Research Advances in the Integration of Big Data and Smart Computing Mallick, Pradeep Kumar,2015-10-13 The volume, complexity, and irregularity of computational data in modern algorithms and simulations necessitates an unorthodox approach to computing. Understanding the facets and possibilities of soft computing algorithms is necessary for the accurate and timely processing of complex data. Research Advances in the Integration of Big Data and Smart Computing builds on the available literature in the realm of Big Data while providing further research opportunities in this dynamic field. This publication provides the resources necessary for technology developers, scientists, and policymakers to adopt and implement new paradigms in computational methods across the globe. The chapters in this publication advance the body of knowledge on soft computing techniques through topics such as transmission control protocol for mobile ad hoc networks, feature extraction, comparative analysis of filtering techniques, big data in economic policy, and advanced dimensionality reduction methods.

Nanotechnology in Nutraceuticals Shampa Sen,Yashwant Pathak,2016-10-14 While nutraceuticals were verified to be expedient, they often lack stability, bioavailability, and permeability, and nano-nutraceuticals are being developed to afford a solution to the problem. Nanotechnology in Nutraceuticals: Production to Consumption delves into the promises and prospects of the application of nanotechnology to nutraceuticals, addressing concepts, techniques, and production methods. Nutraceuticals retain less stability, efficacy, and bioavailability when entering the human body. To overcome such problems, nanotechnology shows

promise when applied as a tool to improve the quality and stability of nutraceuticals. This book discusses metallic nanoparticles and their applications in the food industry with specific application to nutraceuticals. It includes detailed discussion on potential functional properties of nutraceuticals with regard to antimicrobial activity, anti-inflammatory activity, and anti-cancer activity. Since nanoparticles can be toxic past a certain limit, implementing nanotechnology under thoughtful regulations is considered critical. The book addresses these issues with chapters covering the principles for the oversight of nanotechnologies and nanomaterials in nutraceuticals, the implications of regulatory requirements, the ethics and economics of nano-nutraceuticals, and consumer acceptance of nanotechnology based foods.

The Globalization of Wheat Marci Baranski, 2022-11-15 Nominee, 2023 Wallace Award, Agricultural History Society In *The Globalization of Wheat*, Marci R. Baranski explores Norman Borlaug's complicated legacy as godfather of the Green Revolution. Winner of the Nobel Peace Prize in 1970 for his role in fighting global hunger, Borlaug, an American agricultural scientist and plant breeder who worked for the Rockefeller Foundation, left a legacy that divides opinions even today. His high-yielding dwarf wheat varieties, known as miracle seeds, effectively doubled and tripled crop yields across the globe, from Kenya to India and Argentina to Mexico due to their wide adaptation. But these modern seeds also required expensive chemical fertilizers and irrigation, both of which were only available to wealthier farmers. Baranski argues that Borlaug's new technologies ultimately privileged wealthier farmers, despite assurances to politicians that these new crops would thrive in diverse geographies and benefit all farmers. As large-scale monocultures replaced traditional farming practices, these changes were codified into the Indian wheat research system, thus limiting attention to traditional practices and marginal environments. In the shadow of this legacy, and in the face of accelerating climate change, Baranski brings new light to Borlaug's role in a controversial concept in agricultural science.

Agriculture under Climate Change: Threats, Strategies and Policies V.V. Belavadi, N. Nataraja Karaba, N.R. Gangadharappa, 2017-02-13 Agriculture continues to be an important sector fuelling economic growth. Rapidly changing climate is already affecting the production of food and feed, industrial crops, livestock, and seafood. In developing countries like India, agriculture and allied sectors contribute significantly to the gross domestic product. Therefore, evolving strategies to sustain a stable growth of the farming sector is essential for feeding a growing population and poverty alleviation in the face of global climate change. It is crucial to carry out a comprehensive analysis of different aspects of climate change to effectively combat its negative impacts on food production systems and landscapes and reap its potential benefits in agricultural production. Research findings and recommendations on topics as diverse as climate change impacts, genetic enhancement of crops, options for adaptation to climate change, opportunities and challenges for sustainable food production systems have been compiled in this volume. Capacity building for climate resilient agriculture and agriculture policy and planning is equally important to face future challenges. This book makes a compelling effort to address these major issues arising from climate change from an Indian perspective. The important and often conflicting

issues in climate change impacts, adaptations and mitigations strategies are brought in to focus and a critical summary of the state-of-art in climate smart agriculture is presented for teachers, researchers and policy makers engaged with climate change and agriculture in the tropical arid and semi-arid regions of Asia and Africa.

