Nike Culture Robert Goldman, Stephen Papson, 1998-12-22 This book is one of the first to take an in-depth look at how an advertising image works. It situates the Nike swoosh logo in terms of political economy, sociology, culture and semiotics. Nike Culture describes and deconstructs the themes and structures of Nike's advertising, outlines the contradictions between image and practice, and explores the logic of the sign economy. In addition, by focusing on issues revolving around representations of race, class and gender, the desire for both community and recognition, and the construction of sport as a spiritual enterprise, the book offers insights into the cultural contradictions embedded in sports culture.

Design for Environment as a Tool for the Development of a Sustainable Supply Chain Maurizio Bevilacqua, Filippo Emanuele Ciarapica, Giancarlo Giacchetta, 2012-01-05 Environmental Design is becoming an increasingly significant agenda for many manufacturing companies and yet there is no standard to their approaches, strategies or their levels of execution. Applying Design for Environment (DfE) methodologies to develop a more sustainable supply chain has formed procedures and techniques which allow designers to integrate these methods with environmental supply chain management. Design for Environment as a Tool for the Development of a Sustainable Supply Chain aims to define relevant target specifications for a product throughout its life cycle; from conception and design to the end of its operating life. By considering this new approach to the supply chain, environmental responsiveness can work in tandem with sound business management. The usual focus on suppliers, manufacturers and customers is expanded in Design for Environment as a Tool for the Development of a Sustainable Supply Chain to include stakeholders such as government bodies and recycling companies. The influence of these additional groups is analyzed alongside concepts

such as: Product life cycle development aimed at environmental impact minimization; Supplier selection and management based on environmental criteria; and Marketing and communication choices which increase the value of environmentally sensitive products. By including several case studies alongside theoretical topics, Design for Environment as a Tool for the Development of a Sustainable Supply Chains acts as a foundation for professionals across the supply chain, from industrial designers to marketing and sales departments, who are involved in environmental issues.

Branding with Brains Tjaco Walvis, 2012-10-12 What has neuroscience got to do with branding? The link may not be immediately obvious, but the fact is, our brains select brands in much the same way that Google selects websites. So, just as web marketers play on Google's algorithm to make sure their site appears as high up the search list as possible, brand marketers should play on the brain's algorithm to make sure their brand is at the top of their customers' minds at the moment they choose which brand to buy. This ground-breaking new book brings the proven effects of hard science to the creative practice of branding. It shows you how to harness this powerful combination to your own advantage by helping you understand how customers' brains work when they choose brands. A strong brand cannot be built effectively without taking into account the laws of the brain – which, as this book shows, really exist and can be scientifically proven to work. Once you know this, you can apply

the familiar branding laws of relevance, coherence and participation more precisely, more confidently and to much greater effect. This means your brand will have a much greater chance of being chosen by customers than your competitors' brands. Branding with Brainsshatters the conventional approach to branding, which is based on hunches and intuition, by uncovering the hard, scientific truth about why customers choose some brands over others. Insights into company stories, from Leica to Innocent Drinks, from Starbucks to Schipol International Airport, give you the fascinating truth about how the processes that go on in our brain affect our decisions to buy a particular product or service. All in all, this breathtakingly radical new book from Tjaco Walvis presents a daringly different, state of the art approach to brand strategy that will help you build powerful brands more efficiently, more effectively and more reliably than ever before. Branding really is all in the mind – and this book proves it!

Validating the social media strategies of adidas and Nike on Facebook and Instagram
Anna Lena Bischoff, 2017-03-03 Seminar paper from the year 2017 in the subject Business economics - Marketing, Corporate Communication, CRM, Market Research, Social Media, grade: 1,7, Linneaus University (School of Business and Economics), course: E-Business Management, language: English, abstract: Social media (SM) strategies have gained major importance for the retailers in the last decade. The effective use of SM channels for marketing purposes leads to valuable information and insights about markets. However, many managers still fail to understand the importance of the possibilities of SM usage for strengthening brand perception. This might be due to the lack of commonly agreed SM success factors in academic research. The purpose of this paper is to discuss SM success factors and to evaluate how the two world leading sports brands NIKE and adidas follow the application of the discussed success factors. Based on a literature review, the authors

summarized the most commonly discussed SM success factors. Data collection was conducted in a consecutive, two step approach, first extracting relevant data from the annual reports, and then withdrawing data from the companies SM channels through text mining. The data was then analysed according to the success factors summarized from academic literature. Also NIKE's and adidas' accomplishments in achieving their goals set in the annual reports on SM were examined. adidas achieves a higher success rate than NIKE in laying out their SM strategy. Both adidas and NIKE cannot entirely live up to their ambitions, underperforming on SM in practice.
