**Laser-Induced Breakdown Spectroscopy** Sergio Musazzi,Umberto Perini,2014-07-08 This book deals with the Laser-Induced Breakdown Spectroscopy (LIBS) a widely used atomic emission spectroscopy technique for elemental analysis of materials. It is based on the use of a high-power, short pulse laser excitation. The book is divided into two main sections: the first one concerning theoretical aspects of the technique, the second one describing the state of the art in applications of the technique in different scientific/technological areas. Numerous examples of state of the art applications provide the readers an almost complete scenario of the LIBS technique. The LIBS theoretical aspects are reviewed. The book helps the readers who are less familiar with the technique to understand the basic principles. Numerous examples of state of the art applications give an almost complete scenario of the LIBS technique potentiality. These examples of applications may have a strong impact on future industrial utilization. The authors made important contributions to the development of this field.

**Media Independence** James Bennett,Niki Strange,2014-11-20 Media independence is central to the organization, make-up, working practices and output of media systems across the globe. Often stemming from western notions of individual and political freedoms, independence has informed the development of media across a range of platforms: from the freedom of the press as the fourth estate and the rise of Hollywood's Independent studios and Independent television in Britain, through to the importance of Indy labels in music and gaming and the increasing importance of independence of voice in citizen journalism. Media independence for many, therefore, has come to mean working with freedom: from state control or interference, from monopoly, from market forces, as well as freedom to report, comment, create and document without fear of persecution. However, far from a stable concept that informs all media systems, the notion of media independence has long been contested, forming a crucial tension point in the regulation, shape, size and role of the media around the globe. Contributors including David Hesmondhalgh, Gholam Khiabany, José van Dijck, Hector Postigo, Anthony Fung, Stuart Allan and Geoff King demonstrate how the notion of independence has remained paramount, but contested, in ideals of what the media is for, how it should be regulated, what it should produce and what working within it should be like. They address questions of economics, labor

relations, production cultures, ideologies and social functions.

But in the dead of night Sir Neville is murdered. Who did it? As suspicion falls on each of the house guests in turn, Knox finds himself faced with deception and betrayal on all sides, and only the enigmatic Angela Marchmont seems to offer a solution to the mystery. This 1920s whodunit will delight all fans of traditional country house murder stories.

**Division Street** Robert Gumpert,2022 In 2016 the Super Bowl came to San Francisco. The unhoused were moved to Division Street where, officials hoped, they would be 'invisible'. Amid the unlimited wealth of that 'super' week, the unhoused were crowded together in tents or sleeping rough on the ground. No facilities and no promises of permanent housing were given. The voices of the unhoused on Division Street are integral to this project. Through photographs, first-person storytelling, messages left on the street, media headlines and politicians' characterizations we see the invisible.

Kincaid's New York Times bestselling novel, The Diabolic, which TeenVogue.com called "the perfect kind of high-pressure adventure." It's a new day in the Empire. Tyrus has ascended to the throne with Nemesis by his side and now they can find a new way forward—one where they don't have to hide or scheme or kill. One where creatures like Nemesis will be given worth and recognition, where science and information can be shared with everyone and not just the elite. But having power isn't the same thing as keeping it, and change isn't always welcome. The ruling class, the Grandiloquy, has held control over planets and systems for centuries—and they are plotting to stop this teenage Emperor and Nemesis, who is considered nothing more than a creature and certainly not worthy of being Empress. Nemesis will protect Tyrus at any cost. He is the love of her life, and they are partners in this new beginning. But she cannot protect him by being the killing machine she once was. She will have to prove the humanity that she's found inside herself to the whole Empire—or she and Tyrus may lose more than just the throne. But if proving her humanity means that she and Tyrus must do inhuman things, is the fight worth the cost of winning it?
