*Human-Computer Interaction – INTERACT 2005* Maria Francesca Costabile, Fabio Paternò, 2005-09-28 We will be, sooner or later, not only handling personal computers but also multi-purpose cellular phones, complex personal digital assistants, devices that will be context-aware, and even wearable computers stitched to our clothes...we would like these personal systems to become transparent to the tasks they will be performing. In fact the best interface is an invisible one, one giving the user natural and fast access to the application he (or she) intends to be executed. The working group that organized this conference (the last of a long row!) tried to combine a

powerful scientific program (with drastic refereeing) with an entertaining cultural program, so as to make your stay in Rome the most pleasant one all round: I do hope that this expectation becomes true. July 2005 Stefano Levialdi, IEEE Life Fellow INTERACT 2005 General Chairman [1] Peter J. Denning, ACM Communications, April 2005, vol. 48, N° 4, pp. 27-31. Editors' Preface INTERACT is one of the most important conferences in the area of Human-Computer Interaction at the world-wide level. We believe that this edition, which for the first time takes place in a Southern European country, will strengthen this role, and that Rome, with its history and beautiful setting provides a very congenial atmosphere for this conference. The theme of INTERACT 2005 is Communicating Naturally with Computers.

Human-Computer Interaction - INTERACT '87 H.-J. Bullinger, B.

Shackel, 2014-05-21 Since the first INTERACT Conference in September 1984, the field of Human-Computer Interaction has received increasing attention from researchers and industrial practitioners, the importance of the topic now being widely recognized. Technological developments have made it possible to seek new solutions to the problem of supporting work processes by information technology and for designing the interface between user and the machine. Computers have become an everyday and common tool in the work of many people. This has motivated the development of an interdisciplinary field of research, which now appears much more established than it was a few years ago. The INTERACT forums provide the opportunity for regular presentation and

discussion of new results from research and application by bringing together the various disciplines and research approaches on a worldwide basis.

*INTERACT 2015 Adjunct Proceedings* Christoph Beckmann, Tom Gross, 2015-09-15

Human-Computer Interaction - INTERACT 2009 Tom Gross, Jan Gulliksen, Paula Kotzé, Lars Oestreicher, Philippe Palanque, Raquel Oliveira Prates, Marco Winckler, 2009-08-20 INTERACT 2009 was the 12th of a series of INTERACT international conferences supported by the IFIP Technical Committee 13 on Human-Computer Interaction. This year, INTERACT was held in Uppsala (Sweden), organized by the Swedish Interdisciplinary Interest Group for Human-Computer Interaction (STIMDI) in cooperation with the Department of Information Technology at Uppsala University. Like its predecessors, INTERACT 2009 highlighted, both to the academic and to the industrial world, the importance of the human-computer interaction (HCI) area and its most recent breakthroughs on current applications. Both experienced HCI researchers and professionals, as well as newcomers to the HCI field, interested in designing or evaluating interactive software, developing new interaction technologies, or investigating overarching theories of HCI, found in INTERACT 2009 a great forum for communication with people of similar interests, to encourage collaboration and to learn. INTERACT 2009 had Research and Practice as its

special theme. The reason we selected this theme is that the research within the field has drifted away from the practical applicability of its results and that the HCI practice has come to disregard the knowledge and development within the academic community.

**Evaluating Cognitive Competences in Interaction** Gitte Rasmussen,C.E. Brouwer,Dennis Day,2012-11-21 Evaluation is a part of everyday life. Competences, knowledge and skills are assessed in ordinary as well as in institutional settings like hospitals, clinics and schools. This volume investigates how evaluations are being carried out interactionally. More

specifically, it explores how people evaluate each others' cognitive competences as they deal with each others' understandings, knowings, feelings, doings, hearings and learnings face-to-face. The contributions focus on different evaluation activities in a variety of institutional settings in Denmark, Finland, Sweden, Holland and the United States of America. All the contributions approach the theme by use of Ethnomethodology (EM) and/or Conversation Analysis (CA). Thus, the analytic interests concern how participants organize activities of evaluating cognitive competences by means of recognizable interactional methods. This approach differs from other approaches and research interests within cognitive science as it concentrates on how people in interaction orient towards cognitive competence irrespective of scientific theories.
