Bray Makes Money and Buys a Toy Ken Moultrie,Braylon Moultrie,2016-04-14 In this fascinating and clever book, Bray and his dad embark on a new and exciting idea, which takes them on an entirely different approach to that which parents usually take when their child wants something like a new toy, and in so doing plants the seed of becoming an entrepreneur in the young boy's mind. Bray's dad, instead of giving him the money for the toy or allowing him to earn it through doing some chores, decides to introduce him to the concept of becoming an entrepreneur in his own right. He introduces Bray to business and marketing, teaching him how to select a product he wants to sell, how to decide on a price, where to sell them and how to promote the sales. But when customers don't come immediately, Bray has to reconsider his options and decide what to do next. Bray Makes Money and Buys a Toy is both fun and educational at the same time, teaching young children the value of money, working for themselves and giving them ideas for possible business ventures. It is great for parents to read along with their children too, strengthening bonds and preparing them for the future. So why not join Bray and Dad today, and encourage your child to go on an adventure with them to entrepreneurship?

Transforming the Workforce for Children Birth Through Age 8 National Research Council,Institute of Medicine,Board on Children, Youth, and Families,Committee on the Science of Children Birth to Age 8: Deepening and Broadening the Foundation for Success,2015-07-23 Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. Transforming the Workforce for Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.
