Media Nation Bruce J. Schulman, Julian E. Zelizer, 2017-02-27 *Media Nation* brings together some of the most exciting voices in media and political history to present fresh perspectives on the role of mass media in the evolution of modern American politics. Together, these contributors offer a field-shaping work that aims to bring the media back to the center of scholarship modern American history.

Fatal Females Charleston, Libby-Jane, 2013-06-01 Women are supposed to be tender and loving – not cold-hearted killers, knife-wielding vampires or gun-toting hijackers. Yet throughout history, there's been no shortage of less than law-abiding ladies. Let journalist Libby-Jane Charleston take you on a chilling journey through a true crime gallery of women who have smashed our perceptions of the stereotypical feminine persona: from meek Russian librarian Lucy Dudko, who commandeered a helicopter to break her boyfriend out of prison; to suburban sex goddess Michelle Burgess, who hired a hit man to take out her lover's wife; and Katherine Knight, who killed, skinned and cooked her partner to serve to his children. Read these true stories and delve into the dark and disturbing lives of Australia's most fatal females. Former TV reporter Libby-Jane Charleston began her career in her teens as one of Australia's youngest newspaper columnists. She has worked extensively in radio, papers and magazines as well as on TV – appearing on-camera for every television network in Australia, as a finance news anchor, current affairs reporter and general news reporter at Channels Ten, Nine, Seven, SBS & ABC.

Spreading the News Richard R. JOHN, Richard R John, 2009-06-30 In the seven decades from its establishment in 1775 to the commercialization of the electric telegraph in 1844, the American postal system spurred a communications revolution no less far-reaching than the subsequent revolutions associated with the telegraph, telephone, and computer. This book tells the story of that revolution and the challenge it posed for American business, politics, and cultural life. During the early republic, the postal system was widely hailed as one of the most important institutions of the day. No other institution had the capacity to transmit such a large volume of information on a regular basis over such an enormous geographical expanse. The stagecoaches and postriders who conveyed the mail were virtually synonymous with speed. In the United States, the unimpeded transmission of information has long been hailed as a positive good. In few other countries has informational mobility been such a cherished ideal. Richard John shows how postal policy can help explain this state of affairs. He discusses its influence on the development of such information-intensive institutions as the national market, the voluntary association, and the mass party. He traces its consequences for ordinary Americans, including women, blacks, and the poor. In a broader sense, he shows how the postal system worked to create a national society out of a loose union of confederated states. This exploration of the role of the postal system in American public life provides a fresh perspective not only on an important but neglected chapter in American history, but also on the origins of some of the most distinctive features of American life today. Table of Contents: Preface Acknowledgments The Postal System as an Agent of Change The Communications Revolution Completing the Network The Imagined Community The Invasion of the Sacred The Wellspring of Democracy The Interdiction of Dissent Conclusion Abbreviations Notes Sources Index Reviews of this book: [A] splendid new book...that gives the lie to any notion that 'government' and 'administration' were 'absent' in early America. DD--Theda Skocpol, *Social Science History* This well-researched and elegantly written book will become a model for historians attempting to link public policy to cultural and political change...[It] will engage not only historians of the early republic, but all scholars interested in the relationship between state and society. DD--John Majewski, *Journal of Economic History* The strength of the book is...the author's ability to untangle the thousands of social, political, economic, and cultural threads of the postal fabric and to rearrange them into a clear and compelling social history. DD--Roy Alden Atwood, *Journal of American History* Richard R. John provides an insightful cultural history of the often-overlooked American postal system, concentrating on its preeminent status for long-distance communication between its birth in 1775 and the commercialization of the electric telegraph in 1844...John effectively draws upon government documents, newspapers, travelogues, and contemporary social and political histories to argue that the postal system causes and mirrors dramatic changes in American public life during this period...John focuses his study on the communication revolution of the past, yet his meticulous analysis of the complex motives forming the postal institution and its policies relate to such current controversies as those that surround the transmission of information in cyberspace. These contemporary disputes highlight the power of the government in shaping the communication of the people. John privileges the postal institution as the reigning communication system, yet he links it with the developing ideology of the nation, and the scope of his study ensures its value--in the disciplines of communication studies, literature, history, and political science, among others--as a history of the past and present. DD--Sarah R. Marino, *Canadian Review of American Studies* *Spreading the News* exemplifies the kind of sophisticated and nuanced research that US postal history has long needed. Richard R. John breaks from the internalist, antiquarian tradition characteristic of so many post office histories to place the postal system at the centre of American national development. DD--Richard B. Kielbowicz, *Business History* [John] presents a thoroughly researched and well-written book...[which will give] insight into the history of the post office and its impact on American life. DD--Library Journal It is surely true that in Richard John the post has had the good fortune to have found its proper historian, one capable of appreciating the complex design and social importance of the means a people use to distribute information. He has also accomplished the impressive feat of gathering together the pieces of a postal history present elsewhere as so many tiny fragments. John has drawn into a coherent design the stories of postal patronage, the decisions about postal privacy, the incidents along post roads used by others as illustrative anecdotes. John's work has inspired in him a deep appreciation for the accomplishments of the post. DD--Ann Fabian, *The Yale Review* John's book explains how the letters and newspapers sent through the post were really the glue that held the early 13 states together and that embraced additional states as the nation expanded westward...It is a splendid attempt to show the importance of mail service in the years before the telegraph or the telephone made at least brief news transmission possible. The postal system of the 19th century really was a factor, perhaps the major factor, in making the United States one nation. DD--Richard B. Graham, *Linn's Stamp News* This book traces the central role of the postal system in [its] communications revolution and its contribution to American public life. The author shows how the postal system influenced the establishment of a national society out of a loose union of confederated states. Richard John throws light onto a chapter in American history that is often neglected but sets up the origins of some of the most distinctive features of American life today...The book is a comprehensive study on an important American institution during a critical epoch in its history. DD--Monika Plum, *Prometheus* [UK] John has produced an original, well-documented, and thoughtful study that offers alternative and enticing interpretations of Jacksonian policies and public institutions. DD--Choice

