CFA Institute

Aircraft Valuation David Yu, 2020-10-23 This book is one of the first to explore aviation and aircraft leasing and its values establishing it as a standalone investable asset class within the larger real assets industry. Airplanes are a crucial but capital-intensive component of the global economy. The author, as an academic, researcher, appraiser, advisor and businessperson in the industry, bridges a gap in the existing literature with his analysis of the underlying aviation asset class return and risk profile. The book describes the characteristics, dynamics and drivers of the global, Asia and China specific aviation and leasing landscapes. Recent effects of COVID-19 on aviation and an analysis of the drivers affecting cross border mergers and acquisitions in the industry are also investigated. The book includes 20+ years of empirical aircraft valuation evidence and analysis of its characteristics establishing the aircraft and sub-segments as asset classes. In addition, characteristic comparisons to other real asset subclasses and benchmarks are examined. This book will be of interest to academics, financiers, investors, industry participants and more general aviation enthusiasts.

The Allocator's Edge Phil Huber, 2021-11-30 We are entering a golden age of alternative investments. Alternative asset classes including private equity, hedge funds, catastrophe reinsurance, real assets, non-traditional credit, alternative risk premia, digital assets, collectibles, and other novel assets are now available to investors and their advisors in a way that they never have been before. The pursuit of diversification is not as straightforward as it once was — and the classic 60/40 portfolio may no longer be sufficient in helping investors achieve their most important financial goals. With the ever-present need for sustainable income and risk management, alternative assets are poised to play a more prominent role in investor portfolios. Phil Huber is the Chief Investment Officer for a multi-billion dollar wealth management firm and acts as your guide on a journey through the past,

present, and future of alternative investments. In this groundbreaking tour de force, he provides detailed coverage across the spectrum of alternative assets: their risk and return characteristics, methods to gain exposure, and how to fit everything into a balanced portfolio. The three parts of *The Allocator's Edge* address: 1. Why the future may present challenges for traditional portfolios; why the adoption of alternatives has remained elusive for many allocators; and why the case for alternatives is more compelling than ever thanks to financial evolution and innovation. 2. A comprehensive survey of the asset classes and strategies that comprise the vast universe of alternative investments. 3. How to build durable and resilient portfolios that harness alternative assets; and how to sharpen the client communication skills needed to establish proper expectations and make the unfamiliar familiar. *The Allocator's Edge* is written with the practitioner in mind, providing financial advisors, institutional allocators, and other professional investors the confidence and courage needed to effectively understand, implement, and translate alternatives for their clients. Alternative investments are the allocator's edge for the portfolios of tomorrow — and this is the essential guide for advisors and investors looking to seize the opportunity.

Factor Investing and Asset Allocation: A Business Cycle Perspective Vasant Naik, Mukundan Devarajan, Andrew Nowobilski, Sébastien Page, CFA, Niels Pedersen, 2016-12-30

Alternative Investments CAIA Association, Hossein B. Kazemi, Keith H. Black, Donald R. Chambers, 2016-09-27 In-depth Level II exam preparation direct from the CAIA Association CAIA Level II is the official study guide for the Chartered Alternative Investment Analyst professional examination, and an authoritative guide to working in the alternative investment sphere. Written by the makers of the exam, this book provides in-depth guidance through the entire exam agenda; the Level II strategies are the same as Level I, but this time you'll review them through the lens

of risk management and portfolio optimisation. Topics include asset allocation and portfolio oversight, style analysis, risk management, alternative asset securitisation, secondary market creation, performance and style attribution and indexing and benchmarking, with clear organisation and a logical progression that allows you to customise your preparation focus. This new third edition has been updated to align with the latest exam, and to reflect the current practices in the field. The CAIA designation was developed to provide a standardized knowledge base in the midst of explosive capital inflow into alternative investments. This book provides a single-source repository of that essential information, tailored to those preparing for the Level II exam. Measure, monitor and manage funds from a risk management perspective Delve into advanced portfolio structures and optimisation strategies Master the nuances of private equity, real assets, commodities and hedge funds Gain expert insight into preparing thoroughly for the CAIA Level II exam The CAIA Charter programme is rigorous and comprehensive, and the designation is globally recognised as the highest standard in alternative investment education. Candidates seeking thorough preparation and detailed explanations of all aspects of alternative investment need look no further than CAIA Level II.

