*The Gas Station in America* John A. Jakle,Keith A. Sculle,1994 The first architect-designed gas station - a Pittsburgh Gulf station in 1913 - was also the first to offer free road maps; the familiar Shell name and logo date from 1907, when a British mother-of-pearl importer expanded its line to include the newly discovered oil of the Dutch East Indies; the first enclosed gas stations were built only after the first enclosed cars made motoring a year-round activity - and operating a service station was no longer a seasonal job; the system of octane rating was introduced by Sun Oil as a marketing gimmick (74 for premium in 1931). As the number of true gas stations continues its steady decline - from 239,000 in 1969 to fewer than 100,000 today - the words and images of this book bear witness to an economic and cultural phenomenon that was perhaps more uniquely American than any other of this century.--Jacket.

*Foursquare and Me: How Location-based Social Networking Made My Life Complete* James Penny,2010-08-28 The story of one man's first month using Foursquare on an iPhone while trying to work, lose weight, and occasionally publish a book review. At the end of the month, he was still employed, a very few pounds lighter, and still working on that book review. Well, if still receiving direct deposits, seeing somewhat smaller numbers on the scales, and saving an ever larger file count for some sort of progress.

**Guide for Identifying and Converting High-potential Petroleum Brownfield Sites to**

**Alternative Fuel Stations** Caley Johnson,2011 Former gasoline stations that are now classified as brownfields can be good sites to sell alternative fuels because they are in locations that are convenient to vehicles and they may be seeking a new source of income. However, their success as alternative fueling stations is highly dependent on location-specific criteria. First, this report outlines what these criteria are, how to prioritize them, and then applies that assessment framework to five of the most popular alternative fuels--electricity, natural gas, hydrogen, ethanol, and biodiesel. The second part of this report delves into the criteria and tools used to assess an alternative fuel retail site at the local level. It does this through two case studies of converting former gasoline stations in the Seattle-Eugene area into electric charge stations. The third part of this report addresses steps to be taken after the specific site has been selected. This includes choosing and installing the recharging equipment, which includes steps to take in the permitting process and key players to include.

**Fill 'er Up** Jim Draeger,Mark Speltz,2008-10-07 The companion volume to the Wisconsin Public Television documentary of the same name, Fill 'er Up: The Glory Days of Wisconsin Gas Stations visits 60 Wisconsin gas stations that are still standing today and chronicles the history of these humble yet ubiquitous buildings. The book tells the larger story of the gas station's place in automobile culture and its evolution in tandem with American history, as well as the stories of the individuals influenced by the gas stations in their lives.
