Florida Regional Common EMS Protocols Jones Learning, 2010-10-22 Physicians, EMS Chiefs, Training Officers, and Field Paramedics throughout Florida developed the Florida Regional Common EMS Protocols. These protocols are based on National Standards and the most recent clinical studies regarding the delivery of prehospital care. Medical experts in the specialized areas of the protocols were an integral part of the protocol development process. In addition, an in-depth peer review was conducted to provide all participating agencies the opportunity to give input into the design and content of the protocols.

R.I. Statewide EMS Protocols 2018.03 Second Story Graphics, 2019-01-17 This is a bound, black and white copy of the new (version 2018.3 version) State of Rhode Island Emergency Medical Services Protocols. This book is essential for all paramedics, EMTs (both EMT-Bs and AEMT-Cs) licensed by the State of Rhode Island. R.I. Statewide EMS Protocols is also a great manual for anyone in the field of emergency medicine including first responders. There is a free, downloadable, PDF copy of this document on the State of Rhode Island, Department of Health website. The original document on the State of RI website is 330 pages and includes several blank pages separating sections. This bound copy is a version without those white, blank pages making this a lighter, thinner and more portable version.

Florida Regional Common EMS Protocols Field Guide Michael Hohl, 2004-10 Designed as a companion to the Florida Regional Common EMS Protocols manual, this pocket-sized, spiral bound field guide allows for fast reference in the field. The protocols in the field guide are based on National Standards and the most recent clinical studies regarding the delivery of prehospital care.

Homeland Security Austere Emergency Medical Support (AEMS) Field Guide The following protocols outline the emergency medical support that can be administered under austere conditions by emergency medical services (EMS) providers credentialed by the Department of Homeland Security (DHS) Office of Health Affairs (OHA). These protocols are intended to supplement the DHS/OHA Basic Life Support (BLS) and Advanced Life Support (ALS) protocols when providers are operating in austere environments. The protocols guide the management of individual patients while considering the

circumstances under which patient evaluation and treatment may occur. Any given patient may require the use of a single protocol, a portion of a protocol, or a combination of several protocols. OHA expects that providers will use the protocols to assess, and to establish a treatment plan for each patient.

Emergency Medical Services Jane H. Brice, Theodore R. Delbridge, J. Brent Myers, 2021-08-12 The two-volume *Emergency Medical Services: Clinical Practice and Systems Oversight* delivers a thorough foundation upon which to succeed as an EMS medical director and prepare for the NAEMSP National EMS Medical Directors Course and Practicum. Focusing on EMS in the 'real world', the book offers specific management tools that will be useful in the reader's own local EMS system and provides contextual understanding of how EMS functions within the broader emergency care system at a state, local, and national level. The two volumes offer the core knowledge trainees will need to successfully complete their training and begin their career as EMS physicians, regardless of the EMS systems in use in their areas. A companion website rounds out the book's offerings with audio and video clips of EMS best practice in action. Readers will also benefit from the inclusion of: A thorough introduction to the history of EMS An exploration of EMS airway management, including procedures and challenges, as well as how to manage ventilation, oxygenation, and breathing in patients, including cases of respiratory distress Practical discussions of medical problems, including the challenges posed by the undifferentiated patient, altered mental status, cardiac arrest and dysrhythmias, seizures, stroke, and allergic reactions An examination of EMS systems, structure, and leadership

Strategies to Improve Cardiac Arrest Survival Institute of Medicine, Board on Health Sciences Policy, Committee on the Treatment of Cardiac Arrest: Current Status and Future Directions, 2015-09-29 Cardiac arrest can strike a seemingly healthy individual of any age, race, ethnicity, or gender at any time in any location, often without warning. Cardiac arrest is the third leading cause of death in the United States, following cancer and heart disease. Four out of five cardiac arrests occur in the home, and more than 90 percent of individuals with cardiac arrest die before reaching the hospital. First and foremost, cardiac arrest treatment is a community issue - local resources and personnel must provide appropriate, high-quality care to save the life of a community member. Time between onset of arrest and provision of care is fundamental, and shortening this time is one of the best ways to reduce the risk of death and disability from cardiac arrest. Specific actions can be implemented now to decrease this time, and recent advances in science could lead to new discoveries in the causes of, and treatments for, cardiac arrest. However, specific barriers must first be addressed. **Strategies to Improve Cardiac Arrest Survival** examines the complete system of response to cardiac arrest in the United States and identifies opportunities within existing and new treatments, strategies, and research that promise to improve the survival and recovery of patients. The recommendations of **Strategies to Improve Cardiac Arrest Survival** provide high-priority actions to advance the field as a whole. This report will help citizens, government agencies, and private industry to improve health outcomes from sudden cardiac arrest across the United States.
