Smart Cities at Play: Technology and Emerging Forms of Playfulness

Konstantinos Papangelis, Michael Saker, Catherine Jones, 2023-12-01 This book explores how smart cities enable new and playful ways for citizens to experience, inhabit and socialise within urban environments. It examines how the functionality of digital technologies within municipal settings can extend beyond environmental pragmatism and socio-economic concerns, to include playful approaches to urban spaces that co-constitute and reinvigorate the experience of place through location-based applications and games. Chapters highlight the varied ways the city, as both a conceptual and lived space, is changing because of this confluence of technologies. The book also considers the extent to which these transformations form an armature upon which more playful approaches to the urban domain are emerging, while exploring what effect these ludic formations might have on related understandings of sociability. *Smart Cities at Play: Technology and Emerging Forms of Playfulness* will be a key resource for scholars and researchers of information technology, urban planning and design, games and interactive media, human-centred and user-centred design, human centred interaction, digital geography and sociology. This book was originally published as a special issue of *Behaviour & Information Technology*.

Spatial Big Data, BIM and advanced GIS for Smart Transformation Sara Shirowzhan, Willie Tan, Samad M. E. Sepasgozar, 2020-12-02 This book covers a range of topics including selective technologies and algorithms that can potentially contribute to developing an intelligent environment and smarter cities. While the connectivity and efficiency of smart cities is important, the analysis of the impact of construction development and large projects in the city is crucial to decision and policy makers, before the project is approved. This book also presents an agenda for future investigations to address the need for advanced tools such as mobile scanners, Geospatial Artificial Intelligence, Unmanned Aerial Vehicles, Geospatial Augmented Reality apps, Light Detection, and Ranging in smart cities. Some of selected specific tools presented in this book are as a simulator for improving the smart parking practices by modelling drivers with activity plans, a bike optimization algorithm to increase the efficiency of bike stations, an agent-based model simulation of human mobility with the use of mobile phone datasets. In addition, this book describes the use of numerical methods to match the network demand and supply of bicycles, investigate the distribution of railways using different indicators, presents a novel algorithm of direction-aware continuous moving K-nearest neighbor queries in road networks, and presents an efficient staged evacuation planning algorithm for multi-exit buildings.

Location Based Services and TeleCartography Georg Gartner,William Cartwright,Michael P Peterson,2007-04-27 This book provides for the first time a general overview of research activities related to location and map-based services. These activities have emerged over the last years, especially around issues of positioning, spatial modelling, cartographic communication as well as in the fields of ubiquitous cartography, geo-pervasive services, user-centered modelling and geo-wiki activities. The innovative and contemporary character of these topics has lead to a great variety of interdisciplinary contributions, from academia to business, from computer science to geodesy. Topics cover an enormous range with heterogenous relationships to the main book issues. Whilst contemporary cartography aims at looking at new and efficient ways for communicating spatial information the development and availability of technologies like mobile networking, mobile devices or short-range sensors lead to interesting new possibilities for achieving this aim. By trying to make use of available technologies, cartography and a variety of related disciplines look specifically at user-centered and conte- aware system development, as well as new forms of supporting wayfinding and navigation systems. Contributions are provided in five main sections and they cover all of these aspects and give a picture of the new and expanding field of Location Based Services and TeleCartography. The Energy Year - Uganda 2022 The Energy Year, Now is the time. Uganda is the right destination for investment” H.E. Yoweri Kaguta Museveni, President of the Republic of Uganda The Energy Year Uganda 2022 is a special edition celebrating Uganda’s 60th anniversary of independence and covering the unlocking of the country’s hydrocarbons and power sectors. This edition has been produced in partnership with Uganda’s State House, the Ministry of Energy and Mineral Development, and the Petroleum Authority of Uganda. Following Uganda’s FID announcement in February 2022, The Energy Year Uganda 2022 analyses the latest developments and future prospects of the country’s nascent oil and gas sector, as well as its linkages with the power sector and wider economy, and portrays the projects championed by the key players of the Ugandan energy value chain. “Uganda is well on the road for its oil and gas resources to generate value for the country. The key drivers for the country’s value from these resources are through the participation of its people and its enterprises in the provision of goods and services, enhancing the linkages between oil and gas and other sectors of the economy, and the revenues to be generated when production of oil starts.” Ernest Rubondo, Executive Director, Petroleum Authority of Uganda The Energy Year Uganda 2022 also includes a map featuring Uganda’s planned oil and gas infrastructure and licences, as well as the East African Crude Oil Pipeline (EACOP) infrastructure. This second edition of The Energy Year’s Uganda series is the most updated in-depth analysis and comprehensive guide on the evolving Ugandan energy market – it underlines the key projects that will shape the Ugandan oil and gas value chain of the future, and identifies the country’s potential and untapped opportunities.
