National Climate Change Legal Frameworks in Asia and the Pacific Asian Development Bank, 2020-12-01 National legal and policy frameworks underpin international climate action because they are the backbone of domestic responses to the climate emergency. Unless they support global objectives, local climate action stalls. Concerned by sluggish national responses to climate change or injured by its impacts, citizens are filing lawsuits, making courts central to national climate governance. To adjudicate these lawsuits, courts require current information about their climate change legal and policy frameworks. This report provides holistic syntheses of the climate legal and policy frameworks of 32 countries in Asia and the Pacific and discusses key legislative trends and climate-relevant constitutional rights.

Modernisation Strategy for National Irrigation Systems in the Philippines Mona Liza F. Delos Reyes, 2017-07-12 The book presents documentary evidence of the insufficiency of rehabilitation works to close the gap between the irrigation service and actual area irrigated of publicly funded national irrigation systems in the Philippines. It outlines a methodology for formulating a modernisation plan for national irrigation systems with focus on the mostly ungauged, medium to small canal irrigation systems. The proposed methodology adaptively modified some known modernisation concepts and techniques and integrated them in a more holistic framework in the context of changing weather patterns and river flow regimes. It includes in-depth review of rehabilitation works; system diagnosis; revalidation of design assumptions on percolation and water supply; characterisation of system management, irrigation service and demand; and drawing up of options and a vision for the modernised irrigation systems. Central to the proposed modernisation strategy is the logical coherence among the design of physical structures, system operation and water supply so that improvements of irrigation service are possible. The book

discusses the development of the proposed methodology and demonstrates its utility in two case study irrigation systems.

Public Health Informatics and Information Systems J.A.

Magnuson,Brian E. Dixon,2020-07-17 This 3rd edition of a classic textbook examines the context and background of public health informatics, explores the technology and science underlying the field, discusses challenges and emerging solutions, reviews many key public health information systems, and includes practical, case-based studies to guide the reader through the topic. The editors have expanded the text into new areas that have become important since publication of the previous two editions due to changing technologies and needs in the field, as well as updating and augmenting much of the core content. The book contains learning objectives, overviews, future directions, and review questions to assist readers to engage with this vast topic. The Editors and their team of well-known contributors have built upon the foundation established by the previous editions to provide the reader with a comprehensive and forward-looking review of public health informatics. The breadth of material in Public Health Informatics and Information Systems, 3rd edition makes it suitable for both undergraduate and graduate coursework in public health informatics, enabling instructors to select chapters that best fit their students' needs.

Secrecy in the Sunshine Era Jason Ross Arnold,2014-08-25 A series of laws passed in the 1970s promised the nation unprecedented transparency in government, a veritable “sunshine era.” Though citizens enjoyed a new arsenal of secrecy-busting tools, officials developed a handy set of workarounds, from over classification to concealment, shredding, and burning. It is this dark side of the sunshine era that Jason Ross Arnold explores in the first comprehensive, comparative history of presidential resistance to the new legal regime, from Reagan-Bush to the first term of Obama-Biden. After examining what makes a necessary

and unnecessary secret, Arnold considers the causes of excessive secrecy, and why we observe variation across administrations. While some administrations deserve the scorn of critics for exceptional secrecy, the book shows excessive secrecy was a persistent problem well before 9/11, during Democratic and Republican administrations alike. Regardless of party, administrations have consistently worked to weaken the system's legal foundations. The book reveals episode after episode of evasive maneuvers, rule bending, clever rhetorical gambits, and downright defiance; an army of secrecy workers in a dizzying array of institutions labels all manner of documents "top secret," while other government workers and agencies manage to suppress information with a "sensitive but unclassified" designation. For example, the health effects of Agent Orange, and antibiotic-resistant bacteria leaking out of Midwestern hog farms are considered too "sensitive" for public consumption. These examples and many more document how vast the secrecy system has grown during the sunshine era. Rife with stories of vital scientific evidence withheld, justice eluded, legalities circumvented, and the public interest flouted, *Secrecy in the Sunshine Era* reveals how our information society has been kept in the dark in too many ways and for too long.

