Terrorist Threats in North Africa from a NATO Perspective János

Tomolya, Larry D. White, 2015 According to the editors of this book, North Africa has become a hotbed of terrorist activity in recent years, as demonstrated by several events in the region. Representing, as it does, a potential threat to NATO's southern flank, this area can no longer be ignored, they say. This book presents the proceedings of the NATO Centre of Excellence, Defence Against Terrorism (COE-DAT) Advanced Research Workshop entitled 'The Terrorist Threat in North Africa from a NATO Perspective', held in Ankara, Turkey, in the November 2013. Subjects covered include the changing nature of North African terrorism; the rise of Al Qaeda in North Africa; financing terrorism in North Africa; the legal framework of military operations against terrorism in North Africa and the relationship between international terrorism and terrorism in North Africa, among others. Also included in the book is the keynote address given by Prof. Yonah Alexander of the Inter-University Center for Terrorism Studies and entitled 'Terrorism in North Africa and the Sahel: Threats and Responses'. The book provides insights to further the understanding of terrorism in North Africa, and will be of interest to all those involved in the development of counterterrorism policies to combat this threat.

Challenges of Democracy in the European Union and Its Neighbors Aylin Ünver

Noi, Sasha Toperich, 2016 Democracy, which protects freedom and citizens' rights more than any other regime, is in crisis today. In recent years, it has become exhausted in its European center and along its periphery. Citizen trust of the European Union's democratic institutions has been fading. The EU's normative power -- its ability to spread its norms and values to other states -- and its soft power -- its ability to attract others to its point of view -- are now seen as less likely to achieve the expected goals of spreading democracy within EU countries and creating a ring of well-governed states in neighboring countries. Democracy and its institutions need to adapt to these new challenges. Respected authors and experts offer fresh and creative answers to the challenges of democracy in the European Union and its neighboring countries by offering a transatlantic perspective.

History of Cherokee County, Kansas and Representative Citizens Nathaniel

Third Way Reforms Jingjing Huo, 2009-04-27

This book examines the transformation of contemporary social democracy through the concept of third way reforms. It proposes a set of theories about the possibility for continuing social democratic ideological adaptation, for ideologies to overcome institutional constraints in triggering path-breaking innovations, and for social democracy to bridge the insider-outsider divide. Empirically, the book utilizes these theories to account for social democratic welfare state and labor market reforms in nine OECD countries after the end of the Golden Age. Based on the logic of public evils, the book proposes that the ideologically contested nature of institutions provides incentives for institutional innovation. Social democratic ideology shapes the fundamental characteristics and content of the third way policy paradigm, and the paradigm's practical implementation continues to be path-dependent on historical institutional settings.

Street Design Manual, 2013 The Street Design Manual is New York City's comprehensive resource on street design guidelines, policies, and processes. It aggregates a broad range of resources--from nationally recognized engineering and design guidelines and standards to federal, state, and local laws, rules, and regulations--to provide information on treatments that are allowed and encouraged on New York City streets. The Manual's intended

audience is diverse, consisting of design professionals, city agencies and officials, community groups, and private developers.--Introduction.

Inventors at Work, with Chapters on Discovery George Iles, 2022-06-02
Inventors at Work, with Chapters on Discovery by George Iles is a study about the history of inventions. Excerpt: The equipment and the talents for invention and discovery are now touched upon. First, knowledge, especially as the fruit of disinterested inquiry; Observation, as exercised by trained intelligence calling to its aid the best modern instruments; Experiment, as an educated passion for building on original lines. Then, in the mechanical field, we bestow a few glances at self-acting machines, at the simplicity of design which makes for the economy not only in building but in operation and maintenance.
