Noah's Star Jennifer Marcotte,2009-08 In an unfair event of fate, Noah's father was taken from his life before he ever got a chance to meet him. Months before Noah was born, his father tragically lost his life. Hear Noah's story about how he came to know his dad, and see family through Noah's eyes. Hear his words, feel with Noah's heart. This story will touch your heart and forever linger in your memory. See what Noah sees when he looks up at the stars. The eyes of children tell a million stories. Every full hearted laugh turns another page, each tear that falls fills a thousand paragraphs. Footnotes follow every moment of fear, and smiles speak sentences. These are moments in time, captured in a story. Each story has a name, each personality fills its pages. The kids are real, their lives are her muse; their quirks are her casts, their challenges are her treasures. As her own children grow, Jennifer marvels in the wonder of their dreams and encourages their curiosity. She finds more wisdom in their words than in all of the classrooms of the world. Every day, she gives gratitude for her children, for your children, and for innocence.

Noa Noa Paul Gauguin,1920

**Noa Noa** Paul Gauguin,1974

The Christian Sky Mark Edward Dodson,2004 Why live under a pagan sky? For thousands of years, humankind has dwelled under a dome of stars that have been grouped and identified according to ancient superstitions. Today, the official star constellations pay homage to the pagan gods and goddesses of a dark and chaotic world, a world before Christ, and yet these are the constellations that scouting groups and school children all around the world have been encouraged to learn for hundreds of years. Now, for the first time, the sky has been mapped in accordance with easy-to-find star patterns that tell the stories of the Christian faith. No telescope required. No sophisticated instruments needed. After presenting a few simple but very effective techniques for finding your way through the sky at night, the author takes you on a tour of the Christian constellations. Using new constellations inspired by stories from the Bible, you will be able to locate stars, planets, star clusters, and galaxies during any time of the night and at any time of the year. If you have ever wanted to know more about God's grandest creation but have never felt comfortable learning about ancient pagan idols, then this book will provide you with a healthy fresh start.

*Noah's Child* Eric-Emmanuel Schmitt,2016-09-01 From one of the world's biggest selling authors comes another million-copy worldwide bestseller: A beautiful and tender fable seen through the eyes of a Jewish child living in Belgium under the Nazi occupation. It is 1942 and the Jews are being deported from Belgium. Separated from his parents, seven-year-old Joseph must go into hiding. He is taken in the dead of night to an orphanage, the Villa Jaune, where the benign and enigmatic Father Pons presides over a motley assortment of children. With the ever-present threat of the Gestapo growing closer, Joseph learns that the secret of survival is to conceal his Jewish heritage. Soon Joseph also discovers that Father Pons has a secret of his own: he is risking his life not only for the boys in his care, but for the Jewish faith itself. Sensitive, funny and deeply humane, *Noah's Child* is a simple fable that reveals the complexities of faith, bravery and the human condition.

*Noah's Ark II: Annihilation and Revival of the Human Race* Dr. Z. Gilead,2021-11-09 Nowadays, most of us and not only Englishmen, often talk about the weather and our climate. We sit at night in front of our TV sets, and various meteorologists and environmental experts tell us that our planet is rapidly heating up and drying up, because of the effect of the men-made greenhouse gases. The meteorologists and environmental experts claim that these calamities are but an introduction to two imminent and much worse catastrophes: We hear these warnings of the climatologists with trepidation but leave the fight against the culprit greenhouse gases to our heads of state. They signed at least two treaties against the world's gas pollution but implemented them very feebly. If they fail their duty to the world, what can we, ordinary citizens do to ward off the danger? Therefore, we shrug our shoulders hopelessly, nervously chew our fingernails and continue with our mundane lives. However, I, a retired scientist, fearing for the fate of my children and grandchildren, could not remain idle. I decided to join the fight against the greenhouse gases to the best of my ability, however small it may be. I planned to write an extremely alarming Science Fiction novel that will scare my readers and cause at least them to join the protest marches against the irresponsible neglect of our politicians. Short of mutinying against our current leaders, we can only demonstrate and march! Consequently, I wrote an alarming SF novel in the hope that it might persuade the readers to join the millions who are now inspired by the Swedish teenage activist Greta Thunberg and protest also in the social networks against the gas pollution. Unfortunately, the Corona plague nowadays curbs more impressive protesting...
