Perspectives on Contemporary Ethnic Conflict Santosh C. Saha, 2006 The existing traditions of inquiry into ethnic conflict can be classified into four categories: essentialism, instrumentalism, constructivism, and institutionalism. All four traditions have a distinguished lineage, but none can really account for the worldwide spread of ethnic violence. We need to move from the local to the macro or global. This book, using methodology from sociology, history, and politics, will present the complexities of ethnic conflict in terms of linguistics, religion, territory, and tribes in various regions. These brilliant essays look at some of the most conflicted sites in the world, where ethnic violence has been created and played out: Burma, Indonesia, Rwanda, Burundi, Nigeria, the Sudan, Mexico, and Guyana. Divided into two parts, *Perspectives on Contemporary Ethnic Conflict* is a rich text for scholars of conflict studies, focusing on the sources and dynamics of ethnic violence and providing descriptions of ethnic conflict across the globe.

Capital Punishment: New Perspectives Mr Peter Hodgkinson, 2014-01-28 This collection asks questions about the received wisdom of the debate about capital punishment. Woven through the book, questions are asked of, and remedies proposed for, a raft of issues identified as having been overlooked in the traditional discourse. It provides a long overdue review of the disparate groups and strategies that lay claim to abolitionism. The authors argue that capital litigators should use their skills challenging the abuses not just of process, but of the conditions in which the condemned await their fate, namely prison conditions, education, leisure, visits, medical services, etc. In the aftermath of successful constitutional challenges it is the beneficiaries (arguably those who are considered successes, having been 'saved' from the death penalty and now serving living death penalties of one sort or another) who are suffering the cruel and inhumane alternative. Part I of the book offers a selection of diverse, nuanced examinations of death penalty phenomena, scrutinizing complexities frequently omitted from the narrative of academics and activists. It offers a challenging and comprehensive analysis of issues critical to the abolition debate. Part II offers examinations of countries usually absent from academic analysis to provide an understanding of the status of the debate locally, with opportunities for wider application.

Society, Organizations and the Brain: building towards a unified cognitive neuroscience perspective Carl Senior, Nick Lee, Sven Braeutigam, 2015-07-02 This e-book brings together scholars in both the neurosciences and organizational sciences who have adopted various approaches to study the cognitive mechanisms mediating the social behavior that we see within organizations. Such an approach has been termed by ourselves, and others, as 'organisational cognitive neuroscience'. In recent years there has been a veritable increase in studies that have explored the cognitive mechanisms driving such behaviors, and much progress has been made in understanding the neural underpinnings of processes such as financial exchange, risk awareness and even leadership. However, while these studies are informative and add to our understanding of human cognition they fall short of providing evidence-based recommendations for practice. Specifically, we address the broader issue of how the neuroscientific study of such core social behaviors can be used to improve the very way that we work. To address these gaps in our understanding the chapters in this book serve as a platform that allows scholars in both the neurosciences and the organizational sciences to highlight the work that spans across these two fields. The consolidation of these two fields also serves to highlight the utility of a singular organizational cognitive neuroscience. This is a fundamentally important outcome of the book as the application of neuroscience to address economically relevant behaviors has seen a variety of fields evolve in their own right, such as neuromarketing, neuroeconomics and so forth. The use of neuroscientific technologies, in particular fMRI, has indeed led to a bewildering (and somewhat suffocating) proliferation of new approaches, however, the speed of such developments demands that we must proceed carefully with such ventures or risk some fundamental mistakes. The book that you now hold will consolidate these new neuroscience based approaches and in doing so highlight the importance of this approach in helping us to understand human social behavior in general. Taken together the chapters provide a framework for scholars within the neurosciences who wish to explore the further

the opportunities that the study of organisational behavior may provide.

