It aims to draw the attention of policy makers and government officers responsible for NAP planning and processes generally, as well as fisheries and aquaculture officers at country level, specifically. It collates and analyses relevant information from fisheries and aquaculture to support the sector's ability to take part in national climate change adaptation planning processes.

**Hidden and Lesser-known Disordered Eating Behaviors in Medical and Psychiatric Conditions** Emilia Manzato, Massimo Cuzzolaro, Lorenzo Maria Donini, 2021-10-01 This book provides up-to-date information on lesser known eating disorders (EDs) and eating related disorders. EDs and eating-related

disorders include a highly heterogeneous group of syndromes and symptoms characterized by abnormal eating and weight control behaviors that can appear in all genders and ages. EDs can lead to high rates of morbidity and mortality, especially if they are misdiagnosed and untreated. The risk of underestimation is high for the lesser-known ED, and when unhealthy eating behaviors appear in unusual situations, such as some medical and psychiatric pathologies, adults and the elderly, sexual minorities etc. The volume examines EDs in specific populations (the elderly, males, infants and toddlers, sexual minorities, etc.). Several chapters explore in detail lesser-known EDs (anorexia athletica, avoidant/restrictive food intake disorder, chewing and spitting, EDs by proxy, EDs after bariatric surgery, muscle dysmorphia, night-eating syndrome, nocturnal sleep-related eating disorder, orthorexia nervosa, pica, rumination disorder, etc.). Finally, other chapters address features of unhealthy eating and weight control behaviors associated with medical diseases (achalasia, craniopharyngioma, cystic fibrosis, cyclic vomiting syndrome, diabetes, dysphagia, Kleine-Levin syndrome, Klinefelter syndrome, Parkinson disease, Prader-Willi syndrome, Turner syndrome, etc.) The book will be a valuable resource for all health professionals who work in the fields of psychiatry, clinical psychology, eating disorders, obesity, medicine, clinical nutrition, public health, and prevention, allowing them to broaden their understanding of these disorders, and to enhance their clinical ability to diagnose them.

Eating Disorders [2 volumes] Justine J. Reel, 2018-05-10 This encyclopedia offers a variety of resources for readers interested in learning more about eating disorders, including hundreds of reference entries, interviews, scholarly debates, and case studies. While many people may reflexively imagine an anorexic or bulimia teenage girl upon being asked to think about eating disorders, eating disorders are a form of mental illness that can take many forms and affect individuals of all genders, ages, and ethnic backgrounds. In fact, an estimated eight million people in the United States struggle with an eating disorder, making eating disorders one of the most prevalent forms of mental illness in America. This two-volume encyclopedia comprehensively examines eating disorders as the forms they can take; their causes and potential complications; and how they can best be treated and prevented. It also examines the influence had by cultural factors such as the fashion industry, television and movies, and social media. More than just a simple A-to-Z reference, *Eating Disorders: Understanding Causes, Controversies, and Treatment* also includes valuable features such as Q&A interviews with those affected by and working to combat eating disorders, case studies, scholarly essays that voice opinions in key debates, and a directory of resources for individuals seeking help.

**Disaster Archipelago** Maria Carinnes P. Alejandria, Will Smith, 2019-11-20  
Images of the devastation wreaked by typhoons, flooding, earthquakes and drought in the Philippines circulate globally as an important part of disaster discourses. This collection seeks to move beyond these simplistic representations of calamity by bringing together a group of Filipino and international scholars from diverse disciplinary backgrounds to grapple with the complex nature of disaster in the Philippines. Firmly grounded in the relationship between disaster and place, the volume's contributors confront the challenges of the Philippine nation's internal heterogeneity of language, ethnicity and class. In doing so, this book seeks to engage the specificities of place amid diversity, and explores two broad but interrelating avenues of investigation through case studies drawn from across the archipelago: How can environmental extremity in the Philippines help us understand disasters? How can disasters help us understand the Philippines?

