**The Impact of Publicity on Corporate Offenders** Brent Fisse, John Braithwaite, 1984-06-30 Uncertainty surrounds the use of publicity as a means of controlling corporate crime. On the one hand, some agree with Justice Brandeis's dictum that light is the best of disinfectants...the most efficient policeman. On the other hand, many believe that corporations' internal affairs are effectively shrouded with a thick fog that prevents the light of public scrutiny from reaching them. The Impact of Publicity on Corporate Offenders is the first study to go beyond the rhetoric, through an examination of corporate experience. Fisse and Braithwaite have carried out a qualitative inquiry concerning 17 large corporations involved in publicity crises. Based mainly on interviews, the inquiry includes company employees and former employees, union officials, officers of government regulatory agencies, competitors, independent accountants, government prosecutors, public interest activists, judicial officers, stockbrokers, and other experts.

**Logistical Support of the Armies** Roland G. Ruppenthal, 1953 The buildup of American armies under General Eisenhower in the United Kingdom in preparation for the Normandy invasion and an account of how they were supplied during the first three months of operations on the Continent. Both volumes emphasize the influence of logistical support on the planning and conduct of combat operations by field armies.

From the Fulda Gap to Kuwait Stephen P. Gehring, 1998 CMH Publication 70-56-1. This study describes how the United States Army, Europe (USAREUR), under the command of General Crosbie E. Saint, supported the armed response of the United States and the United Nations to Iraq's August 1990 invasion of

Kuwait at the very time it was managing a fundamental transition in its fifty-year history of defending Central Europe. Discusses the complicated planning for the deployment and the rapid-fire implementation.

**Africa 2.0** Russell Southwood, 2022-07-12 Africa wired up provides an important history of how two technologies - mobile calling and internet - were made available to millions of Sub-Saharan Africans and the impact they have had on their lives. The book deals with the political challenges of liberalization and privatization that needed to be in place to get these technologies built. It analyses how the mobile phone fundamentally changed communications in Sub-Saharan Africa and the ways Africans have made these technologies part of their lives. It examines critically the technologies' impact on development practices and the key role development actors played in accelerating things like regulatory reform, fibre roll-out and mobile money. The book considers how corruption in the industry is a prism through which patronage relationships in Government can be understood. The arrival of a start-up ecosystem has the potential to break these relationships and offer a new wave of investment opportunities. The author seeks to go beyond the hype to make a provisional assessment of the kinds of changes that have happened over three decades. It examines how and why these technologies became transformative and seem to have opened out a very different future for Sub-Saharan Africa.

*Negotiating an Anglophone Identity* Piet Konings, Francis B.

Nyamnjoh, 2003-07-01 This is a significant and timely book on the politics of belonging. It captures, with fascinating detail and insight, the current widespread disaffection with the sterile rhetoric of nation-building that has characterised much of postcolonial African politics. Until the liberation struggles of the 1990s, dictatorship only paid lip service to democracy with impunity, often by silencing those perceived to threaten national unity. Since then, individuals and groups have reactivated claims to rights and entitlements and nowhere more so than in Cameroon. The book articulates the experiences and predicaments of the country's Anglophone community trapped in a marriage of inconvenience pregnant with tensions and conflicts.

C est 1 homme qui fait 1 homme B. Nyamnjoh, 2015-08-12 The idea that human beings are inextricably bound to one another is at the heart of this book about African agency, especially drawing on the African philosophy Ubuntu, with its roots in human sociality and inclusivity. Ubuntu's precepts and workings are severely tested in these times of rapid change and multiple responsibilities. Africans negotiate their social existence between urban and rural life, their continental and transcontinental distances, and all the market forces that now impinge, with relationships and loyalties placed in question. Between ideal and reality, dreams and schemes, how is Ubuntu actualized, misappropriated and endangered? The book unearths the intrigues and contradictions that go with inclusivity in Africa. Basing his argument on the ideals of trust, conviviality and support embodied in the concept of Ubuntu, Francis Nyamnjoh demonstrates how the pursuit of personal success and even self-aggrandizement challenges these ideals, thus leading to discord in social relationships. Nyamnjoh uses a popular Ivorian drama with the same title to substantiate life-world realities and more importantly to demonstrate that new forms of expression, from popular drama to fiction, thicken and enrich the ethnographic component in current anthropology.
