Media in Mind Daniel Reynolds,2018-11-30 Where do you end, and where do media begin? In Media in Mind, author Daniel Reynolds draws upon naturalist philosophies of the mind from John Dewey through contemporary theories of embodied and extended cognition to make the case that the lines separating media from the minds of their users are not blurry or variable so much as they never existed to begin with. Through analyses of films and video games from 1900 to the present, Media in Mind shows how media forms and technologies challenge dominant models of perception and mental representation, and how they complicate theoretical understanding of concepts like the platform and the interface. In order to do justice to the profound and literally mind-changing power of media, Reynolds argues, we need to think not so much about the relationship between media and the mind as about the roles that media play in our minds. Through this crucial distinction, Media in Mind surveys more than a century of media theory to illustrate the ways that scholars of film and digital media have situated and reconsidered a series of divisions between media, user, and world, and how these conceptual divisions have reflected and inflected their ways of understanding the mind.

This book provides practical strategies for using pop culture and technology trends to connect with easily distracted middle and high school students and hold their attention. Author Linda D. Behen addresses why school libraries are in transition and why there is a need for dramatic change. Emerging Genres in New Media Environments Carolyn R. Miller,Ashley R. Kelly,2016-11-25 This volume explores cultural innovation and transformation as revealed through the emergence of new media genres. New media have enabled what impresses most observers as a dizzying proliferation of new forms of communicative interaction and cultural production, provoking multimodal experimentation, and artistic and entrepreneurial innovation. Working with the concept of genre, scholars in multiple fields have begun to explore these processes of emergence, innovation, and stabilization. Genre has thus become newly important in game studies, library and information science, film and media studies, applied linguistics, rhetoric, literature, and elsewhere. Understood as social recognitions that embed histories, ideologies, and contradictions, genres function as recurrent social actions, helping to constitute culture. Because genres are dynamic sites of tension between stability and change, they are also sites of inventive potential. *Emerging Genres in New Media Environments* brings together compelling papers from scholars in Brazil, Canada, England, and the United States to illustrate how this inventive potential has been harnessed around the world.

Slow Journalism Megan Le Masurier, 2020-04-02 Slow Journalism has emerged in recent years to enact a critique of the limitations and dangers of the speed of much mainstream contemporary journalistic practice. There have been types of journalism produced and consumed slowly for centuries, of course. What is new is the context of hyper-acceleration and over-production of journalism, where quality has suffered, ethics are compromised and user attention has eroded. Many have been asking if there is another way to practice journalism. The emergence of Slow Journalism suggests that there is. Many international scholars and practitioners have been thinking critically about the problems wrought by speed, and are utilising the concept of slow to describe a new way of thinking about and producing journalism. This edited collection offers theoretical perspectives and case studies on the practice of slow journalism around the globe. Slow Journalism is a new practice for new times. This book was originally published as two special issues of Journalism Practice and Digital Journalism.