Chile International Monetary,International Monetary Fund. Fiscal Affairs Dept.,2023-01-19 At the request of the Chilean Minister of Finance, a team from the IMF Fiscal Affairs Department (FAD) conducted a capacity development mission in Santiago to evaluate options to improve green taxes in Chile, as part of a general tax reform presented to Congress in July 2022. The mission reviewed existing carbon taxes in the country, including revenue performance, coverage, and selected design issues. It also discussed changes to green taxes that will take effect in 2023, as well as new mitigation tools introduced in the Framework Law on Climate Change. The mission presented the

authorities with four different carbon pricing reform scenarios that would bring Chile closer to or in line with its Nationally Determined Contribution (NDC) for 2030, and the legally binding net-zero pledge for 2050. The mission also stated that additional measures under all proposed scenarios, such as improved energy efficiency policies, introduction of feebates schemes and faster adoption of low and zero emission sources for transport, power, and industry, would further contribute to achieve climate goals. The mission used the Climate Policy Assessment Tool (CPAT) to perform the analysis. The tool was subsequently transferred to the authorities through a four-day hands-on capacity development workshop, which was attended by officials from the Ministries of Finance, Energy, Environment, and Transportation.

Yasukuni Shrine Akiko Takenaka, 2015-07-31 This is the first extensive English-language study of Yasukuni Shrine as a war memorial. It explores the controversial shrine's role in waging war, promoting peace, honoring the dead, and, in particular, building Japan's modern national identity. It traces Yasukuni's history from its conceptualization in the final years of the Tokugawa period and Japan's wars of imperialism to the present. Author Akiko Takenaka departs from existing scholarship on Yasukuni by considering various themes important to the study of war and its legacies through a chronological and thematic survey of the shrine, emphasizing the spatial practices that took place both at the shrine and at regional sites associated with it over the last 150 years. Rather than treat Yasukuni as a single, unchanging ideological entity, she takes into account the social and political milieu, maps out gradual transformations in both its events and rituals, and explicates the ideas that the shrine symbolizes. Takenaka illuminates the ways the shrine's spaces were used during wartime, most notably in her reconstructions, based on primary sources, of visits by war-bereaved military families to the shrine during the Asia-Pacific War. She also traces important episodes in Yasukuni's postwar history, including the

filing of lawsuits against the shrine and recent attempts to reinvent it for the twenty-first century. Through a careful analysis of the shrine's history over one and a half centuries, her work views the making and unmaking of a modern militaristic Japan through the lens of Yasukuni Shrine. *Yasukuni Shrine: History, Memory, and Japan's Unending Postwar* is a skilled and innovative examination of modern and contemporary Japan's engagement with the critical issues of war, empire, and memory. It will be of particular interest to readers of Japanese history and culture as well as those who follow current affairs and foreign relations in East Asia. Its discussion of spatial practices in the life of monuments and the political use of images, media, and museum exhibits will find a welcome audience among those engaged in memory, visual culture, and media studies.

Parties, Political Finance, and Governance in Africa Rachel Sigman, 2023-03-31 Explains the strategies political parties use to extract money from the state and how these strategies shape government performance.

Democratic Backsliding in Africa? Leonardo R. Arriola, Lise Rakner, Nicolas van de Walle, 2023-03-31 This book advances ongoing debates on democratic backsliding and autocratization with specific reference to Africa. It offers a carefully developed theoretical framework and, unlike many previous studies, adds an international dimension to the analyses of autocratization processes on the continent.

Soldiers, Politicians, and Civilians David Pion-Berlin, Rafael Martínez, 2017-07-29 Are interactions between soldiers, politicians, and civilians improving? Every nation has to come to grips with achieving a more enduring harmony between government, the armed forces, and society if it aspires to strengthen its democracy. While there is an abundance of studies on civil-military affairs, few examine all three of these actors, let alone establish any standards with which to assess whether progress is being made. This ambitious book devises a novel

framework equipped with six dimensions, each of which opens a unique window into civil-military affairs, and which form a more integrated view of the subject. Those dimensions are accompanied by a set of benchmarks and metrics that assess progress and compare one country against another. The framework is applied to case studies of Argentina, Brazil, Chile, and Uruguay, with the conviction that insights could be gleaned that may be relevant elsewhere. Ultimately, by unpacking the civil-military relation into its various dimensions, this study has shed light on what it takes to transform what was once a politically-minded military into an organization dedicated to serving a democratic state and society.

