Mapping Nature across the Americas Kathleen A. Brosnan, James R. Akerman, 2021-10-19 Maps are inherently unnatural. Projecting three-dimensional realities onto two-dimensional surfaces, they are abstractions that capture someone's idea of what matters within a particular place; they require selections and omissions. These very characteristics, however, give maps their importance for understanding how humans have interacted with the natural world, and give historical maps, especially, the power to provide rich insights into the relationship between humans and nature over time. That is just what is achieved in *Mapping Nature across the Americas*. Illustrated throughout, the essays in this book argue for greater analysis of historical maps in the field of environmental history, and for greater attention within the field of the history of cartography to the cultural constructions of nature contained within maps. This volume thus provides the first in-depth and interdisciplinary investigation of the relationship between maps and environmental knowledge in the Americas—including, for example, stories of indigenous cartography in Mexico, the allegorical presence of palm trees in maps of Argentina, the systemic mapping of US forests, and the scientific platting of Canada's remote lands.

A Guide to Illinois Nature Centers & Interpretive Trails Walter G. Zyznieuski, Walter Zyznieuski, George Zyznieuski, 2002 Following the success of their previous collaborations, Illinois Hiking and Backpacking Trails, Revised Edition and A Guide to Mountain Bike Trails in Illinois, Walter and George Zyznieuski offer this concise and handy resource for all outdoor enthusiasts interested in the outstanding nature centers and interpretive trails throughout Illinois. The 135 sites detailed in this illustrated guide are located in municipal and county parks, forest preserves, state parks, wildlife refuges, and the Shawnee National Forest. Sites range from the Apple River Canyon State Park in northwest Illinois to the Cache River State Natural Area in southern Illinois. This guide will assist individuals and groups in successfully planning visits to these areas by clearly identifying trails that are fairly short and well suited for families and those nature centers that provide hands-on experiences viewing wildlife and nature exhibits and participating in a nature program or activity. Also, those trails that are accessible to families with strollers, individuals with disabilities, and the elderly are identified with symbols and described throughout the book. Detailed descriptions of each center and trail are included along with directions, some maps and photographs, hours of operation, and contact information, including web sites, where available. Sixty-seven nature centers and interpretive trails are featured for northern Illinois, including Chicago Botanic Garden, Spring Valley Nature Sanctuary and Volkening Heritage Farm, The Morton Arboretum, the Chicago Portage National Historic Site, and the Black Hawk State Historic Site. For those interested in central Illinois, forty-one nature centers and trails are listed, including Kickapoo Creek Park, Chautauqua National Wildlife Refuge, Valentine Park, Salt Fork River Forest Preserve, Merwin Nature Preserve, Forest Park Nature Center and Adams Wildlife Sanctuary. Twenty-seven nature centers and trails are described for southern Illinois. Among these are Lusk Creek Canyon, Giant City State Park, Cache River State Natural Area, Ferne Clyffe State Park, Rim Rock, and Crab Orchard National Wildlife Refuge.
