Super PACs Louise I. Gerdes,2014-05-20 The passage of Citizens United by the Supreme Court in 2010 sparked a renewed debate about campaign spending by large political action committees, or Super PACs. Its ruling said that it is okay for corporations and labor unions to spend as much as they want in advertising and other methods to convince people to vote for or against a candidate. This book provides a wide range of opinions on the issue. Includes primary and secondary sources from a variety of perspectives; eyewitnesses, scientific journals, government officials, and many others.

Governing Charities Paula Maurutto,2003 Annotation Governing Charities challenges received accounts of the welfare state by highlighting the complex web of relationships that characterize the delivery of social services. In tracing the connections between the Catholic Church in Toronto and provincial and municipal governments, Paula Maurutto takes issue with the view that the welfare state marks a modern, secular, and scientific progression from a pre-1920 Golden Age when churches dominated the voluntary sector. Maurutto details how welfare bureaucracies, as they began to expand during the 1930s and 1940s, did so by building stronger links with private voluntary agencies, not by disabling them. Far from being shunted aside, voluntary organizations such as Catholic charities became increasingly entrenched within the expanding welfare state. Standardized reports, state inspections, financial audits, and social work case records, to name only a few, were emblematic of the social scientific impulse that permeated the operations of Catholic charities and enabled them to more systematically police, discipline, and regulate the lives of relief recipients and those designated as moral and social deviants. Notably, they allowed church authorities and the state to exercise greater control and supervision over the internal operations and procedures of charities, in effect enabling these institutions to govern the daily affairs of the voluntary sector.

Vitamin D in Chronic Kidney Disease Pablo A. Ureña Torres,Mario Cozzolino,Marc G. Vervloet,2016-09-21 Vitamin D deficiency, circulating levels lower than 15 ng/ml, is an epidemic disease worldwide with more than a billion people suffering of it in the beginning of the 21-century. Besides its impact on mineral and bone metabolism, these low vitamin D levels are also associated with a diversity of non-skeletal complications, among them cardiovascular disease, diabetes mellitus, multiple sclerosis, cancer, tuberculosis, and immune system dysfunction. Chronic Kidney Disease is also a very common disease, affecting more than 10% of the world population, ranging from stage 1 to stage 5 before dialysis. Approximately 1% of the population in industrialized countries is affected by end-stage renal disease (ESRD), needing a renal replacement therapy either hemodialysis or peritoneal dialysis, and ultimately by renal transplantation. Those CKD patients are more susceptible to exhibit reduced vitamin D stocks. Consequently, more than eighty percent of CKD patients have either insufficient or deficient vitamin D levels for multiple reasons.

Food Policy in the United States Parke Wilde,2013 This book offers a broad introduction to food policies in the United States. Real-world controversies and debates motivate the book's attention to economic principles, policy analysis, nutrition science and contemporary data sources. It assumes that the reader's concern is not just the economic interests of farmers, but also includes nutrition, sustainable agriculture, the environment and food security. The book's goal is to make US food policy more comprehensible to those inside and outside the agri-food sector whose interests and aspirations have been ignored. The chapters cover US agriculture, food production and the environment, international agricultural trade, food and beverage manufacturing, food retail and restaurants, food safety, dietary guidance, food labeling, advertising and federal food assistance programs for the poor. The author is an agricultural economist with many years of experience in the non-profit advocacy sector, the US Department of Agriculture and as a professor at Tufts University. The author's well-known blog on US food policy provides a forum for discussion and debate of the issues set out in the book.

Checkbook Zionism Eric Fleisch,2024-01-12 American Jews donate approximately \$2.5 billion to Israel each year. Behind all that money and influence lies a power-sharing dynamic that has left an indelible mark on the relationship between Israeli and American Jews and on the direction of Israeli society to this day. Checkbook

Zionism investigates how both parties have managed their interests, emotions, and attitudes about the important yet at times tense collaboration between them. By delving into the history of American Jews’ philanthropic giving to Israelis, Fleisch assesses the core nature of power sharing between both sides of the Jewish diaspora to the United States through in-depth contemporary case studies of the relationship between sixteen non-governmental organizations and their American Jewish donors. Field observation, document analysis, and interviews with leaders, activists, and select donors alike serve a critical role here, as Fleisch assesses whether these contemporary philanthropic associations repeat classic dynamics of power-sharing or whether they represent a marked departure from the Checkbook Zionism of old. The result is a new paradigm for evaluating power sharing that can be applied to future considerations of development in the Israel-Diaspora relationship.