Post Modern Investment Garry B. Crowder, Thomas Schneeweis, Hossein B. Kazemi, 2012-11-08 Debunking outdated and inaccurate beliefs about investment management and reveals the new realities of the post-modern financial markets There have been a lot of big changes in the investment world over the past decade, and many long-cherished beliefs about the structures and performance of various investments no longer apply. Unfortunately the news seems not to have reached many thought leaders and investment professionals who persist in trying, and failing, to apply 20th-century thinking to 21st-century portfolio management. Nowhere is this more true than when it comes to the subject of alternative investments. Written by an all-star team

of investment management experts, this book debunks common myths and misconceptions about most classes of alternative investments and offers valuable advice on how to develop investment management and asset allocation strategies consistent with the new realities of the ever-changing world of alternative investments. Covers most alternative asset classes, including private equity, real estate, managed futures, hedge funds, commodity indices, and more Debunks long-held assumptions about the structure and performance of various investment classes that continue to dominate the industry Explores the implications for investment managers of the proliferation of international marketable securities and global financial markets Provides an overview of both the micro and the macro aspects of each alternative investment class

CFA Program Curriculum 2017 Level I, Volumes 1 - 6 CFA Institute, 2016-08-01 Clear, concise instruction for all CFA Level I concepts and competencies for the 2017 exam The same official curricula that CFA Program candidates receive with program registration is now available publicly for purchase. CFA Program Curriculum 2017 Level I, Volumes 1-6 provides the complete Level I Curriculum for the 2017 exam, delivering the Candidate Body of Knowledge (CBOK) with expert instruction on all ten topic areas of the CFA Program. Fundamental concepts are explained with in-depth discussion and a heavily visual style, while cases and examples demonstrate how concepts apply in real-world scenarios. Coverage includes ethical and professional standards, quantitative analysis, economics, financial reporting and analysis, corporate finance, equities, fixed income, derivatives, alternative investments, and portfolio management, all organized into individual sessions with clearly defined Learning Outcome Statements. Charts, graphs, figures, diagrams, and financial statements illustrate concepts to facilitate retention, and practice questions provide the opportunity to gauge your understanding while reinforcing important concepts. The Level I Curriculum

covers a large amount of information; this set breaks the CBOK down into discrete study sessions to help you stay organized and focused on learning-not just memorizing-important CFA concepts. Learning Outcome Statement checklists guide readers to important concepts to derive from the readings Embedded case studies and examples throughout demonstrate practical application of concepts Figures, diagrams, and additional commentary make difficult concepts accessible Practice problems support learning and retention CFA Institute promotes the highest standards of ethics, education, and professional excellence among investment professionals. The CFA Program Curriculum guides you through the breadth of knowledge required to uphold these standards. The three levels of the program build on each other. Level I provides foundational knowledge and teaches the use of investment tools; Level II focuses on application of concepts and analysis, particularly in the valuation of assets; and Level III builds toward synthesis across topics with an emphasis on portfolio management.

Alternative Investments: A Primer for Investment Professionals Donald R. Chambers, Keith H. Black, Nelson J. Lacey, 2018 *Alternative Investments: A Primer for Investment Professionals* provides an overview of alternative investments for institutional asset allocators and other overseers of portfolios containing both traditional and alternative assets. It is designed for those with substantial experience regarding traditional investments in stocks and bonds but limited familiarity regarding alternative assets, alternative strategies, and alternative portfolio management. The primer categorizes alternative assets into four groups: hedge funds, real assets, private equity, and structured products/derivatives. Real assets include vacant land, farmland, timber, infrastructure, intellectual property, commodities, and private real estate. For each group, the primer provides essential information about the characteristics, challenges, and purposes of these institutional-quality alternative assets in the context of a well-diversified institutional portfolio. Other topics addressed by this primer include tail risk, due diligence of the investment

process and operations, measurement and management of risks and returns, setting return expectations, and portfolio construction. The primer concludes with a chapter on the case for investing in alternatives.

