STEM Gems Stephanie Espy,2016-06-06 Tired of seeing the same careers foisted upon women in TV, movies and magazines? Chemical engineer Stephanie Espy, a graduate of MIT, UC Berkeley and Emory University, tells the stories of 44 inspiring women in STEM to show girls and young women around the world a new set of women heroes to look up to. The statistics for women in Science, Technology, Engineering and Mathematics (STEM) careers are just plain sad. In recent years, fewer than 20% of college graduates in engineering and computer science were women. While stereotypes pervade about women in these fields, the truth is that most girls have never even heard of these careers and are not aware of the wide range of options that exist. In STEM Gems, you and your daughter, niece, neighbor, friend or student will discover: The stories of 44 inspiring women in diverse STEM fields and how they made it; The challenges these incredible women faced in pursuit of their dreams; The tremendous accomplishments these Gems have achieved in their respective STEM fields; Advice on how to pursue science, technology, engineering and mathematics careers; Actionable steps girls and young women can take right now to set themselves up for success; What girls and young women can expect in a promising STEM career, and much, much more! Through the powerful stories of the STEM Gems in this book, girls and young women will have their pick of current role models of various ages, ethnicities and job types. And through the eight chapters that outline actionable steps, girls and young women will learn what they can do right now, today, to set themselves up for success and to create their own unique paths. STEM Gems is relatable, encouraging and inspiring, demonstrating the limitless possibilities for the next generation of women.

Optimization of Logistics Alice Yalaoui, Hicham Chehade, Farouk Yalaoui, Lionel Amodeo, 2012-12-13 This book aims to help engineers, Masters students and young researchers to understand and gain a general knowledge of logistic systems optimization problems and techniques, such as system design, layout, stock management, quality management, lot-sizing or scheduling. It summarizes the evaluation and optimization methods used to solve the most frequent problems. In particular, the authors also emphasize some recent and interesting scientific developments, as well as presenting some industrial applications and some solved instances from real-life cases. Performance evaluation tools (Petri nets, the Markov process, discrete event simulation, etc.) and optimization techniques (branch-and-bound, dynamic programming, genetic algorithms, ant colony optimization, etc.) are presented first. Then, new optimization methods are presented to solve systems design problems, layout problems and buffer-sizing optimization. Forecasting methods, inventory optimization, packing problems, lot-sizing quality management and scheduling are presented with examples in the final chapters.

The Oil and Gas Lease in Canada John Bishop Ballem, 2008-01-01 Long recognized as the standard work on the topic, The Oil and Gas Lease in Canada discusses the legal document that determines the process by which a freehold mineral owner may grant oil companies the right to search for and produce minerals. Subjected to ongoing litigation and governmental regulation, the Lease continues to evolve as the body of common law surrounding it grows and develops. The substances covered by the Lease are unique in that their occurrence is uncertain until discovery, and they are capable of moving from place to place within a reservoir. These qualities have led to the development of new legal concepts, basically creating a separate and distinct branch of the law. This fourth edition of The Oil and Gas Lease in Canada guides the reader through the complexities of the Lease and the legal issues attached to it. John Bishop Ballem brings the text up to date on recent developments, including changes and additions to the terms of the Lease, the effect of recent court decisions, and the growth of coal bed methane as an energy source. Of particular interest is his examination of what takes place following a Lease's involuntary termination. Ballem deals with specific examples of this situation, detailing its consequences for both individual mineral owners and companies, as well as for future judicial pronouncements. The fourth edition of The Oil and Gas Lease in Canada is indispensable for mineral owners, oil companies, land agents, lawyers, and legal institutions.

Junior Secret Service Agent Training Manual U.S. Department of the Interior,2014-09-19 United States Secret Service Agents protected Springwood, the home of Franklin D. Roosevelt in Hyde Park, New York for the 12 years that he was President of the United States of America. Franklin D. Roosevelt was the 32nd President and the only president ever elected to 4 terms, which means he would hold that office for 16 years in a row. President Roosevelt died on April 12, 1945, at the beginning of his fourth term. His death ended the need for the Secret Service to keep the family home and lands safe for him. Their job at Springwood had started long before that, when he was elected as President for the first time in November 1932. Today you can explore what it was like to be one of President Roosevelt's Secret Service Agents working here at Springwood. As you visit the President's home, grounds, and different buildings, test yourself to see if you have what it takes to protect the President by finishing your chosen activities in this Training Manual.
