IBM FlashSystem 5200 Product Guide Aldo Araujo Fonseca,Corne Lottering,Jon Herd,Leandro Torolho,Sandro De Santis,Vasfi Gucer,IBM Redbooks,2022-07-22 This IBM® Redbooks® Product Guide publication describes the IBM FlashSystem® 5200 solution, which is a next-generation IBM FlashSystem control enclosure. It is an NVMe end-to-end platform that is targeted at the entry and midrange market and delivers the full capabilities of IBM FlashCore® technology. It also provides a rich set of software-defined storage (SDS) features that are delivered by IBM Spectrum® Virtualize, including the following features: Data reduction and deduplication Dynamic tiering Thin provisioning Snapshots Cloning Replication Data copy services Transparent Cloud Tiering IBM HyperSwap® including 3-site replication for high availability (HA) Scale-out and scale-up configurations further enhance capacity and throughput for better availability. The IBM FlashSystem 5200 is a high-performance storage solution that is based on a revolutionary 1U form factor. It consists of 12 NVMe Flash Devices in a 1U storage enclosure drawer with full redundant canister components and no single point of failure. It is designed for businesses of all sizes, including small, remote, branch offices and regional clients. It is a smarter, self-optimizing solution that requires less management, which enables organizations to overcome their storage challenges. Flash has come of age and price point reductions mean that lower parts of the storage market are seeing the value of moving over to flash and NVMe--based solutions. The IBM FlashSystem 5200 advances this transition by providing incredibly dense tiers of flash in a more affordable package. With the benefit of IBM FlashCore Module compression and new QLC flash-based technology becoming available, a compelling argument exists to move away from Nearline SAS storage and on to NVMe. With the release of IBM FlashSystem 5200 Software V8.4, extra functions and features are available, including support for new Distributed RAID1 (DRAID1) features, GUI enhancements, Redirect-on-write for Data Reduction Pool (DRP) snapshots, and 3-site replication capabilities. This book is aimed at pre-sales and post-sales technical support and marketing and storage administrators.

Lead Yourself First Raymond M. Kethledge,Michael S. Erwin,2017-06-13 A guide to the role of solitude in good leadership, including profiles of historical and contemporary figures who have used solitude to lead with courage, creativity, and strength. Throughout history, leaders have used solitude as a matter of course. Eisenhower wrote memoranda to himself during World War II as a way to think through complex problems. Martin Luther King found moral courage while sitting alone at his kitchen table one night during the Montgomery bus boycott. Jane Goodall used her intuition in the jungles of Central Africa while learning how to approach chimps. Solitude is a state of mind, a space where you can focus on your own thoughts without distraction, with a power to bring mind and soul together in clear-eyed conviction. Like a great wave that saturates everything in its path, however, handheld devices and other media now leave us awash with the thoughts of others. We are losing solitude without even realizing it. To find solitude today, a leader must make a conscious effort. This book explains why the effort is worthwhile and how to make it. Through gripping historical accounts and firsthand interviews with a wide range of contemporary leaders, Raymond Kethledge (a federal court of appeals judge) and Michael Erwin (a West Pointer and three-tour combat veteran) show how solitude can enhance clarity, spur creativity, sustain emotional balance, and generate the moral courage necessary to overcome adversity and criticism. Anyone who leads anyone-including oneself-can benefit from solitude. With a foreword by Jim Collins (author of the bestseller Good to Great), Lead Yourself First is a rallying cry to reclaim solitude-and all the benefits, both practical and sublime, that come with it.

How to Castrate a Bull Dave Hitz,2009-01-20 Dave Hitz likes to solve fun problems. He didn't set out to be a Silicon Valley icon, a business visionary, or even a billionaire. But he became all three. It turns out that business is a mosaic of interesting puzzles like managing risk, developing and reversing strategies, and looking into the future by deconstructing the past. As a founder of NetApp, a data storage firm that began as an idea scribbled on a placemat and now takes in \$4 billion a year, Hitz has seen his company go through every major cycle in business—from the Jack-of-All-Trades mentality of a start-up, through the tumultuous period of the IPO and the dot-com bust, and finally to a mature enterprise company. NetApp is one of the fastest-growing computer companies ever, and for six years in a row it has been on Fortune magazine's list of Best Companies to Work For. Not bad for a high school dropout who began his business career selling his blood for money and typing the names of diseases onto index cards. With colorful examples and anecdotes, *How to Castrate a Bull* is a story for everyone interested in understanding business, the reasons why companies succeed and fail, and how powerful lessons often come from strange and unexpected places. Dave Hitz co-founded NetApp in 1992 with James Lau and Michael Malcolm. He served as a programmer, marketing evangelist, technical architect, and vice president of engineering. Presently, he is responsible for future strategy and direction for the company. Before his career in Silicon Valley, Dave worked as a cowboy, where he got valuable management experience by herding, branding, and castrating cattle.
