Dawn Raids Under Challenge Helene Andersson,2018-06-28 This book examines the European Commission's dawn raid practices in competition cases from a fundamental rights perspective. In recent years, the Commission has adopted a new and more aggressive enforcement policy, amid a growing awareness that cartels and abuse of market power represent an economic harm and need to be punished. In response, enforcement has been strengthened by the grant of more wide-reaching powers to competition authorities. But how does this impact on the framework of fundamental rights? This study seeks to answer that question by examining the obligations imposed by the Charter and the ECHR and the response of the Luxembourg and Strasbourg Courts. It shows that where the Strasbourg Court has managed to strike a balance between efficiency concerns and the rights of undertakings, the EU courts' judicial control is not equally balanced. This book is an essential and timely examination of this important question.

Studies of High Temperature Superconductors A. V. Narlikar,2006 This Golden Jubilee volume in the world's foremost series on superconductivity covers wide-ranging topics capturing the current excitement in the field. The broad areas include the advancement of high Tc theory, materials depicting unusual characteristics, materials' processing and defect structures for improved properties, their electromagnetic response, flux pinning, Josephson junctions and devices, and large scale applications.

The EU Charter of Fundamental Rights as a Binding Instrument Sybe de Vries,Ulf Bernitz,Stephen Weatherill,2015-12-03 The entry into force of the Treaty of Lisbon in 2009 caused the EU's Charter of Fundamental Rights to be granted binding effect. This raised a host of intriguing questions. Would this transform the EU's commitment to fundamental rights? Should it transform that commitment? How, if at all, can we balance competing rights and principles? (The interaction of the social and the economic spheres offers a particular challenge). How deeply does the EU conception of fundamental rights reach into and bind national law and practice? How deeply does it affect private parties? How much flexibility has been left to the Court in making these interpretative choices? What is the likely effect of another of the reforms achieved by the Lisbon Treaty, the commitment of the EU to accede to the ECHR? This book addresses all of these questions in the light of five years of practice under the Charter as a binding instrument.

Competition Law of the European Union Van Bael & Bellis,2021-03-01 This new Sixth Edition of a major work by the well-known competition law team at Van Bael & Bellis in Brussels brings the book up to date to take account of the many developments in the case law and relevant legislation that have occurred since the Fifth Edition in 2010. The authors have also taken the opportunity to write a much-extended chapter on private enforcement and a dedicated section on competition law in the pharmaceutical sector. As one would expect, the new edition continues to meet the challenge for businesses and their counsel, providing a thoroughly practical guide to the application of the EU competition rules. The critical commentary cuts through the theoretical underpinnings of EU competition law to expose its actual impact on business. In this comprehensive new edition, the authors examine such notable developments as the following: important rulings concerning the concept of a restriction by object under Article 101; the extensive case law in the field of cartels, including in relation to cartel facilitation and price signalling; important Article 102 rulings concerning pricing and exclusivity, including the Post Danmark and Intel judgments, as well as standard essential patents; the current block exemption and guidelines applicable to vertical agreements, including those applicable to the motor vehicle sector; developments concerning online distribution, including the Pierre Fabre and Coty rulings; the current guidelines and block exemptions in the field of horizontal cooperation, including the treatment of information exchange; the evolution of EU merger control, including court defeats suffered by the Commission and the case law on procedural infringements; the burgeoning case law related to pharmaceuticals, including concerning reverse payment settlements; the current technology transfer guidelines and block exemption; procedural developments, including in relation to the right to privacy, access to file, parental liability, fining methodology, inability to pay and hybrid settlements; the implementation of the Damages Directive and the first interpretative rulings. As a comprehensive, up-to-date and above all practical analysis of the EU competition rules as developed by the Commission and EU Courts, this authoritative new edition of a classic work stands alone. Like its predecessors, it will be of immeasurable value to both business persons and their legal advisers.

EU Competition and State Aid Rules Vesna Tomljenović,Nada Bodiřoga-Vukobrat,Vlatka Butorac Malnar,Ivana Kunda,2017-12-28 This book scrutinizes legislative novelties and case law in the area of EU competition and state aid rules, focusing on the interaction between public and private enforcement of those rules. It is intended for scholars, stakeholders and anyone involved in the process of law enforcement – judges, attorneys at law, corporate lawyers and market participants.
