Reconsidering the Bicycle Luis A. Vivanco, 2013-03-05 In cities throughout the world, bicycles have gained a high profile in recent years, with politicians and activists promoting initiatives like bike lanes, bikeways, bike share programs, and other social programs to get more people on bicycles. Bicycles in the city are, some would say, the wave of the future for car-choked, financially-strapped, obese, and sustainability-sensitive urban areas. This book explores how and why people are reconsidering the bicycle, no longer thinking of it simply as a toy or exercise machine, but as a potential solution to a number of contemporary problems. It focuses in particular on what reconsidering the bicycle might mean for everyday practices and politics of urban mobility, a concept that refers to the intertwined physical, technological, social, and experiential dimensions of human movement. This book is for Introductory Anthropology, Cultural Anthropology, Cultural Sociology, Environmental Anthropology, and all undergraduate courses on the environment and on sustainability throughout the social sciences.

Bicycle/Race Adonia E. Lugo, PhD, 2018-10-09 *Bicycle/Race* paints an unforgettable picture of Los Angeles—and the United States—from the perspective of two wheels. This is a book of borderlands and intersections, a cautionary tale about the dangers of putting infrastructure before culture, and a coming-of-age story about power and identity. The colonial history of southern California is interwoven through Adonia Lugo's story of growing up Chicana in Orange County, becoming a bicycle anthropologist, and co-founding Los Angeles's hallmark open streets cycling event, CicLAvia, along the way. When she takes on racism in the world of national bicycle advocacy in Washington, DC, she finds her voice and heads back to LA to organize the movement for environmental justice in active transportation. In the tradition of *City of Quartz*, this book will forever change the way you see Los Angeles, race and class in the United States, and the streets and people around you wherever you live.

Urban Cycling Madi Carlson, 2015-10-07 • Fresh approach that every beginning bicycle commuter needs to get started with confidence • Illustrations throughout help explain cycle safety, route planning, etiquette, maintenance, and more • Author is a family cycling advocate Bicycle commuting is growing by leaps and bounds, especially among women. For many prospective bike commuters, simply seeing a bicyclist cruise past their car or bus while stuck in heavy traffic is enough to inspire a change. But many novice bike commuters crave a manual. The largest percentage of would-be bicycle commuters falls in the “Interested But Concerned” category—they have questions about rules of the road, fears about traffic, or uncertainty about how to get started. *Urban Cycling* is the easy-to-navigate resource that answers it all! Author, advocate, and urban-cycler extraordinaire Madi Carlson provides accessible and appealing guidance, giving even the most hesitant bicyclist all the tools she needs to join the cycling community. Carlson details everything from choosing a bike and gear accessories to safe riding techniques, city cycling infrastructure to route planning, and multi-modal commuting to basic maintenance. She also discusses legal issues around urban biking and commuting with children. Illustrations and diagrams of various bicycle facilities and traffic situations help show readers what is expected in each, while photographs demonstrate gear essentials and riding techniques. Tips, personal anecdotes, and profiles of bike commuters and cycling organizations from around the country provide additional advice and inspiration.

Bikenomics Elly Blue, 2014-11-29 *Bikenomics* provides a surprising and compelling new perspective on the way we get around and on how we spend our money, as families and as a society. The book starts with a look at Americans' real transportation costs, and moves on to examine the current civic costs of our transportation system. Blue tells the stories of people, businesses, organizations, and cities who are investing in two-wheeled transportation. The multifaceted North American bicycle movement is revealed, with its contradictions, challenges, successes, and visions.

Smart Cycling League of American Bicyclists, 2011 *Smart Cycling: Promoting Safety, Fun, Fitness, and the Environment* contains information that new or returning cyclists need to know before taking to the road, including basic cycling skills, rules of the road, safety strategies, and maintenance. The book includes a DVD of four videos that can be shown to participants to help them better visualize the skills being taught.