Pulse of the Nation, 1936 Unlike many current affairs periodicals of the time, *Pulse of the Nation* did not seek to publish the news; instead the magazine aimed to publish the public's reactions and opinions about the affairs of the day. The editor, Albert J. Beveridge Jr, was the son of influential Indiana senator Albert J. Beveridge and he himself served as a state senator. The newspaper was short lived, ending after just 13 issues.

Changing the Face of Our Nation Martha Gladwell, 2010-10 What does the Face of Our Nation look like? How do we see ourselves? How do other nations see us? I believe it's time for a Change and Facelift for our Nation. If we read the headlines and listen to the news it will reveal the violence and turmoil happening all over America and the world. The Lord has been speaking to me for a long time about this subject. Even before the 9/11 terrorist attack He was telling me to write a book on raising children. Who am I? Could I write a book? There is a scripture that comes to my mind for this fear! I CAN DO ALL THINGS THROUGH CHRIST WHO

STRENGTHENS ME (Philippians 4:13). God knows our hearts better than we know ourselves. However, he is always on time. Maybe this is the exact time he wanted me to carry this subject to the people. MARTHA GLADWELL has been a wife and mother for nearly thirty years. She has been involved in church and music ministry for twenty years in her hometown of Williston, Florida. Her heart's desire is to share the love of Jesus to all she comes in contact with. To be all that she can be as a believer, wife and mother. This book was birthed out of a dream and directive from whom she believes was God. Her question: How can we fix our country? God's answer: Through our children! The title to the book CHANGING THE FACE OF OUR NATION came in a dream. Martha and her husband, Jimmy, are the parents of three grown children Jim, Raymond, and Nellie.

America, We Need to Talk Joel Berg, 2017-02-21 How did we get here, America? How did our relationship get so broken? And where do we go now? Starting with the premise that Americans' most important relationship is with their nation, Joel Berg's second book, *America We Need to Talk: A Self-Help Book for the Nation*, makes a case for how we must both stop blaming the nation's problems solely on "the politicians" or "the system" and take personal responsibility to solve them. Written as both a hilarious parody of relationship and self-help books and a deadly serious analysis of the nation's political and economic dysfunction, the book dissects how Donald Trump and other Republicans won over white, working-class voters, and includes a concrete plan to win them back, and well as a broader roadmap for reducing poverty, bolstering the middle class, and powering an overall progressive resurgence. As an acclaimed author, a frequent voice in the national media, and the outspoken CEO of the nonprofit group Hunger Free America, Joel Berg is a respected international leader in the fields of hunger, poverty, food, and US politics. Through his biting critique, clear-headed prescriptions, and amusing charts—this book shows how average Joes and Janes can channel their anger at our hobbled government into concrete actions that will fix our democracy, make our economy work for everyone, and restore our stature in the world as a beacon of freedom, diversity, and hope. The American people are in it for the long haul, and, as in all relationships, both sides must recognize their issues and work together to fix them. This book will do more than offer comfort for sobbing progressives—it will show the path to redemption.

