter devoted to the cross-linguistic effects of referential hierarchies on DAM.
