Double Taxation and the League of Nations Sunita Jogarajan, 2018-05-10 Modern-day tax treaties have their foundations in one of the three Model Tax Treaties developed by the League of Nations in 1928. Using previously unexplored archival material, Sunita Jogarajan provides the first in-depth examination of the development of the League's Models. This new research provides insights into questions such as the importance of double taxation versus tax evasion; the preference for source-taxation versus residence-taxation; the influence of theory and practice on the League's work; the development of bilateral rather than multilateral treaties; the influence of developing countries on the League's work; the role of Commentary in interpreting model tax treaties; and the influential factors and key individuals involved. A better understanding of the development of the original models will inform and help guide interpretation and reform of modern-day tax treaties. Additionally, this book will be of interest to scholars of international relations and the development of law at international organisations.

The Hidden Wealth of Nations Gabriel Zucman, 2016-07-22 Everyone knows the super rich are hiding tons of money and not paying near enough taxes. This common knowledge that the wealthy have found ways around taxation by moving their assets to countries that don't tax them raises the question of how much of the world's wealth is hidden and how. Gabriel Zucman, a prominent young French economist, has come up with novel yet effective ways of quantifying how big the problem is, how tax havens work and are organized, and how we can begin to tackle the problem. Digging deep into the global data and comparing it with that of individual and international institutions, The Hidden Wealth of Nations offers for the first time a full picture of how this sophisticated international system works and is organized in practice. It is an invaluable glimpse at one of the

most powerful forces contributing to inequality across the globe.

The United Nations in Global Tax Coordination Nikki J. Teo,2023-03-31 The United Nations in Global Tax Coordination fills the decade-long knowledge gap in international tax history concerning the UN Fiscal Commission, which functioned as the overarching fiscal authority during the early post-World War II economic order. With insights from political economy and international

relations scholarship, this critical archival examination chronicles the tenacious activism by post-colonial developing countries to preserve source taxation rights, and by the UN Secretariat in championing the development of equitable tax rules. Such activism would ultimately lead developed countries to oust the UN as a forum for international tax norm setting. The book includes a revealing prehistory of the wartime work of the League of Nations that questions the legitimacy of the Mexico Model, the first model tax convention between developed and developing countries. This expertly researched work is essential reading for understanding the roles of politics, states, secretariats and private actors in directing global tax coordination.

Imposing Standards Martin Hearson,2021-06-15 In Imposing Standards, Martin Hearson shifts the focus of political rhetoric regarding international tax rules from tax havens and the Global North to the damaging impact of this regime on the Global South. Even when not exploited by tax dodgers, international tax standards place severe limits on the ability of developing countries to tax businesses, denying the Global South access to much-needed revenue. The international rules that allow tax avoidance by multinational corporations have dominated political debate about international tax in the United States and Europe, especially since the global financial crisis of

2007–2008. Hearson asks how developing countries willingly gave up their right to tax foreign companies, charting their assimilation into an OECD-led regime from the days of early independence to the present day. Based on interviews with treaty negotiators, policymakers and lobbyists, as well as observation at intergovernmental meetings, archival research, and fieldwork in Africa and Asia, *Imposing Standards* shows that capacity constraints and imperfect negotiation strategies in developing countries were exploited by capital-exporting states, shielding multinationals from taxation and depriving nations in the Global South of revenue they both need and deserve. Thanks to generous funding from the Gates Foundation, the ebook editions of this book are available as Open Access volumes from Cornell Open (cornellpress.cornell.edu/cornell-open) and other repositories.

Rural Property Tax Systems in Central and Eastern Europe Food and Agriculture Organization of the United Nations, 2002 This guide has been prepared to support governments in the design and implementation of systems to raise revenues at local levels. An increasing number of countries are introducing policies to decentralize the provision of rural services but very often local levels of government have insufficient funds to carry out these newly decentralized responsibilities. Raising revenues through property taxes on rural land represents one way to improve the capacity of local levels to deliver services.