Explainable Machine Learning Models and Architectures Suman Lata Tripathi, Mufti Mahmud, 2023-10-03 **EXPLAINABLE MACHINE LEARNING MODELS AND ARCHITECTURES** This cutting-edge new volume covers the hardware architecture implementation, the software implementation approach, and the efficient hardware of machine learning applications. Machine learning and deep learning modules are now an integral part of many smart and automated systems where signal processing is performed at different levels. Signal processing in the form of text, images, or video needs large data computational operations at the desired data rate and accuracy. Large data requires more use of integrated circuit (IC) area with embedded bulk memories that further lead to more IC area. Trade-offs between power consumption, delay and IC area are always a concern of designers and researchers. New hardware architectures and accelerators are needed to explore and experiment with efficient machine-learning models. Many real-time applications like the processing of biomedical data in healthcare, smart transportation, satellite image analysis, and IoT-enabled systems have a lot of scope for improvements in terms of accuracy, speed, computational powers, and overall power consumption. This book deals with the efficient machine and deep learning models that support high-speed processors with reconfigurable architectures like graphic processing units (GPUs) and field programmable gate arrays (FPGAs), or any hybrid system. Whether for the veteran engineer or scientist working in the field or laboratory, or the student or academic, this is a must-have for any library.

Oxygen Transport to Tissue XIX David T. Delpy, 2013-11-11 In 1996, for its 24th scientific meeting, the International Society on Oxygen Transport to Tissue made its third visit to the United Kingdom. The previous two meetings were held in Cambridge in 1977 and 1986, but this was the first meeting to be held north of the border in Scotland. It was attended by some 186 delegates and accompanying persons and there were 128 presentations. The venue was the West Park Centre, the University of Dundee's residential conference centre, and ISOTT was only the second major meeting to be held there using the new Villa accommodation. Dundee's slogan is City of Discovery since it became the permanent home of the Royal Research Ship Discovery which was built in the city and was used by Captain Scott on his first expedition to the Antarctic. The ISOTT meeting also fulfilled its promise of being a meeting of discovery with sessions on all aspects of oxygen transport to tissue. The inclusion of a session on oxygen transport in vascular disease reflected the interests of the local participants. All of the manuscripts were reviewed both for their scientific and editorial acceptability and in some 50% of cases, revisions were requested from the authors. Some manuscripts were ultimately rejected. However, in view of the importance of producing the Proceedings as quickly as possible it is possible that some minor errors may have slipped through, for which the editors apologise.

Doing Diaspora Thusinta Somalingam, 2017-01-18 Thusinta Somalingam bietet in der vorliegenden Studie eine neue Perspektive auf den Bereich Bildung, die sich von nationalstaatlichen Orientierungen löst und ihren Blick auf grenzüberschreitende Bildungsarbeit richtet. Auf der Grundlage eines vielfältigen empirischen Datensatzes erarbeitet die Autorin anhand des Fallbeispiels der Tamil Diaspora, dass transnationale (Bildungs-)Räume nicht zwangsläufig national(staatliche) Aspekte wie Sprach- und Nationalbewusstsein relativieren, sondern durchaus auch zur Verstärkung und Rekonstruktion bestehender

nationaler Strukturen und Tendenzen beitragen können. Die Arbeit von Thusinta Somalingam gibt neue Impulse zur Erforschung von grenzüberschreitenden Bildungsräumen und bietet neue Perspektiven für die Transnationalitäts- sowie die Diasporaforschung.

portal des vergessens ebook bellem stephan r amazon de - Apr 01 2022

web portal des vergessens ist das mittlerweile fünfte buch von stephan bellem und hat diesmal nichts mit kanduras zu tun das buch ist eine gesunde mischung aus klassischer fantasygeschichte und der welt des 21 jahrhunderts die heikle gratwanderung zwischen den dimensionen bzw zeitepochen ist dem autor bestens gelungen