Neoliberal Chicago Euan Hague, 2016-12-12 The neoliberal philosophy of fiscal austerity aligned with reduced regulation has transformed Chicago. As pursued by mayor Rahm Emanuel and his predecessor Richard M. Daley, neoliberalism led officials to privatize everything from parking meters to schools, gut regulations and social services, and promote gentrification wherever possible. The essayists in *Neoliberal Chicago* explore an essential question: how does neoliberalism work on the ground in today's Chicago? Contextual chapters explore race relations, physical development, and why Chicago embraced neoliberalism. Other contributors delve into aspects of the neoliberal vision, neoliberalism's impact on three iconic city spaces, and how events like the 2008 foreclosure crisis and the bid to attract the Olympic Games reveal the workings of neoliberalism. Contributors: Stephen Alexander, Larry Bennett, Michael Bennett, Carrie Breitbach, Sean Dinces, Kenneth Fidel, Roberta Garner, Euan Hague, Black Hawk Hancock, Christopher Lamberti, Michael J. Lorr, Martha Martinez, Brendan McQuade, Alex G. Papadopoulos, Rajiv Shah, Costas Spiro, Carolina Sternberg, and

Yue Zhang.

Bicycle Justice and Urban Transformation Aaron Golub, Melody L. Hoffmann, Adonia E. Lugo, Gerardo F. Sandoval, 2016-07-15 As bicycle commuting grows in the United States, the profile of the white, middle-class cyclist has emerged. This stereotype evolves just as investments in cycling play an increasingly important role in neighborhood transformations. However, despite stereotypes, the cycling public is actually quite diverse, with the greatest share falling into the lowest income categories. *Bicycle Justice and Urban Transformation* demonstrates that for those with privilege, bicycling can be liberatory, a lifestyle choice, whereas for those surviving at the margins, cycling is not a choice, but an often oppressive necessity. Ignoring these invisible cyclists skews bicycle improvements towards those with choices. This book argues that it is vital to contextualize bicycling within a broader social justice framework if investments are to serve all street users equitably. Bicycle justice is an inclusionary social movement based on furthering material equity and the recognition that qualitative differences matter. This book illustrates equitable bicycle advocacy, policy and planning. In synthesizing the projects of critical cultural studies, transportation justice and planning, the book reveals the relevance of social justice to public and community-driven investments in cycling. This book will interest professionals, advocates, academics and students in the fields of transportation planning, urban planning, community development, urban geography, sociology and policy.

Urban Revolutions Emilie Bahr, 2016-04-12 *Urban Revolutions* is a different kind of cycling book. Author Emilie Bahr draws on her own experience as an everyday cyclist and a transportation planner in New Orleans to demystify urban bicycling in this visually-compelling and fun-to-read field guide. What does it mean for a city to be bike-friendly? What makes bicycling a women's issue? What does it take to feel safe on a bike? How do you bike to work in the summer and still look professional? What is the most fun you can possibly have on two wheels without having to become an athlete? Bahr answers all these questions and more in her friendly and thoughtful essays and detailed practical tips.

Rusch to Glory Rebecca Rusch, 2014 *Rusch to Glory* shows how one woman went from ordinary to extraordinary--and how anyone can discover their own greatness.

Traveler Response to Transportation System Changes, 2012 From a transportation and community perspective, objectives of pedestrian and bicycle facility improvements have evolved to include numerous aspects of providing viable and safe active transportation options for all ages, abilities, and socioeconomic groups. Pedestrian and bicycle facilities appear overall to benefit the full spectrum of society perhaps more broadly than any other provision of transportation. A challenge in non-motorized transportation (NMT) benefit analysis is to adequately account for all the different forms in which pedestrian and bicycle facilities provide benefit. In this report, new as well as synthesized research is presented. This chapter examines pedestrian and bicyclist behavior and travel demand outcomes in a relatively broad sense. It covers traveler response to NMT facilities both in isolation and as part of the total urban fabric, along with the effects of associated programs and promotion. It looks not only at transportation outcomes, but also recreational and public health outcomes. This chapter focuses on the travel behavior and public health implications of pedestrian/bicycle areawide systems; NMT-link facilities such as sidewalks, bicycle lanes, and on-transit accommodation of bicycles; and node-specific facilities such as street-crossing treatments, bicycle parking, and showers. Discussion of the implications of pedestrian and bicycle friendly neighborhoods, policies, programs, and promotion is also incorporated. The public health effects coverage of this chapter, and associated treatment of walking and bicycling and schoolchild travel as key aspects of active living, have been greatly facilitated by participation in the project by the National Center for Environmental Health--part of the Centers for Disease Control and Prevention (CDC). This pivotal CDC involvement has included supplemental financial support for the Chapter 16 work effort. It has also encompassed assistance with research sources and questions, and draft chapter reviews by individual CDC staff members in parallel with TCRP Project B-12A Panel member reviews (see Chapter 16 Author and Contributor Acknowledgments. TCRP Report 95: Chapter 16, Pedestrian and Bicycle Facilities will be of interest to transit, transportation, and land use planning practitioners; public health professionals and transportation engineers; land developers, employers, and school administrators; researchers and educators; and professionals across a broad spectrum of transportation, planning, and public health agencies; MPOs; and local, state, and federal government agencies. This chapter is complemented by illustrative photographs provided as a Photo Gallery at the conclusion of the report. In addition, PowerPoint slides of the photographs in full color are available on the TRB website at <http://www.trb.org/Main/Blurbs/167122.aspx>.