Neighborhood Decline Ronald van Kempen, Gideon Bolt, Maarten van Ham, 2018-10-18 The global financial and economic crisis that hit the world since 2008 has affected the lives of many people all over the world and resulted in declining incomes, rising unemployment, foreclosures, forced residential moves, and cut-backs in government expenditure. The extent to which the crisis has affected urban neighborhoods and has led to rising intra-urban inequalities, has not yet received much attention. The implemented budget cuts and austerity programs of national and local governments are likely to have hit some neighborhoods more than others. The authors of this book, which come from a variety of countries and disciplines, show that the economic crisis has affected poor neighborhoods more severely than more affluent ones. The tendency of the state to retreat from these neighborhoods has negative consequences for their residents and may even nullify the investments that have been made in many poor neighborhoods in the recent past. This book was originally published as a special issue of *Urban Geography*.

Connecting Democracy Stephen Coleman, Peter M. Shane, 2011-12-16 An investigation of the effect of government online forums on democratic practices in the United States and

Europe. The global explosion of online activity is steadily transforming the relationship between government and the public. The first wave of change, “e-government,” enlisted the Internet to improve management and the delivery of services. More recently, “e-democracy” has aimed to enhance democracy itself using digital information and communication technology. One notable example of e-democratic practice is the government-sponsored (or government-authorized) online forum for public input on policymaking. This book investigates these “online consultations” and their effect on democratic practice in the United States and Europe, examining the potential of Internet-enabled policy forums to enrich democratic citizenship. The book first situates the online consultation phenomenon in a conceptual framework that takes into account the contemporary media environment and the flow of political communication; then offers a multifaceted look at the experience of online consultation participants in the United States, the United Kingdom, and France; and finally explores the legal architecture of U.S. and E. U. online consultation. As the contributors make clear, online consultations are not simply dialogues between citizens and government but constitute networked communications involving citizens, government, technicians, civil society organizations, and the media. The topics examined are especially relevant today, in light of the Obama administration's innovations in online citizen involvement.

Pension Reform Robert Holzmann, Edward E. Palmer, 2006
This book presents 25 state of the art papers on the conceptual foundations and issues surrounding Non-financial, or Notional, Defined Contribution (NDC), country implementation of NDC (Italy, Latvia, Poland, and Sweden) and case studies for countries where NDC is figured in the reform debate. This book is intended to be a handbook for academics and policy makers who want to become informed about what NDC is and to learn about the pros and cons of this attractive reform proposal.

A Modern Guide to National Urban Policies in Europe

Karsten Zimmermann, Valeria Fedeli, 2021-04-30 Written in a clear and concise style, this Modern Guide provide a timely overview and comparison of urban challenges and national urban policies in 13 European countries, addressing key issues such as housing, urban regeneration and climate change. A team of international contributors explore the gap between the rise of international urban agendas and variegated national urban policies, examining whether a more bespoke approach is better than the traditional 'one size fits all'.

Natural Burial Douglas Davies, Hannah Rumble, 2012-07-26

From the 1990s the British developed an interest in natural burial, also known as woodland, green, or ecological burial. Natural burial constitutes part of a long, historical legacy for British funeral innovation; from Victorian cemetery monuments and garden cemeteries through the birth and rise of cremation to the many things done with cremated remains. The book sets natural burial in the context of such creative dealing with death, grief, mourning, and the celebration of life. Themes from sociology and anthropology combine with psychological issues and theological ideas to show how human emotions take shape and help people consider their own death whilst also dealing with the death of those they love. The authors explore the variety of motivations for people to engage with natural burial and its popular appeal, using interviews with people having a relationship with one natural burial site created by the Church of England but open to all. They illustrate people's understandings of life and death in the sacred, secular and mixed worlds of modern Britain.

Social Security Programs Throughout the World Social Security Administration (U S), 2013-04 This publication provides a cross-national comparison of social security systems. It summarizes the five main social insurance programs: old age, disability, and survivors; sickness and maternity; work injury;

unemployment; and family allowances.

Local Agency and Peacebuilding S. Kappler,2014-01-30
Investigating local responses to EU peacebuilding, this book develops a relational and spatial concept of agency, helping to understand the processes in which peacebuilding actors engage and interact with one another. The focus on cultural actors reveals the contested nature of local agency and its potential to challenge institutional policies.
