Making Nature Sacred John Gatta,2004-10-14 This book argues that the religious import of American environmental literature has yet to be fully recognized or understood. Making Nature Sacred explores how the quest for 'natural revelation' has been pursued through successive phases of American literary and intellectual history.

Robert Boyle: A Free Enquiry Into the Vulgarly Received Notion of Nature Robert Boyle,1996-11-07 An important treatise by one of the leading mechanical philosophers of the seventeenth century.

There's No Such Thing as Bad Weather Linda Åkeson McGurk,2017-10-03 Bringing Up Bébé meets Last Child in the Woods in this “fascinating exploration of the importance of the outdoors to childhood development” (Kirkus Reviews) from a Swedish-American mother who sets out to discover if the nature-centric parenting philosophy of her native Scandinavia holds the key to healthier, happier lives for her American children. Could the Scandinavian philosophy of “There’s no such thing as bad weather, only bad clothes” hold the key to happier, healthier lives for American children? When Swedish-born Linda Åkeson McGurk moved to Indiana, she quickly learned that the nature-centric parenting philosophies of her native Scandinavia were not the norm. In Sweden, children play outdoors year-round, regardless of the weather, and letting babies nap outside in freezing temperatures is common and recommended by physicians. Preschoolers spend their days climbing trees, catching frogs, and learning to compost, and environmental education is a key part of the public-school curriculum. In the US, McGurk found the playgrounds deserted, and preschoolers were getting drilled on academics with little time for free play in nature. And when a swimming outing at a nearby creek ended with a fine from a park officer, McGurk realized that the parenting philosophies of her native country and her adopted homeland were worlds apart. Struggling to decide what was best for her family, McGurk embarked on a six-month journey to Sweden with her two daughters to see how their lives would change in a place where spending time in nature is considered essential to a good childhood. Insightful and lively, There’s No Such Thing as Bad Weather is a fascinating personal narrative that illustrates how Scandinavian culture could hold the key to raising healthy, resilient, and confident children in America.

The Chernobyl, Fukushima Daiichi and Deepwater Horizon Disasters from a Natural Science and Humanities Perspective Volker Hoensch,2022-07-01 In our everyday imaginations we use the laws of nature with their tremendous possibilities of technical progress for the benefit of mankind. The three catastrophes of Chernobyl (26 April 1986), Fukushima Daichii (11 March 2011) and in the Gulf of Mexico, explosion of the drilling platform Deepwater Horizon (20 April 2010), have shaken this world view. Who directed this development? Is it a matter of human error or technical failure? For the answer, approaches from the natural sciences and the humanities are presented.

Turned Out Nice Again Richard Mabey,2013-02-18 In his trademark style, Richard Mabey weaves together science, art and memoirs (including his own) to show the weather's impact on our culture and national psyche. He rambles through the myths of Golden Summers and our persistent state of denial about the winter; the Impressionists' love affair with London smog, seasonal affective disorder (SAD - do we all get it?) and the mysteries of storm migraines; herrings falling like hail in Norfolk and Saharan dust reddening south-coast cars; moonbows, dog-suns, fog-mirages and Constable's clouds; the fact that English has more words for rain than Inuit has for snow; the curious eccentricity of country clothing and the mathematical behaviour of umbrella sales. We should never apologise for our obsession with the weather. It is one of the most profound influences on the way we live, and something we all experience in common. No wonder it's the natural subject for a greeting between total strangers: 'Turned out nice again.'

Harnessing the Wheelwork of Nature Thomas Valone,2002 Presents the compelling argument for Tesla's most ambitious project, the wireless transmission of power. A possible solution to the world power crisis.

Cultural Models of Nature Giovanni Bennardo,2019-03-19 Drawing on the ethnographic experience of the contributors, this volume explores the Cultural Models of Nature found in a range of food-producing communities located in climate-change affected areas. These Cultural Models represent specific organizations of the etic categories underlying the concept of Nature (i.e. plants, animals, the physical environment, the weather, humans, and the supernatural). The adoption of a common methodology across the research projects allows the drawing of meaningful cross-cultural comparisons between these communities. The research will be of interest to scholars and policymakers actively involved in research and solution-providing in the climate change arena.

Weed-Free Gardening Tasha Greer,2022-04-12 Weed-Free Gardening introduces a comprehensive and achievable plan for eliminating weed pressure in your planting beds.

Of the Law of Nature and Nations Samuel Freiherr von Pufendorf,1703 In 1662 Pufendorf was appointed to the first modern professorship in natural law (at the University of Heidelberg). In 1670 he became professor of natural law at the University of Lund in Sweden. First published in 1672, this is his principle work and a landmark in the history of natural and international law. Beginning with a consideration of fundamental legal ideas and their various divisions, Pufendorf proceeded to a discussion of the validity of customs, the doctrines of necessity and innate human reason. The work is significant in part because it developed principles introduced by Grotius and Hobbes. Unlike Hobbes, Pufendorf argued that peace, not war, was the state of nature, and he proposed that international law was not restricted to Christendom. -- Lawbook Exchange.
