Strategies to Support Struggling Adolescent Readers, Grades 6-12 Katherine S. McKnight, Lisa

Hollihan Allen, 2018-03-02 When students are in elementary school, a teacher who has expertise in teaching the fundamentals of reading instructs them. At the middle and high school level that stops – and the timing could not be worse. The literacy demands increase exponentially, yet typically schools do not teach adolescents how to successfully read the increasingly difficult materials they encounter throughout their day. As the rigor increases in their classes, student coping skills become less effective. Consequently, the achievement gap becomes wider and more difficult to close during the adolescent years. When it comes time to prescribe an intervention, middle and high school teachers are hitting a wall. Decoding and comprehension materials are often presented at an elementary level. The students feel bad enough that they struggle with reading; assigned ‘baby work’ increases the stigma. This book addresses the need for 6-12 teachers to have appropriate literacy intervention materials to use with struggling adolescent readers. This book will also help teachers learn how to

support any adolescent reader—struggling or not—when they encounter challenging text. The book features two strands: decoding and comprehension. Each strand contains lessons, materials, a difficulty dial, tips for implementation and student samples.

The New Scramble for Africa Pádraig Carmody,2013-04-26 Once marginalized in the world economy, the past decade has seen Africa emerge as a major global supplier of crucial raw materials like oil, uranium and coltan. With its share of world trade and investment now rising and the availability of natural resources falling, the continent finds itself at the centre of a battle to gain access to and control of its valuable natural assets. China's role in Africa has loomed particularly large in recent years, but there is now a new scramble taking place involving a wider range of established and emerging economic powers from the EU and US to Japan, Brazil and Russia. This book explores the nature of resource and market competition in Africa and the strategies adopted by the different actors involved - be they world powers or small companies. Focusing on key commodities, the book

examines the dynamics of the new scramble and the impact of current investment and competition on people, the environment, and political and economic development on the continent. New theories, particularly the idea of Chinese flexigemony are developed to explain how resources and markets are accessed. While resource access is often the primary motive for increased engagement, the continent also offers a growing market for low-priced goods from Asia and Asian-owned companies. Individual chapters explore old and new economic power interests in Africa; oil, minerals, timber, biofuels, food and fisheries; and the nature and impacts of Asian investment in manufacturing and other sectors. The New Scramble for Africa will be essential reading for students of African studies, international relations, and resource politics as well as anyone interested in current affairs.

My Purple Scented Novel Ian McEwan,2018-06-19 A jewel of a short story from the bestselling, award-winning author of *Atonement*—“My Purple Scented Novel” follows the perfect crime of literary betrayal, scrupulously wrought yet unscrupulously executed. Published to celebrate Ian McEwan’s 70th birthday. “You will have heard of my friend the once celebrated novelist Jocelyn Tarbet, but I suspect his memory is beginning to fade. . . . You’d never heard of me, the once obscure novelist Parker Sparrow, until my name was publicly connected with his. To a knowing few, our names remain rigidly attached, like the two ends of a seesaw. His rise coincided with, though did not cause, my decline. . . . I don’t deny there was wrongdoing. I stole a life, and I don’t intend to give it back. You may treat these few pages as a confession.”

Living Candida-Free Ricki Heller,Andrea Nakayama,2015-02-03 Candida is a type of yeast that grows in the human body. An overgrowth of candida has been found to be at the root of many health problems, from chronic fatigue and digestive disorders to skin conditions and allergies. Some health professionals are calling it a hidden epidemic. One of the main instigators of candida overgrowth is sugar, of which the average American consumes more than seventy pounds per year. In *Living Candida-Free*, Ricki Heller (with functional nutritionist Andrea Nakayama) offers a complete exploration of this condition and an expansive approach for anyone wishing to follow an anti-candida diet. A comprehensive guidebook for living a life free of refined sugar, it includes a three-stage program; tips on how to transition to eating the anti-candida way with ease; information on herbal supplements and

treatments; a full list of substitutions; and delicious, satisfying recipes that anyone can prepare.
