Die Wachstumsformel Oliver Wegner, 2018-03-26
Gesundes Wachstum von Unternehmen hat nichts allein mit Größer-Werden zu tun. Es beginnt stets im Inneren des Unternehmens, und zwar mit den Menschen. Wachsen kann jede Organisation nur dann, wenn Mitarbeiter ebenso wie die Führungskräfte und der Unternehmer selbst sich weiterentwickeln und dazu den entsprechenden Raum und die Zeit bekommen. Deshalb hat Oliver Wegner für gesundes Wachstum eine Formel entwickelt. Die Formel trägt der Tatsache Rechnung, dass die Menschen im Unternehmen der maßgebliche, aber leider häufig übersehene Multiplikationsfaktor in der Wachstumsgleichung sind. Eine Firma wird nur dann wachsen, wenn die Mitarbeiter mitwachsen, wenn sie an Profil, an Verantwortung, an Kompetenzen und Fähigkeiten gewinnen. Veränderungen an der Organisationsstruktur oder der Führungskultur allein bewirken nichts, weil ohne Veränderung der Menschen nur an äußeren Stellhebeln gedreht wird. Eine besondere Bedeutung kommt dem persönlichen Wachstum des Unternehmers selbst zu: Es wirkt sich im positiven Fall sogar potenzierend auf das Wachstum der gesamten Firma aus, im negativen Fall jedoch hemmend bis zur Insolvenz. In seinem Buch überwindet Oliver Wegner konventionelle Vorstellungen und Ansichten. Er will weniger methodisches Wissen vermitteln, als Impulse und Denkanstöße geben sowie neue, ungewöhnliche Perspektiven eröffnen, so dass der Leser seinen Blick für echtes und falsches (= aufgeblähtes) Wachstum schult. Wegner unterscheidet echte von falschen Messgrößen und gibt zahlreiche Beispiele für gesundes und krankes Wachstum, indem er den Blick auf wenig beachtete Zusammenhänge lenkt. Das Buch zeigt praxisnah, wo Unternehmer und Führungskräfte den Hebel ansetzen können, um ein gesundes Wachstum in ihrer Firma oder ihrem Bereich zu generieren. Zahlreiche Best-Practice-Beispiele von Unternehmen verschiedener Branchen veranschaulichen die Zusammenhänge.

China Networks Jens Damm, Mechthild Leutner, 2009
Networks ranging from village level to transnational level have always played a crucial role in Chinese society. The contributors to this volume aim to trace the interaction between various networks which have existed from the 19th century to the present day. The articles deal with theoretical concepts, historical examples, such as non-state responses to the North China Famine (1876 - 1879), the role of missionaries in the modernization of China and disaster management, including recent inter-ethnic business competition in Hong Kong, Han settlers in Xinjiang, temple festivals in Macau and urban migrants' social networks in today's China. By drawing on new material and theoretical frameworks, these studies shed fresh light on the ways in which various forms of networks have shaped Chinese society, while at the same time questioning traditional and rigid perspectives of Chinese society based solely on networks and guanxi.

Translating Religion Michael DeJonge,Christiane Tietz,2015-06-26 Translating Religion advances thinking about translation as a critical category in religious studies, combining theoretical reflection about processes of translation in religion with focused case studies that are international, interdisciplinary, and interreligious. By operating with broad conceptions of both religion and translation, this volume makes clear that processes of translation, broadly construed, are everywhere in both religious life and the study of religion; at the same time, the theory and practice of translation and the advancement of translation studies as a field has developed in the context of concerns about the possibility and propriety of translating religious texts. The nature of religions as living historical traditions depends on the translation of religion from the past into the present. Interreligious dialogue and the comparative study of religion require the translation of religion from one tradition to another. Understanding the historical diffusion of the world's religions requires coming to terms with the success and failure of translating a religion from one cultural context into another. Contributors ask what it means to translate religion, both textually and conceptually, and how the translation of religious content might differ from the translation of other aspects of human culture. This volume proposes that questions on the nature of translation find particularly acute expression in the domains of religion, and argues that theoretical approaches from translation studies can be fruitfully brought to bear on contemporary religious studies.