CAIA Level I CAIA Association, Mark J. P. Anson, Donald R. Chambers, Keith H. Black, Hossein B. Kazemi, 2012-04-03 The official study text for the Level I Chartered Alternative Investment Analyst (CAIA) exam The Chartered Alternative Investment Analyst (CAIA) designation is the financial industry's first and only globally recognized program that prepares professionals to deal with the ever-growing field of alternative investments. The second edition of CAIA Level I: An Introduction to Core Topics in Alternative Investments contains comprehensive insights on the alternative investment issues a potential Level I candidate would need to know about as they prepare for the exam. The information found here will help you build a solid foundation in alternative investment markets—with coverage of everything from the characteristics of various strategies within each alternative asset class to portfolio management concepts central to alternative investments. Uses investment analytics to examine each alternative asset class Examines quantitative techniques used by investment professionals Addresses the unique attributes associated with the alternative investment space Offers an online study guide outlining learning objectives and keywords This book is a must-have resource for anyone contemplating taking the CAIA Level I exam. So if you're ready to take your first step toward the CAIA charter, take the time to understand the insights offered here.

CFA Program Curriculum 2019 Level I Volumes 1-6 Box Set CFA Institute, 2018-08-27 Clear, concise instruction for all CFA Program Level I concepts and competencies for the 2019 exam The same official curricula that CFA Program candidates receive with program registration is now publicly available for purchase. CFA Institute promotes the highest standards of ethics, education, and professional excellence among investment professionals. The CFA Program curriculum guides you through the breadth of knowledge required to uphold these standards.

Perilous Bounty Tom Philpott, 2020-08-11 New York Times Book Review Editors' Choice An unsettling journey into the disaster-bound American food system, and an exploration of possible solutions, from leading food politics commentator and former farmer Tom Philpott. More than a decade after Michael Pollan's game-changing *The Omnivore's Dilemma* transformed the conversation about what we eat, a combination of global diet trends and corporate interests have put American agriculture into a state of quiet emergency, from dangerous drought in California--which grows more than 50 percent of the fruits and vegetables we eat--to catastrophic topsoil loss in the breadbasket heartland of

the United States. Whether or not we take heed, these urgent crises of industrial agriculture will define our future. In *Perilous Bounty*, veteran journalist and former farmer Tom Philpott explores and exposes the small handful of seed and pesticide corporations, investment funds, and magnates who benefit from the trends that imperil us, with on-the-ground dispatches featuring the scientists documenting the damage and the farmers and activists who are valiantly and inventively pushing back. Resource scarcity looms on the horizon, but rather than pointing us toward an inevitable doomsday, Philpott shows how the entire wayward ship of American agriculture could be routed away from its path to disaster. He profiles the farmers and communities in the nation's two key growing regions developing resilient, soil-building, water-smart farming practices, and readying for the climate shocks that are already upon us; and he explains how we can help move these methods from the margins to the mainstream.

Peasant Politics of the Twenty-First Century Marc Edelman, 2024-02-15 *Peasant Politics of the Twenty-First Century* illuminates the transnational agrarian movements that are remaking rural society and the world's food and agriculture systems. Marc Edelman explains how peasant movements are staking their claims from farmers' fields to massive protests around the world, shaping heated debates over peasants' rights and the very category of peasant within the agrarian organizations and in the United Nations. Edelman chronicles the rise of these movements, their objectives, and their alliances with environmental, human rights, women's, and food justice groups. The book scrutinizes high-profile activists and the forgotten genealogies and policy implications of foundational analytical frameworks like moral economy, and concepts, such as food sovereignty and civil society. *Peasant Politics of the Twenty-First Century* charts the struggle of agrarian movements in the face of land grabbing, counter agrarian reform, and a looming climate catastrophe, and celebrates engaged research from Central

America to the UN Human Rights Council in Geneva.