Reaching Higher The State News, 2016-04-01 After winning 13 games in 2013 and 11 in 2014, Michigan State coach Mark Dantonio was anything but satisfied. Dantonio announced in the summer that his 2015 team's motto would be, "reach higher." The Spartans did just that. Behind quarterback Conner Cook and one of the nation's top defenses, Michigan State survived a few early-season scares before statement wins over rivals Michigan and Ohio State set up a Big Ten championship game match-up against Iowa. In Indianapolis, MSU scored on an epic final drive to secure the conference championship and a spot in the College Football Playoff. *Reaching Higher* is the story of how Coach Dantonio elevated Michigan State into college football's elite, told through images and stories from *The State News*, Michigan State's award-winning student newspaper. This commemorative edition highlights the key moments and stars from the Dantonio era in East Lansing, from Dantonio's hiring in 2007 to the thrilling overtime win over Georgia in the 2012 Outback Bowl to the 2013 Big Ten championship season and Rose Bowl win to the program's College Football Playoff berth in 2015. Also including features on stars Cook, Kirk Cousins, Le'Veon Bell, and others, *Reaching Higher* is an essential read for every Spartans fan.

Pioneering Astronauts, NASA Oral Histories - Glenn, Carpenter, Cooper, Allen, Brand, Engle, Lind, Plus Apollo 13 History by Lunney - Mercury, Gemini, Apollo Programs Johnson Space Center (JSC), World Spaceflight News, National Aeronautics and Space Administration (NASA), 2017-05-10 The fascinating oral histories of seven American astronauts provide new insights into this historic program, with vital observations about an era of space history that changed the world. The interviews divulge new information and some long-held secrets; they are sometimes emotional, sometimes analytical, with revealing anecdotes, stories of supervisors and colleagues, experiences of spaceflight, and much more. Even serious space enthusiasts will find numerous aha, I didn't know that comments! In addition to the astronaut oral histories, there is a comprehensive chronology of the events of Apollo 13 written by flight director Glynn S. Lunney. Astronauts in this set of histories: John Glenn, Scott Carpenter, Gordon Cooper, Joe Allen, Vance Brand, Joe Engle, and Don Lind. The oral histories are the transcripts from audio-recorded, personal interviews with many who pioneered outer space and the Moon, and with those who continue the excitement of space exploration. To preserve the integrity of the audio record, the texts are presented with limited revisions and thus reflect the candid conversational style of the oral history format. Brackets and ellipses indicate where the text has been annotated or edited for clarity. The date of each interview is noted. Established in 1996, the goal of the NASA Johnson Space Center Oral History Project (JSC OHP) is to capture history from the individuals who first provided the country and the world with an avenue to space and the moon. Participants include managers, engineers, technicians, doctors, astronauts, and other employees of NASA and aerospace contractors who served in key roles during the Mercury, Gemini, Apollo, Skylab, and Shuttle programs. These oral histories ensure that the words of these pioneers live on to tell future generations about the excitement and lessons of space exploration. Oral history interviews began in the summer of 1997, and since that time more than 675 individuals have participated in the NASA Oral History projects.

Coloring the Nation David Howard, 2001-01-01 Howard (geography, University of Oxford) considers the significance of race in Dominican society and its manifestations in everyday life. He gives particular attention to the Dominican construction of a white identity and the ways it relies on supposed differences with the country's nearest neighbor, Haiti. Drawing on interviews, Howard examines how ideas of skin color and racial identity affect the way Dominicans view themselves and their Haitian neighbors, with emphasis on the political consequences of these attitudes. c. Safari Nation Jacob S. T. Dlamini, 2020-04-22 Safari Nation opens new lines of inquiry in the study of national parks in Africa and the rest of the world. The Kruger National Park is South Africa's most iconic nature reserve, renowned for its rich flora and fauna. According to author Jacob Dlamini, there is another side to the park, a social history neglected by scholars and popular writers alike in which blacks (meaning Africans, Coloureds, and Indians) occupy center stage. Safari Nation details the ways in which black people devoted energies to conservation and to the park over the course of the twentieth century—engagement that transcends the stock (black) figure of the laborer and the poacher. By exploring the complex and dynamic ways in which blacks of varying class, racial, religious, and social backgrounds related to the Kruger National Park, and with the help of previously unseen archival photographs, Dlamini's narrative also sheds new light on how and why Africa's national parks—often derided by scholars as colonial impositions—survived the end of white rule on the continent. Relying on oral histories, photographs, and archival research, Safari Nation engages both with African historiography and with ongoing debates about the "land question," democracy, and citizenship in South Africa.
