Encyclopedia of New Year's Holidays Worldwide William D. Crump, 2014-04-25 Among the world's myriad cultures and their associated calendars, the idea of a "New Year" is relative and hardly specifies a universal celebration or even a universal point in time. Ways of celebrating the New Year range from the observances of religious rituals and superstitions to social gatherings featuring particular foods, music, dancing, noisemaking, fireworks and drinking. This first encyclopedia devoted exclusively to the New Year includes 320 entries that give a global perspective on the New Year, beyond its traditional Western associations with Christmas. National or regional entries detail the principal traditions and customs of 130 countries, while 27 entries discuss major calendar systems in current use or of significant historical interest. The remaining entries cover a wide variety of subjects including literary works, movies, and television specials; the customs of specific ethnic groups; universal customs such as toasting and drinking; football bowl games and parades; and the New Year celebrations at the White House and the Vatican.

Happy Holidays--Animated! William D. Crump, 2019-03-11 Since the early 20th century, animated Christmas cartoons have brightened the holiday season around the world--first in theaters, then on television. From devotional portrayals of the Nativity to Santa battling villains and monsters, this encyclopedia catalogs more than 1,800 international Christmas-themed cartoons and others with year-end themes of Hanukkah, Kwanzaa and the New Year. Explore beloved television specials such as A Charlie Brown Christmas, theatrical shorts such as Santa's Workshop, holiday episodes from animated television series like American Dad! and The Simpsons, feature films like The Nutcracker Prince and obscure productions such as The Insects' Christmas, along with numerous adaptations and parodies of such classics as A Christmas Carol and Twas the Night before Christmas.

Animation Trudi Strain Trueit, 2008-08-01 Somewhere along the way, something happened to give art that crucial kick that gave life to still images: motion. The art of animation, both hand-drawn and computer-animated, has a long and rich history spanning nearly a century of experimentation and innovation. This book helps students understand the role innovation has played in the development of animation industry.

Empowering Visions Christiane Brosius, 2005 Illustrated throughout with over 80 full colour images, Empowering Visions explores the role of images and mass media in Hindutva, the cultural-nationalist movement that moved to the forefront of politics in India in the late 1980s and early 1990s. The author investigates when, why and in what way the moving image, and videos in particular, came to play a central role in the process of self-

representation and self-constitution of Hindu nationalist groups and organizations in the overlapping domains of politics, religion and economics. The videos analysed here have been included in massive public political spectacles such as election rallies and patriotic pilgrimages. They have also been employed for in-house indoctrination and emotive mobilization of militant cadres for temporary, often violent, agitation. With the help of these media, different political and cultural-religious organizations, subsumed under the umbrella of Hindutva, have attempted to constitute notions of 'Indianness' as 'Hinduness', to challenge and provoke both the government in power and specific minority groups such as the Muslims in India. How this was done, who stood behind the making of the videos and how they were made up and distributed, are questions that lie at the heart of this study. At a time when public attention is focused on transnational, and mostly Islamicist movements, Empowering Visions argues that both transnationalism and nationalism have to be treated with equal attention, and to some extent ought to be seen as intertwined processes. This book is unique in its presentation and discussion of profound ethnographic data through interviews with a variety of spokesmen for the Hindutva movement. It also offers an in-depth analysis of visual and audio-visual material that has so far been unrecognized and unexplored in scholarly works.

Drive Daniel H. Pink,2011-04-05 The New York Times bestseller that gives readers a paradigm-shattering new way to think about motivation from the author of When: The Scientific Secrets of Perfect Timing Most people believe that the best way to motivate is with rewards like money—the carrot-and-stick approach. That's a mistake, says Daniel H. Pink (author of To Sell Is Human: The Surprising Truth About Motivating Others). In this provocative and persuasive new book, he asserts that the secret to high performance and satisfaction—at work, at school, and at home—is the deeply human need to direct our own lives, to learn and create new things, and to do better by ourselves and our world. Drawing on four decades of scientific

research on human motivation, Pink exposes the mismatch between what science knows and what business does—and how that affects every aspect of life. He examines the three elements of true motivation—autonomy, mastery, and purpose—and offers smart and surprising techniques for putting these into action in a unique book that will change how we think and transform how we live.

America Toons In David Perlmutter,2014-03-18 Animation has been part of television since the start of the medium but it has rarely received unbiased recognition from media scholars. More often, it has been ridiculed for supposedly poor technical quality, accused of trafficking in violence aimed at children, and neglected for indulging in vulgar behavior. These accusations are often made categorically, out of prejudice or ignorance, with little attempt to understand the importance of each program on its own terms. This book takes a serious look at the whole genre of television animation, from the early themes and practices through the evolution of the art to the present day. Examining the productions of individual studios and producers, the author establishes a means of understanding their work in new ways, at the same time discussing the ways in which the genre has often been unfairly marginalized by critics, and how, especially in recent years, producers have both challenged and embraced this marginality as a vital part of their work. By taking seriously something often thought to be frivolous, the book provides a framework for understanding the persistent presence of television animation in the American media--and how surprisingly influential it has been.
