News in their Pockets Ran Wei,Ven-hwei Lo,2021-02-17 Since the debut of the iPhone in 2007, the mobile phone has become a quick, convenient, and immensely popular gateway for accessing and consuming news. With three billion mobile phone subscribers, Asian countries have led this seismic shift in news consumption. They provide a wide range of opportunities to study how, as mobile technology matures and becomes routinized, mobile news is increasingly subject to societal constraints and impositions of political power that reduce the democratic benefits of such news and call into question the application of these technological innovations within governments and societies. News in Their Pockets explores the societal, technological, and user-related factors behind why and how digital-savvy college students seek news via the mobile phone across Asia's most mobile cities--Shanghai, Hong Kong, Singapore, and Taipei. Situating cross-societal comparative analyses of mobile news consumption in Asia within a digital and global context, this volume outlines the evolution of the mobile phone to its prominence in disseminating news, offers predictors of patterns in mobile news consumption, investigates user needs and expectations, and illustrates future impacts on civic engagement from mobile news consumption. By examining the interplay between game-changing and empowering communication technology and constraining social systems, News in Their Pockets provides the framework necessary for constructive, continuing debates over the promise and peril of digital news and exposes our underlying reasoning behind the adoption of the mobile phone as the all-in-one media of choice to stay socialized, entertained, and informed in the modern digital age.

Yearbook on Space Policy 2009/2010 Kai-Uwe Schrogl,Spyros Pagkratis,Blandina Baranes,2011-12-30 The Yearbook on Space Policy is the reference publication analysing space policy developments. Each year it presents issues and trends in space policy and the space sector as a whole. Its scope is global and its perspective is European. The Yearbook also links space policy with other policy areas. It highlights specific events and issues, and provides useful insights, data and information on space activities. The Yearbook on Space Policy is edited by the European Space Policy Institute (ESPI) based in Vienna, Austria. It combines in-house research and contributions of members of the European Space Policy Research and Academic Network (ESPRAN), coordinated by ESPI. The Yearbook is designed for government decision-makers and agencies, industry professionals, as well as the service sectors, researchers and scientists and the interested public.

Mobile News Andrew Duffy,Rich Ling,Nuri Kim,Edson Tandoc, Jr.,Oscar Westlund,2020-12-17 The rise of the smartphone has shifted news from fixed publication to a flow of updateable information. The chapters in this book investigate the implications for audiences, industry and society as news becomes mobile. Wherever we go, news from anywhere can reach us on our

smartphones. And wherever we are, we can search up information specific to that place. News is produced by mobile journalists (MoJos) as well as by citizens armed with smartphones, reporting breaking news from crisis zones where information is uncertain, or hyperlocal news from neighbourhoods where little happens. Mobile technology allows citizens to engage deeply with a cause or to skim headlines so they know a little about a lot of things. News is distributed on mobile networks and consumed by mobile audiences as they make their daily way through time and space coloured by their mobile devices. It is consumed in the niches of life. It intersects with place in new ways as geolocated news. It pursues us wherever we are through push notifications. And news has moved from fixed to fluid, a flow of updateable information rather than a regularly issued product. In this book, the contributors take varied viewpoints on mobility and news, its impact on what news is, how journalists produce it and how it fits into everybody's everyday life. The chapters in this book were originally published as a special issue of Digital Journalism.

The Millennial Generation Cortney Weinbaum,Richard S. Girven,Jenny Oberholtzer,2016-08-08 In 2015, for the first time, millennials outnumbered baby boomers as the largest generational segment of the U.S. population. This report describes how the intelligence community must engage millennials across multiple segments to succeed in the future: millennials as intelligence clients, employees, and partners and as members of the public.

Mobile Technology and Social Transformations Stefanie Felsberger,Ramesh Subramanian,2021-05-03 This book investigates the ways in which the mobile telephone has transformed societies around the world, bringing both opportunities and challenges. At a time when knowledge and truth are increasingly contested, the book asks how mobile technology has changed the ways in which people create, disseminate, and access knowledge. Worldwide, mobile internet access has surpassed desktop access, and it is estimated that by 2022 there will be AN excess of 6 billion mobile phone users in the world. This widespread proliferation raises all sorts of questions around who creates knowledge, how is that knowledge shared and proliferated, and what are the structural political, economic, and legal conditions in which knowledge is accessed. The practices and power dynamics around mobile technologies are location specific. They look different depending on whether one chooses to highlight the legal, social, political, or economic context. Bringing together scholars, journalists, activists and practitioners from around the world, this book embraces this complexity, providing a multifaceted picture that acknowledges the tensions and contradictions surrounding accessing knowledge through mobile technologies. With case studies from Hong Kong, South Korea, India, Syria, Egypt, Botswana, Brazil, and the US, this book provides an important account of the changing nature of our access to knowledge, and is key reading for students, researchers, activists and policy makers with an interest in technology and access to knowledge, communication, social transformation, and global development.

