Is Mobile Money Part of Money? Understanding the Trends and Measurement Ms. Kazuko Shirono, Esha Chhabra, Ms. Bidisha Das, Ms. Yingjie Fan, Mr. Hector Carcel Villanova, 2021-07 The rapid uptake of mobile money in recent years has generated new data needs and growing interest in understanding its impact on broad money. This paper reviews mobile money trends using mobile money data from the Financial Access Survey (FAS) and examines the statistical treatment of mobile money under the IMF's Monetary and Financial Statistics (MFS) framework. MFS guidance

is straightforward in most cases, as many jurisdictions have adopted regulations which ensure that mobile money is captured in the banking system and thus in the calculation of broad money. However, in cases where mobile network operators (MNOs) act as niche financial intermediaries outside the banking regulatory perimeter and are allowed to invest their customer funds in sovereign securities and other permitted assets, mobile money liabilities may remain outside the banking system as well as monetary statistics. In that case, information on mobile money liabilities need to be collected directly from MNOs to account for mobile money as part of broad money.

Protecting Mobile Money against Financial Crimes Pierre-Laurent Chatain,Andrew Zerzan,Wameek Noor,Najah Dannaoui,Louis de Koker,2011-02-24 Mobile Money is a booming industry in an increasing number of countries worldwide. The project results from increased demand for guidance and technical assistance from governments after the 2008 publication of an exploratory paper, Integrity in Mobile Phone Financial Services, which discussed mobile money and the application of international anti-money laundering (AML) and combating the financing of terrorism (CFT) standards. For most, how to craft a regulatory regime that expands access to financial services to the poor through the development of mobile phone financial services, but compliant with AML/CFT standards remains elusive. Specific AML/CFT regulations related to mobile money have not been issued in many jurisdictions, mainly due to the lack of awareness of the risks these services can pose if the right controls are not in place. Because the international standards for AML/CFT, the Financial Action Task Force s 40 + 9 Recommendations were designed and issued well before mobile money technology and business models became prevalent, even developed countries have begun to face challenges with their regulation. The project team aims to provide practical guidance to jurisdictions and the Industry on how to draft regulations and internal guidelines that allow them to comply with AML/CFT standards with enough flexibility for mobile money to thrive. Specifically, the paper (1) takes stock of new AML/CFT regulations and practices relevant to Mobile money, (2) design guidelines for drafting AML/CFT regulations that cover mobile money and (3) propose examples of best practices for the Industry to include AML/CFT in their own business model.
