The Engineering Handbook of Smart Technology for Aging, Disability, and Independence Abdelsalam Helal, Mounir Mokhtari, Bessam Abdulrazak, 2008-09-22 An advanced look at smart technology to promote the independence of the elderly and disabled. Ongoing research and advancements in technology are essential for the continuing independence of elderly and disabled persons. The *Engineering Handbook of Smart Technology for Aging, Disability, and Independence* provides a thorough analysis of these technologies and the needs of the elderly and disabled, including a breakdown of demographics, government spending, growth rate, and much more. Each chapter is written by an expert in his or her respective field, and gives readers unparalleled insight into the research and developments in a multitude of important areas, including: User-need analyses, classifications, and policies Assistive devices and systems for people with motor disabilities Assistive devices and systems for people with visual and hearing impairments Human-machine interaction and virtual reality Assistive robotics Technology for user mobility and object manipulation Smart homes as assistant environments A discussion of emerging standards and guidelines to build accessible devices, tools, and environments This book is an indispensable resource for researchers and professionals in computer science, rehabilitation science, and clinical engineering. It also serves as a valuable textbook for graduate students in the aforementioned fields.

Communication, Sport and Disability Michael S. Jeffress, 2016-12-05 Sports are ubiquitous in American society, and given their prominence in the culture, it is easy to understand how most youth in the United States face pressure to participate in organized sports. But what does this mean for the hundreds of thousands of Americans who live with one or more physical disabilities and, in particular, those in powered wheelchairs? Located at the intersection of sports and disability, this book tells the story of power soccer - the first competitive team sport specifically designed for electric wheelchair users. Beginning in France in the 1970s, today, over sixty teams compete within the United States Power Soccer Association (USPSA) and the sport is actively played in over thirty countries. Using ethnographic research conducted while attending practices, games, and social functions of teams from across the nation, Jeffress builds a strong case that electric wheelchair users deserve more opportunity to play sports. They deserve it because they need the same physical and psychosocial benefits from participation as their peers, who have full use of their arms and legs. It challenges the social constructions and barriers that currently stand in the way. Most importantly, this book tells the story of some amazing power soccer athletes. It is a moving, first-hand account of what power soccer means to them and the implications this has for society.

Handbook of Human-Computer Interaction M.G. Helander, T.K. Landauer, P.V. Prabhu, 1997-08-18 This completely revised edition, of the *Handbook of Human-Computer Interaction*, of which 80% of the content is new, reflects the developments in the field since the publication of the first edition in 1988. The handbook is concerned with principles for design of the Human-Computer Interface, and has both academic and practical purposes. It is intended to summarize the research and provide recommendations for how the information can be used by designers of computer systems. The volume may also be used as a reference for teaching and research. Professionals who are involved in design of HCI will find this volume indispensable, including: computer scientists, cognitive scientists, experimental psychologists, human factors professionals, interface designers, systems engineers, managers and executives working with systems development. Much of the information in the handbook may also be generalized to apply to areas outside the traditional field of HCI.

Field and Service Robotics Alexander Zelinsky, 2012-12-06 Joe Engelberger, the pioneer of the robotics industry, wrote in his 1989 book *Robotics*

in Service that the inspiration to write his book came as a reaction to an industry-sponsored forecast study of robot applications, which predicted that in 1995 applications of robotics outside factories - the traditional domain of industrial robots - would amount to less than 1% of total sales. Engelberger believed that this forecast was very wrong, and instead predicted that the non-industrial class of robot applications would become the largest class. Engelbergers prediction has yet to come to pass. However, he did correctly foresee the growth in non-traditional applications of robots. Robots are now beginning to march from the factories and into field and service applications. This book presents a selection of papers from the first major international conference dedicated to field and service applications of robotics. This selection includes papers from the leading research laboratories in the world together with papers from companies that are building and selling new and innovative robotic technology. It describes interesting aspects of robots in the field ranging from mining, agriculture, construction, cargo handling, subsea operations, removal of landmines, to terrestrial exploration. It also covers a diverse range of service applications, such as cleaning, propagating plants and aiding the elderly and handicapped, and gives considerable attention to the technology required to realise robust, reliable and safe robots.

