 [2] **Flickering Light** Christoph Ribbat,2013-07-15 Without neon, Las Vegas might still be a sleepy desert town in Nevada and Times Square merely another busy intersection in New York City. Transformed by the installation of these brightly colored signs, these destinations are now world-famous, representing the vibrant heart of popular culture. But for some, neon lighting represents the worst of commercialism. Energized by the conflicting love and hatred people have for neon, Flickering Light explores its technological and intellectual history, from the discovery of the noble gas in late nineteenth-century London to its fading popularity today. Christoph Ribbat follows writers, artists, and musicians—from cultural critic Theodor Adorno, British rock band The Verve, and artist Tracey Emin to Vladimir Nabokov, Langston Hughes, and American country singers—through the neon cities in Europe, America, and Asia, demonstrating how they turned these blinking lights and letters into metaphors of the modern era. He examines how gifted craftsmen carefully sculpted neon advertisements, introducing elegance to modern metropolises during neon’s heyday between the wars followed by its subsequent popularity in Las Vegas during the 1950s and ’60s. Ribbat ends with a melancholy discussion of neon’s decline, describing how these glowing signs and installations came to be seen as dated and characteristic of run-down neighborhoods. From elaborate neon lighting displays to neglected diner signs with unlit letters, Flickering Light tells the engrossing story of how a glowing tube of gas took over the world—and faded almost as quickly as it arrived.

 [4] *The Journal of Midshipman Chaplin* Tatiana S. Fedorova,Viktor G. Sedov,Peter Ulf Moller,Carol L. Urness,2010-09-13 The First Kamchatka Expedition is a classic among the voyages of discovery, being famous for the discovery of the Bering Strait between Asia and North America. Chaplin’s journal holds a special place among the documents of the expedition. It is the only official document that preserves its history in detail, day by day, from the author’s departure from St. Petersburg on 24 January 1725 until his return to the Russian capital on 1 March 1730. The publication includes introductory articles and commentary by leading specialists, a glossary, indexes, and maps.

 [7] **A Golden Needle and A Silver Bullet** Marjory Sorrell Rockwell,2022-03-23 Hard to believe this is the 17th Quilters Club cozy mystery by Marjory Sorrell Rockwell. Following the adventures of the denizens of Caruthers Corners, Indiana, as these amateur sleuths solve puzzlers about quilts and crooks and crazies is as addictive as a slice of watermelon upside down cake. -Hollis George, noted editor and anthologist This time around the Quilters Club — Maddy Madison, along with her friends Lizzie, Cookie, and Bootsie — are on the trail of a fragment of the world’s oldest quilt, the Tristan and Isolde Quilt. They are following a tip by the ghost of a Caruthers Corners Town Founder. Does it matter that the ghost is part of a fortune telling scam by a pair of con artists? Maddy’s grandchildren — Aggie and N’yen — and their pal Sissy join the hunt. And they get a little help from that long-ago exchange student Leslie Ann Holmes, now married into British royalty. Yes, the gang’s all here!

 [11] **Physics with Multiply Charged Ions** Dieter Liesen,2013-06-29 Multiply charged ions have always been in the focus of atomic physics, astrophysics, plasma physics, and theoretical physics. Within the last few years, strong progress has been achieved in the development of ion sources, ion storage rings, ion traps, and methods to cool ions. As a consequence, nowadays, experiments with ensembles of multiply charged ions of brilliant quality are performed in many laboratories. The broad spectrum of the experiments demonstrates that these ions are an extremely versatile tool for investigations in pure and applied physics. It was the aim of this ASI to bring together scientists working in different fields of research with multiply charged ions in order to get an overview of the state of the art, to sound out possibilities for fruitful cooperations, and to discuss perspectives for the future. Accordingly, the programme of the ASI reached from established areas like QED calculations, weak interactions, x-ray astronomy, x-ray lasers, multi-photon excitation, heavy-ion induced fusion, and ion-surface interactions up to the very recently opened areas like bound-beta decay, laser and x-ray spectroscopy, and spectrometry of ions in rings and traps, and the interaction of highly charged ions with biological cells. Impressive progress in nearly all of the fields could be reported during the meeting which is documented by the contributions to this volume. The theoretical understanding of QED and correlation effects in few-electron heavy ions is rapidly developing.

 [13] **New York Neon** Thomas E Rinaldi,2012-11-27 A brilliant visual tour and history of that iconic element of the cityscape: the neon sign. Treating New York City as an open-air museum, Thomas E. Rinaldi captures the brilliant glow of surviving early- and mid-twentieth-century neon signs, those iconic elements of the cityscape now in danger of disappearing. This visual tour features two hundred signs, identified by location, with information on their manufacture, date of creation, and the businesses that commissioned them. In a generously illustrated introduction, drawing on documents including rare period trade publications, Rinaldi recounts the development of signage and the technological evolution of neon and examines its role in the streets of New York, in America’s cultural identity, and in our collective consciousness. New Yorkers and visitors to the city, neon-sign enthusiasts, and those interested in signs and historic advertising generally, as well as design professionals, serious historians, and casual students of the city, will want this colorful book, which comes at a critical moment when the disappearance of the original signs has inspired a growing interest in neon.
