**The Ultimate Beginner's Guide To Scuba Diving** Darcy Kieran, 2023-04-13 How to scuba dive? How to get my scuba diving certification? Start off on the right fin! If you are not a diver yet, grab this in-depth handbook! It is everything you need to know about diving and scuba certification in a step-by-step beginner's guide. If you are a newly certified scuba diver and do not yet feel safe & comfortable underwater, this guide will show you how to become as comfortable underwater as you are when sitting on your couch. If you are a scuba diving instructor, this reference book will provide a quality framework to use with your open water divers to prepare them for a lifetime of legendary underwater experiences. \*\*\* Regardless of your reason for wanting to learn to dive, chances are you won't go scuba diving after completing your open-water certification. Weird, right? There are "holes" in the way scuba diving instructors teach, and this handbook will lay it bare so you can

prepare to learn to dive and get what you need for a lifetime of legendary underwater adventures.

\*\*\* Recommendations are backed by industry-wide surveys that the author shares with you. He also explains ISO international scuba diving training standards so you can prepare and know if you are being short-changed. This step-by-step handbook to learning to dive covers scuba certification courses, dive equipment & dive travel with 550+ pages of actionable information. - Should I get a PADI certification or go with another dive training agency? - How much does it cost to learn to dive? How can I save money? - How can I get comfortable underwater? - What can I do to feel & be safe while scuba diving? - What are the scuba certification levels & which ones matter to me? - Typical mistakes made by people who decide to learn to dive. - The pitfalls & traps in the dive industry. How to avoid them. - Where to take your certification and with whom. - Selecting a dive instructor, dive center, dive resort & dive boat. - Your health & fitness to dive. - What dive gear to buy & what to rent. - How to save money by spending on what will actually help you. - And so much more! Most books about scuba diving are written by instructors with good content. But Darcy Kieran gives you a 360-degree view from his experience as a scuba diving instructor trainer & owner/manager of dive shops, dive equipment wholesalers, dive boats, scuba diving university programs, and dive resorts.

\*\*\* This handbook won't teach you how to scuba dive – you must get in the water for that! But you will know exactly what to do before registering for a scuba certification course. The author shares typical mistakes that would cost you time and money and, in many cases, provide you with such a bad experience that you would want to stop scuba diving. This book gives you a chance to learn from others' mistakes! It will help you understand how the dive industry operates so you can navigate it to your advantage. Do not risk missing out on a lifetime of legendary scuba diving adventures because many dive professionals you'll encounter are not always professional. Instead, learn how to be the

leader of your own adventure!

US Cruisers 1883-1904 Lawrence Burr, 2011-12-20 By the end of the Civil War the US Navy was the most advanced in the world, but in subsequent years America's naval might dwindled. However, in the 1880s a 'New Navy' was born and at the forefront of its fleet were the mighty cruisers. Naval historian Lawrence Burr details how these cruisers allowed America to rebuild their navy, exploring the design and development of these ships. Placing these advances in context, through vivid accounts of how US cruisers performed in the Spanish-American War of 1898, notably at Manila Bay and Santiago, he investigates the emergence of the US Navy as a major power. Illustrated with early photographs and full-colour artwork, this is a concise history of the birth and development of a modern navy that was the precursor to the development of modern steel fleets around the world.

*Emperors of the Deep* William McKeever, 2019-06-25 In this remarkable groundbreaking book, a documentarian and conservationist, determined to dispel misplaced fear and correct common misconceptions, explores in-depth the secret lives of sharks—magnificent creatures who play an integral part in maintaining the health of the world's oceans and ultimately the planet. From the Jaws blockbusters to Shark Week, we are conditioned to see sharks as terrifying cold-blooded underwater predators. But as Ocean Guardian founder William McKeever reveals, sharks are evolutionary marvels essential to maintaining a balanced ecosystem. We can learn much from sharks, he argues, and our knowledge about them continues to grow. The first book to reveal in full the hidden lives of sharks, *Emperors of the Deep* examines four species—Mako, Tiger, Hammerhead, and Great White—as never before, and includes fascinating details such as: Sharks are 50-million

years older than trees; Sharks have survived five extinction level events, including the one that killed off the dinosaurs; Sharks have electroreception, a sixth-sense that lets them pick up on electric fields generated by living things; Sharks can dive 4,000 feet below the surface; Sharks account for only 6 human fatalities per year, while humans kill 100 million sharks per year. McKeever goes back through time to probe the shark's pre-historic secrets and how it has become the world's most feared and most misunderstood predator, and takes us on a pulse-pounding tour around the world and deep under the water's surface, from the frigid waters of the Arctic Circle to the coral reefs of the tropical Central Pacific, to see sharks up close in their natural habitat. He also interviews ecologists, conservationists, and world-renowned shark experts, including the founders of Greenpeace's Rainbow Warrior, the head of the Massachusetts Shark Research Program, and the self-professed "last great shark hunter." At once a deep-dive into the misunderstood world of sharks and an urgent call to protect them, *Emperors of the Deep* celebrates this wild species that hold the key to unlocking the mysteries of the ocean—if we can prevent their extinction from climate change and human hunters.