Chaos, Catastrophe, and Human Affairs Stephen J. Guastello, 2013-05-13 Whether talking about steering a wheelbarrow over rugged terrain or plotting the course of international relations, human performance systems involve change. Sometimes changes are subtle or evolutionary, sometimes they are catastrophic or revolutionary, and sometimes the changes are from periods of relative calm to periods of vibrant oscillations to periods of chaos. As a general rule, more complex systems are likely to produce more complex forms of change. Although social scientists have long acknowledged that change occurs and have considered ways to effect desirable change, the dynamical processes of change have been poorly understood in the past. This volume combines recent advances in mathematics and experimental design with the best available social science theories to produce a new, integrated, and compact theory of work, organizations, and social evolution. The domains of application extend from human decision-making processes to personnel selection and work motivation, work performance under conditions of stress, accident and health risk analysis, the development of social institutions and economic systems, creativity and innovation, organizational development and group dynamics, and political revolutions and war. Relative to other literature on nonlinear dynamical systems theory (NDS), this book is unique in that it integrates new developments in NDS with substantive psychological theory. It builds on many recent developments in organizational theory to show that nonlinear dynamics were often implicit in those works all along. The result is an entirely new way of viewing social events, understanding change processes, and asking questions about social systems. This book also contains much new empirical work and explains the newly developed methods for testing these new hypotheses.

Homosexuality FAQs - A Christian Perspective eBook Daniel Lim & Ian Toh, 2022-07-22 Homosexuality is not a recent phenomenon or a newly emerged issue. It exists since the ancient time despite the suppression by tradition and culture. It started to surface in recent years as technology and media have developed in racing speed. The society has become more open and acceptive to the topic; people started to reflect on the traditional thinking on human relationship; voices and discussions regarding homosexuality are getting common. The word "homosexuality" which merely means same sex relationship in the past has evolved to LGBTQ which covers Lesbians, Gays, Bisexuals, Transgenders and Queers nowadays. Although there are more discussions, do we truly understand LGBTQ? How should we discern the right and wrong? From Christian perspective, how should we see it and live with its community? Does the Bible provide us the answer? In the past, when religions are confronted by issues of homosexuality and LGBTQ, they would quickly jump into a conclusion such as "sin", "against the nature", "promiscuity", "unclean" etc. On one hand, religious communities subconsciously hold different attitudes and mindsets toward LGBTQ community; on the other hand, media coverage and celebrity influence exalt the revolution and advocacy of LGBTQ, so that people or religious bodies who hold different point of views may be labeled as "conservative",

“old-fashioned”, “traditional”, “conventional” etc. Over time, a gap has formed between LGBTQ and religious communities. Nevertheless, before we decide between the right and wrong, or give people a label of unrighteousness, could we jump out of the endless quarrel, opposition, or criticism? Could we adjust our perspective to understand, to observe and to contemplate the matter, so that we can better serve this community and walk with them with the love of Christ while we hold on to the law and principle of God? “Homosexuality FAQs – A Christian Perspective” is a wonderful guide for Churches. It helps readers to understand the issue more comprehensively, find out the viewpoints of the Bible, and learn how to reach out and serve LGBTQ community. This book clears doubts and confusions on LGBTQ through 10 questions in the first section. It tries to rebut general arguments from objective and scientific perspective. In the second section, it discusses LGBTQ from biblical perspective through 16 questions. Lastly, the editors laid out 6 questions to discuss the relation between Christians and the society on LGBTQ issue. Each answer begins with “quick response” to give readers the key concept, then followed by elaboration and more supplementary information. This structure is clear and easy to follow. What I appreciate the most is that it does not merely lay out a pile of data and evidence, but also shares ministry tips at the end of some answers, so that readers can break through the frame of merely knowledge, thinking and critique; and more important they can learn how to bridge the gap between the LGBTQ and us, counsel and serve LGBTQ community. Whether you want to know more the issue or feel the burden to serve the LGBTQ community, this book is worth to read. Computer Supported Collaborative Learning 2005 Timothy Koschmann, 2017-10-03 The Computer Supported Collaborative Learning (CSCL) conference has become an internationally-recognized forum for the exchange of research findings related to learning in the context of collaborative activity and the exploration of how such learning might be augmented through technology. This text is the proceedings from CSCL 2005 held in Taipei, Taiwan. This conference marked the 10th anniversary of the first CSCL Conference held at Indiana University in 1995. Subsequent meetings have been held at the University of Toronto, Stanford University, University of Maastricht (Netherlands), University of Colorado at Boulder, and the University of Bergen (Norway). Just as the first CSCL conference was instrumental in shaping the trajectory of the field in its first decade, the conference in Taipei will play an important role in consolidating an increasingly international and interdisciplinary community and defining the direction of the field for the next 10 years. This volume, and the papers from which it is comprised, will be an important resource for those active in this area of research and for others interested in fostering learning in settings of collaboration.