The LEGO MINDSTORMS Robot Inventor Activity Book Daniele Benedettelli,2021-09-21 An introduction to the LEGO Mindstorms Robot Inventor Kit through seven engaging projects. With its amazing assortment of bricks, motors, and smart sensors, the LEGO® MINDSTORMS® Robot Inventor set opens the door to a physical-meets-digital world. The LEGO MINDSTORMS Robot Inventor Activity Book expands that world into an entire universe of incredibly fun, uniquely interactive robotic creations! Using the Robot Inventor set and a device that can run the companion app, you'll learn how to build bots beyond your imagination—from a magical monster that gobbles up paper and answers written questions, to a remote-controlled transformer car that you can drive, steer, and shape-shift into a walking humanoid robot at the press of a button. Author and MINDSTORMS master Daniele Benedettelli, a robotics expert, takes a project-based approach as he leads you through an increasingly sophisticated collection of his most captivating robot models, chapter by chapter. Each project features illustrated step-by-step building instructions, as well as detailed explanations on programming your robots through the MINDSTORMS App—no coding experience required. As you build and program an adorable pet turtle, an electric guitar that lets you shred out solos, a fully functional, whiz-bang pinball machine and more, you'll discover dozens of cool building and programming techniques to apply to your own LEGO creations, from working with gears and motors, to smoothing out sensor measurement errors, storing data in variables and lists, and beyond. By the end of this book, you'll have all the tools, talent and inspiration you need to invent your own LEGO MINDSTORMS robots.

Assistive Technology: From Research to Practice P. Encarnação,L. Azevedo,G.J. Gelderblom,2013-09-09 Assistive Technology (AT) is an umbrella term indicating any product or technology-based service that enables people of all ages with activity limitations in their daily life, education, work or leisure. It is a highly interdisciplinary field, encompassing research, development, manufacture, supply, provision and policy. This book presents the proceedings of the 12th biennial European conference of the Association for the Advancement of Assistive Technology in Europe, AAATE 2013, held in Vilamoura, Portugal, in September 2013. The full papers included here cover a diverse range of subjects, including: ageing, disability and technology; accessibility in Europe; ambient assisted living; AT and Cloud computing; communication access for all; monitoring and telecare; and user perspective, to name but a few. The aim of the AAATE conference is to promote a more effective dialogue between manufacturers, researchers, developers, professionals and end users, and this book will be of interest to all those directly or indirectly involved in the field of AT.

Medical Image Computing and Computer-Assisted Intervention - MICCAI 2011 Gabor Fichtinger,Anne Martel,Terry Peters,2011-09-02 The three-volume set LNCS 6891, 6892 and 6893 constitutes the refereed proceedings of the 14th International Conference on Medical Image Computing and Computer-Assisted Intervention, MICCAI 2011, held in Toronto, Canada, in September 2011. Based on rigorous peer reviews, the program committee carefully selected 251 revised papers from 819 submissions for presentation in three volumes. The first volume includes 86 papers organized in topical sections on robotics, localization and tracking and visualization, planning and image guidance, physical modeling and simulation, motion modeling and compensation, and segmentation and tracking in biological images.

Computers Helping People With Special Needs Klaus Miesenberger,2006-06-29 This book constitutes the refereed proceedings of the 10th International Conference on Computers Helping People with Special Needs, ICCHP 2006, held in Linz, Austria, in July 2006. The 193 revised contributions presented were carefully reviewed and selected for inclusion in the book. The papers evaluate how various fields in computer science can contribute to helping people with various kinds of disabilities and impairment.

Powerboat Design and Performance Dag Pike,2019-10-31 Set to become the bible for powerboat owners and operators for years to come, this long overdue analysis and review of modern powerboat design and operation explores how powerboats have developed, why, and how design impacts on control and performance. Every aspect of the powerboat's design is considered individually and as part of the whole. Different hull designs, including multihull and foiling craft, are assessed for their benefits and drawbacks. Engine types (whether petrol, diesel, electric or hybrid) and their influence on performance are examined and the nature and impact of different propulsion systems and driving controls is also discussed. All factors that influence operation are featured, from how to optimise performance in varied sea conditions, matching speed to sea state, as well as tackling various common and uncommon scenarios (from driving into an inlet to coping with tidal races and harbour manoeuvring) as well as issues relating to crew safety. Dag Pike is the world-renowned guru on powerboats. For this book he has attracted contributions from many of the top international powerboat designers, providing a wealth of expert knowledge and specialist insights about modern powerboats. The sum of their knowhow makes this book a gem of acquired knowledge, and as such will be essential for all powerboat owners, operators and designers, whether in the leisure, commercial or military sector, and it will help ensure all prospective owners get the right boat for their requirements.