Fields of Gold Madeleine Fairbairn, 2020-07-15 *Fields of Gold* critically examines the history, ideas, and political struggles surrounding the financialization of farmland. In particular, Madeleine Fairbairn focuses on developments in two of the most popular investment locations, the US and Brazil, looking at the implications of financiers' acquisition of land and control over resources for rural livelihoods and economic justice. At the heart of *Fields of Gold* is a tension between efforts to transform farmland into a new financial asset class, and land's physical and social properties, which frequently obstruct that transformation. But what makes the book unique among the growing body of work on the global land grab is Fairbairn's interest in those acquiring land, rather than those affected by land acquisitions. Fairbairn's work sheds ethnographic light on the actors and relationships—from Iowa to Manhattan to São Paulo—that have helped to turn land into an attractive financial asset class. Thanks to generous funding from UC Santa Cruz, the ebook editions of this book are available as Open Access volumes from Cornell Open (cornellpress.cornell.edu/cornell-open) and other repositories.

Exotic Alternative Investments Kevin R.

Mirabile, 2021-01-05 This book evaluates investment opportunities such as life settlements, litigation funding, farmlands, royalties, weather derivatives, collectables and other unique asset classes. It provides an in-depth analysis of the returns, risks, opportunities and portfolio effects for anyone who wants to expand their investment horizons. This book is for individual investors, financial advisors, and academics who desire knowledge about investment products beyond just stocks and bonds or vanilla hedge funds, private equity and real estate investments. It provides a critical link to industry data and original research to support the case for adding exotic alternative investments to traditional portfolios.

The Handbook of Global Agricultural Markets L.

Nijs, 2014-06-23 This book is a one-stop reference for practitioners

and academics in finance, business and economics, providing a holistic reference to the international agriculture business. It takes a multidisciplinary approach, looking at the issues, opportunities and investable themes in the global agricultural space, combining research and practical tools.

Business Cycles Lars Tvede, 2006-05-26 During our lifetime we experience any number of business cycle crises which undermine our confidence and lead many to their ruin. We also experience the 'happy days' when our faith in the future becomes almost limitless, and when we forget that tides always turn again. So how can we better understand and predict these cycles? To answer these questions Lars Tvede takes us through a story that moves back in time to the Scottish gambler and financial genius, John Law, and then on to the distracted Adam Smith, the stockbroker Ricardo, the investment banker Thornton, the extrovert Schumpeter, the speculator Gould and many others to trace the theory and reality of business cycles, as it has evolved over 300 years. Gradually we reach the computer jugglers of the modern day who, with giant networks of equations, try to solve the same questions that have attracted the attention of classical economists throughout the centuries. Lars Tvede concludes this historical journey with a summary of what the core of the problem is and how modern understanding of business cycles can be used to forecast economic fluctuations. The final sections of the book provide detailed studies and explanations to of how stocks, bonds, hedge funds, private equity funds, gold, diamonds, exchange rates, real estate, commodities, art and collectibles, and numerous sub-sectors of some of these markets each behave over different categories of business cycles.

Forestland Investment Bin Mei, Michael L. Clutter, 2023-07-20 Forestland investment has surged in the past few decades as a result of land ownership change in the forestry industry. Timberland investment and management organizations and real estate investment trusts have bought up land and

resources that were divested by vertically integrated forest products companies. This book provides a seminal coverage of this seismic shift in the industry, exploring the philosophy, driving factors, valuation, theory, research, implementation, practice, and effects of forestland investment. Across 15 chapters the book reviews the history of forestland investment; discusses the optimal forest rotation; explains timberland appraisal; examines the return drivers of forestland; analyzes timberland index construction methods and results; prices timberland assets; reviews financial and real options; investigates real option values in forestland management; evaluates timber harvest contracts; examines new opportunities in the emerging woody bioenergy market; and eventually offers prospects on forestland investment in the future. It also discusses how forest carbon can be used as a nature-based climate solution. This book is essential reading for forestry business students and scholars, as well as practitioners and policymakers in the industry.

Ncreif Farmland And Timberland Indices Book Review: Unveiling the Magic of Language

In an electronic digital era where connections and knowledge reign supreme, the enchanting power of language has become much more apparent than ever. Its capability to stir emotions, provoke thought, and instigate transformation is really remarkable.