The Regulation of Mobile Money Sunduzwayo Madise,2019-03-26 The emergence of mobile money and other new forms of payment has changed the sovereign foundations of money. Starting as a Department for International Development funded project in Kenya, mobile money has now spread to many developing countries. This book looks at the regulatory issues that mobile money poses,

and the potential risks to the financial system. It undertakes a comparative study of mobile money regimes in Kenya, Malaŵi, Tanzania, and South Africa. Although the main study is on Malaŵi, the lessons learnt are valuable to Sub Saharan Africa in understanding the regulatory issues surrounding mobile money. The main argument that this book makes is that the traditional regulatory architecture of supervising the financial services is ill-suited to supervise new forms of money like mobile money. With no requirement for a bank account, mobile money is not subject to prudential regulation. Mobile money is now considered a key developmental tool to achieve financial inclusion among the poor, rural based, unbanked, and underbanked. As opposed to traditional additive forms of financial inclusion, mobile money is transformative. In most jurisdictions where it has been launched, mobile money has largely been regulated using light-touch, with regulation following innovation. This work, however, proposes an approach based on the concept of really responsive regulation. This approach is best suited to embrace mobile money as it passes from the pre-financial inclusion to the post-financial inclusion phases of its evolution. This book will appeal to students and academics in the financial regulation field.

  Constant Touch Jon Agar,2013-02-07 Mobile phones are a ubiquitous technology with a fascinating history. There are now as many mobile phones in the world as there are people. We carry them around with us wherever we go. And while we used to just speak into them, now mobiles are used to do all kinds of tasks, from talking to twittering, from playing a game to paying a bill. Jon Agar takes the mobile to pieces, tracing what makes it work, and puts it together again, showing how it was shaped in different national contexts in the United States, Europe, the Far East and Africa. He tells the story from the early associations with cars and the privileged, through its immense popular success, to the rise of the smartphone. Few scientific revolutions affect us in such a day-to-day way as the development of the mobile phone. Jon Agar's deft history explains exactly how this revolution has come about - and where it may lead in the future.

  Virtual Competition Ariel Ezrachi,2016-11-14 Ariel Ezrachi and Maurice Stucke take a hard look at today's app-assisted paradise of digital shopping. The algorithms and data-crunching that make online purchasing so convenient are also changing the nature of the market by shifting power into the hands of the few, with risks to competition, our democratic ideals, and our overall well-being.

  Digital Transformation of Business Everlin Piccinini,2016-08-26 History of corporations is replete with stories of fundamental organizational change in the face of breakthroughs in technology and significant economic changes. Yet pervasive digitalization, i.e., a socio-technical process whereby digital technology capabilities are embedded into everyday artifacts and life, altering everyday experiences and interactions, brings about substantial changes in environmental conditions not seen before. The fast-paced, unbounded, ongoing, and potentially disruptive nature of change in today's digitized world is fueled by the generativity of digital innovation, forcing incumbents across industries to transform and adapt. This cumulative dissertation presents five studies that provide a comprehensive understanding on the emerging phenomenon of digital transformation of business. With the

help of primary data collected from more than 40 industry experts as well as secondary data, it aimed at explaining through a configurational perspective how, in certain contextual conditions, a combination of particular mechanisms, may lead automotive manufacturing organizations to embark on a sustainable digital transformation of their business. Overall, the findings derive a holistic view of the investigated phenomenon, indicating that it stems from socio-technical developments in the macro, meso, and micro levels of business, fostering incumbents to build new mechanisms that activate digital transformation capabilities to rapidly respond to such socio-technical developments, fundamentally altering their traditional business logics. Nevertheless, research on the phenomenon of digital transformation is in its infancy in both information systems and organizational science research, therefore more in-depth empirical accounts are still needed.

   The Images of the Consumer in EU Law Dorota Leczykiewicz,Stephen Weatherill,2016-01-28 This book consists of contributions exploring from different perspectives the 'images' of the consumer in EU law. The images of the consumer form the foundation for various EU policies, more or less directly oriented towards the goal of consumer protection. The purpose of the volume is to establish what visions of the consumer there are in different contexts of EU law, whether they are consistent, and whether EU law's engagement with consumer-related considerations is sincere or merely instrumental to the achievement of other goals. The chapters discuss how consumers should be protected in EU contract, competition, free movement and trade mark law. They reflect on the limits of the consumer empowerment rationale as the basis for EU consumer policy. The chapters look also at the variety of concerns consumers might have, including the cost of goods and services, access to credit, ethical questions of consumption, the challenges of excessive choice and the possibility to influence the content of regulatory measures, and explore the significance of these issues for the EU's legislative and judicial process.

   WAR NEWS: Blue and Gray in Black and White Brayton Harris,2010-06-21 WAR NEWS (originally published in 1999 as Blue & Gray in Black & White) is an exploration of the individual and collective efforts of newspaper journalists during the Civil War. As eyewitnesses to one of the most memorable conflicts in history, they left a record that is sometimes brilliant but, at other times, marred by shoddy journalism, sensationalism, and self-serving

reporting. They were, however, the American public's primary source of information about the battles that were tearing the nation apart. This book focuses on the personalities, politics, and rivalries of editors; the efforts of newspapers to influence military appointments, strategy, and tactics; advances in printing technology; formal and informal censorship, the suppression of dissident newspapers, and, most of all, the war correspondents themselves.
