**Contested Territory** Christian C. Lentz,2019-04-23 The definitive account of one of the most important battles of the twentieth century, and the Black River borderlands' transformation into Northwest Vietnam This new work of historical and political geography ventures beyond the conventional framing of the Battle of Điện Biên Phủ, the 1954 conflict that toppled the French empire in Indochina. Tracking a longer period of anticolonial revolution and nation-state formation from 1945 to 1960, Christian Lentz argues that a Vietnamese elite constructed territory as a strategic form of rule. Engaging newly available archival sources, Lentz offers a novel conception of territory as a contingent outcome of spatial contests.

**Political Violence in Southeast Asia since 1945** Eve Monique Zucker,Ben Kiernan,2021-04-19 This book examines postwar waves of political violence that affected six Southeast Asian countries – Indonesia, Burma/Myanmar, Cambodia, Thailand, the Philippines, and Vietnam – from the wars of independence in the mid-twentieth century to the recent Rohingya genocide. Featuring cases not previously explored, and offering fresh insights into more familiar cases, the chapters cover a range of topics including the technologies of violence, the politics of fear, inclusion and exclusion, justice and ethics, repetitions of mass violence events, impunity, law, ethnic and racial killings, crimes

against humanity, and genocide. The book delves into the violence that has reverberated across the region spurred by local and global politics and ideologies, through the examination of such themes as identity ascription and formation, existential and ontological questions, collective memories of violence, and social and political transformation. In our current era of global social and political transition, the volume's case studies provide an opportunity to consider potential repercussions and outcomes of various political and ideological positionings and policies. Enhancing our understanding of the technologies, techniques, motives, causes, consequences, and connections between violent episodes in the Southeast Asian cases, the book raises key questions for the study of mass violence worldwide.

Common Clinical Presentations in Dogs and Cats Ryane E. Englar, 2019-09-04 Common Clinical Presentations in Dogs and Cats is a reliable resource and quick reference to essential information for diagnosing canine and feline patients, based on presenting complaints. The text takes a problem-oriented approach to recognizing common clinical conditions, and introduces diagnostic and treatment plans for companion animal practice. Equally useful for veterinary students and practicing clinicians, the book presents 78 chapters grouped by body system, for ease of access. Each chapter focuses on identifying the chief complaint, pinpointing possible diagnoses, and determining the clinical approach to patient care. The book is richly illustrated throughout with clinical photographs and line drawings that demonstrate the concepts presented. Common Clinical Presentations in Dogs and Cats is an essential resource that:

- Gives clinicians fast access to essential details for approaching common case presentations in dogs and cats and forming a correct diagnosis
- Presents information by clinical signs, organized by body system
- Takes a standardized chapter format for ease of use
- Includes color photographs and line drawings to illustrate the conditions discussed

Written for small animal general

practitioners and veterinary students, Common Clinical Presentations in Dogs and Cats is a patient-side reference that can help practitioners gain the knowledge and confidence to correctly diagnose a wide range of clinical presentations.

**Mobile Ad-hoc and Sensor Networks** Xiaohua Jia, Jie Wu, Yanxiang He, 2005-12-05 This book constitutes the refereed proceedings of the First International Conference on Mobile Ad-hoc and Sensor Networks, MSN 2005, held in Wuhan, China in December 2005. The volume also contains 12 papers of the MSN workshop on Modeling and the Security in the Next Generation Mobile Information Systems (MSG 2005). The 112 revised full papers were carefully reviewed and selected from a total of 512 submissions. The papers address all current topical areas in mobile ad hoc and sensor networks such as network architecture and protocols, software platforms and development tools, self-organization and synchronization, routing and data dissemination, failure resilience and fault isolation, energy management, data, information, and signal processing, security and privacy, network planning, provisioning, and deployment, network modeling and performance evaluation, developments and applications, as well as integration with other systems.

**Adaptation and Cross Layer Design in Wireless Networks** Mohamed Ibnkahla, 2018-10-08 Adaptive techniques play a key role in modern wireless communication systems. The concept of adaptation is emphasized in the Adaptation in Wireless Communications Series through a unified framework across all layers of the wireless protocol stack ranging from the physical layer to the application layer, and from cellular systems to next-generation wireless networks. Adaptation and Cross Layer Design in Wireless Networks is devoted to adaptation in the data link layer, network layer, and application layer. The book presents state-of-the-art adaptation techniques and methodologies, including cross-layer adaptation, joint signal processing, coding and networking, selfishness in mobile ad hoc networks,

cooperative and opportunistic protocols, adaptation techniques for multimedia support, self -organizing routing, and tunable security services. It presents several new theoretical paradigms and analytical findings which are supported with various simulation and experimental results. Adaptation in wireless communications is needed in order to achieve high capacity and ubiquitous communications. The current trend in wireless communication systems is to make adaptation dependent upon the state of the relevant parameters in all layers of the system. Focusing on simplified cross layer design approaches, this volume describes advanced techniques such as adaptive resource management, adaptive modulation and coding, 4G communications, QoS, diversity combining, and energy and mobility aware MAC protocols. The first volume in the series, *Adaptive Signal Processing in Wireless Communications* (cat no.46012) covers adaptive signal processing at the physical layer.

*Adaptation in Wireless Communications - 2 Volume Set*  
Mohamed Ibnkahla, 2018-10-08 The widespread use of adaptation techniques has helped to meet the increased demand for new applications. From adaptive signal processing to cross layer design, *Adaptation in Wireless Communications* covers all aspects of adaptation in wireless communications in a two-volume set. Each volume provides a unified framework for understanding adaptation and relates various specializations through common terminologies. In addition to simplified state-of-the-art cross layer design approaches, they also describe advanced techniques, such as adaptive resource management, 4G communications, and energy and mobility aware MAC protocols.

**Democracies** Lynda Lee Kaid,1999 Throughout the world, television has become an important part of the way in which political candidates and parties present their messages to voters during election campaigns. This is particularly true in campaigns at the national level where voters have little personal contact with candidates and must rely on experiencing candidates through the media. Despite the importance of the media for voter-government interaction, however, many new reform governments in the post-communist era in Eastern European countries failed to appreciate the demands of creating workable new media systems.

The Cambridge Handbook of Community Psychology Caroline S. Clauss-Ehlers,2021-12-16 This comprehensive handbook provides community psychology approaches to addressing the key issues that impact individuals and their communities worldwide. Featuring international, interdisciplinary perspectives from leading experts, the handbook tackles critical contemporary challenges. These include climate change, immigration, educational access, healthcare, social media, wellness, community empowerment, discrimination, mental health, and many more. The chapters offer case study examples to present practical applications and to review relevant implications within diverse contexts. Throughout, the handbook considers how community psychology plays out around the world: What approaches are being used in different countries? How does political context influence the development and extension of community psychology? And what can nations learn from each other as they examine successful community psychology-based interventions? This is essential reading for researchers, students, practitioners, and policy makers involved with community well-being.