US Infrastructure Aman Khan, Klaus Becker, 2019-09-17 This book presents an in-depth look at US infrastructure and its challenges in the 21st century. While infrastructure has received considerable attention in recent years, much of the discussion has concentrated on physical, economic, or noneconomic conditions. The Trump administration has heightened interest in the topic, promising infrastructure spending during his tenure, yet little demonstrable progress has been made. This book brings together a multi-disciplinary perspective--structural, technological, economic, financial, political, planning, and policy--that has been largely absent in discussions on the subject, to provide a clearer and broader understanding of the challenges facing US infrastructure. The book is divided into three parts: Part I looks at the challenges from a structural, technological, and sustainability perspective; Part II from an economic, productivity, and finance perspective; and Part III from an institutional, security, and political perspective. Written primarily for policy

makers, managers, and administrators in public and private organizations, as well as individuals and academics with an interest in the future of US infrastructure, this book provides an in-depth analysis of the US infrastructure problem, its causes and consequences, and suggests timely, specific measures that may be taken at the state, local, and federal levels to improve and better secure our roads, transit, public buildings, economy, and technology.

Spying on Democracy Heidi Boghosian, Lewis Lapham, 2013-09-18 Spying on US citizens is rising as corporations make big bucks selling info about our private lives to the government.

(Re)presentations and Dialogue François Cooren, Alain Létourneau, 2012-11-23 This edited volume proposes key contributions addressing the connections between two important themes: dialogue and representation. These connections were approached or interpreted in three possible ways: 1. Dialogue as representation, 2. Normative perspectives on dialogue/representation issues, and 3. Representations of dialogue. The first interpretation -- Dialogue as representation -- consists of exploring dialogue as an activity where many things, beings or voices can be made present, whether we think in terms of ideologies, cultures, situations, collectives, roles, etc. The second interpretation -- Normative perspectives on dialogue/representation issues -- leads scholars to explore questions of normativity, which are often associated with the notion of dialogue, when conceived as a morally stronger form of conversation. Finally, the third interpretation -- Representations of dialogue -- invites us to address methodological questions related to the representation of this type of conversation. Echoing Bakhtin, contributors were invited to explore the polyphonic, heteroglot, or dialogic character of any text, discourse or interaction.

City Cycling John Pucher, Ralph Buehler, 2012-10-19 A guide to today's urban cycling renaissance, with information on cycling's health benefits, safety, bikes and bike equipment, bike lanes, bike sharing, and other topics. Bicycling in cities is booming, for many reasons: health and environmental benefits, time and cost savings, more and better bike lanes and paths, innovative bike sharing programs, and the sheer fun of riding. City Cycling offers

a guide to this urban cycling renaissance, with the goal of promoting cycling as sustainable urban transportation available to everyone. It reports on cycling trends and policies in cities in North America, Europe, and Australia, and offers information on such topics as cycling safety, cycling infrastructure provisions including bikeways and bike parking, the wide range of bike designs and bike equipment, integration of cycling with public transportation, and promoting cycling for women and children. City Cycling emphasizes that bicycling should not be limited to those who are highly trained, extremely fit, and daring enough to battle traffic on busy roads. The chapters describe ways to make city cycling feasible, convenient, and safe for commutes to work and school, shopping trips, visits, and other daily transportation needs. The book also offers detailed examinations and illustrations of cycling conditions in different urban environments: small cities (including Davis, California, and Delft, the Netherlands), large cities (including Sydney, Chicago, Toronto and Berlin), and “megacities” (London, New York, Paris, and Tokyo). These chapters offer a closer look at how cities both with and without historical cycling cultures have developed cycling programs over time. The book makes clear that successful promotion of city cycling depends on coordinating infrastructure, programs, and government policies.