**The Hidden Story of Eating Disorders** Sarah Leveté, 1900-01-01 Often appearing during the teen or young adult years, eating disorders are illnesses that cause serious disturbances to the diet, such as eating much

less or much more than is healthy. While eating disorders are treatable, if left untreated they can cause serious health complications and can even be life-threatening. Readers learn about the signs and symptoms of eating disorders and how they affect the body and mind. The author shares information on getting help and coping with an eating disorder, as well as developing a healthy body image. Recent news stories and statistics provide additional background on this complex problem.

**Unapologetic Eating** Alissa Rumsey, 2021-02-16 Most women have spent time dieting and trying to change themselves in order to fit into a mold—and a body—that is deemed socially acceptable. Yet it is dieting that is the problem: it disconnects us from our bodies wisdom and holds us back from living life to the fullest. The more time we spend trying to “fix” ourselves, the less time we have for the things that really matter. What presents as a problem about food is, in reality, much deeper and more complex. In her new book, *Unapologetic Eating: Make Peace with Food & Transform Your Life*, registered dietitian and certified intuitive eating counselor Alissa Rumsey helps you explore your history with food and your body and question societal expectations to get to the bottom of the complexity and find a clear path forward—forever free from diets! Using a relatable four-step approach, Rumsey teaches you how to reconnect with your body using your relationship with food as the entry point. She provides actionable tools you can use to confidently nourish yourself physically, mentally, and emotionally. You’ll learn how to

make peace with food, improve your body image, trust your intuition, and reclaim the space to eat and live unapologetically. Say goodbye to the constraints of dieting and hello to the freedom and empowerment to live your most fulfilling life.

**Disasters in the Philippines** Glenda Bonifacio, Roxanna Balbido Epe, 2023-04-28 Bringing together the voices of local scholars in the Philippines, this book offers critical insights into one of the world's most disaster-prone regions. The Asia-Pacific region is one of the most vulnerable regions in the world, with the effects of climate change contributing to rising sea levels and increasingly frequent typhoons and floods. Case studies in this book examine such disasters, including the aftermath of 2013 super typhoon Haiyan. Discussions are centered around four themes: women and empowerment, economics and recovery, community and resilience, and religion

and spirituality. Through its analysis, the book demonstrates the scopes, inequities, and inefficiencies of policies and responses, as well as forms of empowerment and resilience, in meeting challenges in disaster-afflicted communities in the Philippines. Its conclusions provide a more nuanced and grounded perspective of policies, practices, and approaches in the sociology of disasters today.

**Fostering Child and Adolescent Mental Health in the Classroom** Raymond J. Waller, 2006-03-13 Fostering Child and Adolescent Mental Health in the Classroom provides educators and school personnel with a thorough, readable guide to some of the most common mental health issues they are likely to confront in the classroom. Editor Raymond J. Waller offers pre-service and in-service educators strategic tools to help take the proper steps toward addressing the mental health issues of their students.

Eating Disorders Jessica R. Greene, 2014-08-14 It has been estimated that as many as 15 million people suffer or will suffer from anorexia and bulimia at some point in their lives. Additional statistics suggest that 25 million more suffer from binge eating and other related behaviors. The overwhelming majority of individuals who suffer from eating disorders are girls and young women between the ages of 12 and 25, but young males are not immune to these addictions—and the statistics grow more alarming every year. Eating disorders affect not only those who suffer from them, but family members and friends who feel powerless to help. In Eating Disorders: The Ultimate Teen Guide,

Jessica R. Greene offers hope for the young women and men who have engaged in these self-destructive urges. In this book, Greene examines the causes and varieties of teen eating disorders and offers advice on how to overcome them. The author looks at how eating disorders are defined, how common they are, and how they are tied into behavioral addictions. In addition to explaining how and why certain people suffer from these compulsions, this book looks at: Social and Cultural Pressures High Risk Groups Myths and Stereotypes Health Repercussions Methods of Prevention Intervention Strategies Treatment Options Recovery Intended to serve as a comprehensive guide, this book also includes a list of resources for teens and their parents. Drawing on input from experts in the field, as well as real-life stories, *Eating Disorders: The Ultimate Teen Guide* will help young adults who are struggling with this devastating affliction.
