Forensic Genealogy Colleen Fitzpatrick (Ph. D.),Andrew Yesier,2013-05 Make unconventional discoveries from surprising sources, understand how your ancestors lived and be fascinated by insights into your family history. Dr. Fitzpatrick shows that you don't have to be a rocket scientist to get the most from your genealogical materials. Forensics can be fascinating, genealogy can be fun, and Forensic Genealogy can be fascinating fun!

The Last Circle Cheri Seymour,2010-09-26 Probing one of most organized and complex criminal enterprises in the United States, this report exposes the dynamics of the Octopus, a globe-trotting undercover intelligence operative. Based on 18 years of investigative research, this account reveals high-level, covert government operations and the elaborate corporate structures and the theft of high-tech software (PROMIS) used as smoke-and-mirror covers for narcotics trafficking, money laundering, arms sales, and espionage. The Octopus connections to a maze of politicians and officials in the National Security Council, the CIA, the FBI, and the U.S. Department of Justice are revealed. A detailed look into the recent high-profile arrest of Mafia hit-man Jimmy Hughes is also included in this intriguing analysis.

The Complete Book on Glass and Ceramics Technology (2nd Revised Edition) NIIR Board of Consultants & Engineers,2017-04-09 Ceramics also known as fire clay is an inorganic, non-metallic solid article, which is produced by the art or technique of heat and subsequent cooling. The ceramics industry in India came into existence about a century ago and has matured over time to form an industrial base. From traditional pottery making, the industry has evolved to find its place in the market for sophisticated insulators, electronic and electrical items. The ceramic industry has been modernizing continuously, by newer innovations in product design, quality etc. Glass is an inorganic product typically produced by melting a mixture of silica, soda and calcium compound with desired metallic oxides that serves as coloring agents. Indian glass industry will increase on the sidelines of real estate growth across retail, residential and office estate. Glass production involves the fusion of several inorganic substances. These various substances include products such as silica sand, soda ash, dolomite and limestone, representing together 99% of all the raw materials, excluding recycled

glass. Glass-ceramics are mostly produced in two steps: First, a glass is formed by a glass-manufacturing process. The glass is cooled down and is then reheated in a second step. In this heat treatment the glass partly crystallizes. In most cases nucleation agents are added to the base composition of the glass-ceramic. These nucleation agents aid and control the crystallization process. Glass-ceramics are fine-grained polycrystalline materials formed when glasses of suitable compositions are heat treated and thus undergo controlled crystallization to the lower energy, crystalline state. It is important to emphasize a number of points in this statement on glass ceramics. Glass ceramics has helped the electronics industry build much smaller and highly efficient transistors, leading to advances in all types of devices. The book covers almost all important aspects of Glass and Ceramic Industry: Properties, Applications, Manufacturing, Processing and Photographs of Plant & Machinery with Supplier's Contact Details. The major contents of the book are types of glasses, silicate glasses, boric oxide and borate glasses, phosphorus pentoxide and phosphate glasses, germanium dioxide and germanate glasses, titanate glasses, nitrate glasses, glasses based on water, halide glasses, modern glass working, monax and pyrex glass, electric welding, photo electric cells, glassy metals, analysis of glass, glass ceramics, ceramics as electrical materials, analysis of ceramics etc. The book will be useful to the consultants, technocrats, research scholars, libraries and existing units and new entrepreneurs who will find a good base to work further in this field.
