*The Nobel Prize* Agneta Wallin Levinovitz,Nils Ringertz,2001 This wonderful book gives a comprehensive review of the Nobel prizes awarded since 1901 Reading the book is like reading a compressed history of humankind in the twentieth century. It shows how by and large the Nobel prizes have indeed tracked the epoch-making events in this turbulent century.M VeltmanNobel Laureate in Physics (1999)Emeritus Professor of PhysicsUniversity of Michigan, Ann Arbor

100 Years of Nobel Prizes Baruch Aba Shalev,2002 Winning a Nobel Prize is unquestionably the highest possible recognition of intellectual and personal achievement. This book provides a detailed statistical analysis of what is required to win a Nobel, why it sometimes takes a long time to collect the award, and what the prizes have meant to human progress.

**I am the Smartest Man I Know** Giaever Ivar,2016-11-04 A unique individual with a fascinating life story, Ivar Giaever is a scientist who won the Nobel Prize in Experimental Physics in 1973. In his own words, Giaever relates an absorbing tale of how important luck and good fortune have been in shaping his life. He narrates the story of an ordinary childhood in Norway and an unremarkable undergraduate career at university. After finishing his

engineering degree, he served in the Norwegian army and married his childhood sweetheart, Inger Skramstad. His desire to make a better life for his new family led Ivar to Canada and then to the United States. Even without an advanced degree in a scientific field, Ivar was given the opportunity to work with cutting-edge scientific researchers at General Electric R&D in Schenectady, New York. While there, he completed his PhD at Rensselaer Polytechnic Institute -- one of the United States' oldest technological universities. His work on superconductivity led to worldwide recognition and the Nobel Prize. This memoir is more than the story of an accomplished, world-renowned scientist: it is an engaging reminiscence of an independent, highly creative thinker and problem solver who loves games and puzzles, skiing and windsurfing, and time with friends and family. Dr Ivar Giaever's fascinating story intertwines his views on the nature of science, scientific processes, contemporary issues such as global warming, and the great benefits the Nobel Prize has afforded him. Written with humor and often tongue-in-cheek, 'I am the Smartest Man I know' is one man's meditation on science, intellectual inquiry, and life itself.

**Nobel Laureates and Twentieth-Century Physics** Mauro Dardo, 2004-10-14 In this richly-illustrated 2004 book the author combines history with real science. Using an original approach he presents the major achievements of twentieth-century physics - for example, relativity, quantum mechanics, atomic and nuclear physics, the invention of the transistor and the laser, superconductivity, binary pulsars, and the Bose-Einstein condensate - each as they emerged as the product of the genius of those physicists whose labours, since 1901, have been crowned with a Nobel Prize. Here, in the form of a year-by-year chronicle, biographies and revealing personal anecdotes help bring to life the main events of the past hundred years. The work of the most famous physicists of the twentieth century - great names, like the Curies, Bohr, Heisenberg, Einstein, Fermi, Feynman, Gell-Mann, Rutherford, and Schrödinger - is presented, often in the words and imagery of the prize-winners themselves.

**Neighbouring Nobel** Henry Nielsen, Keld Nielsen, 2001 To commemorate the centennial of the Nobel Prize in 2001, and in the light of recent, critical Nobel research, this volume provides an historical analysis of the work, the people, and the stories behind the thirteen Nobel Prizes awarded to Danes so far. This represents the first time that the Nobel population of a single country has been treated in depth as a unit. Danes have been awarded all five of the 'classic' Nobel Prizes: one Peace Prize, three Literature, three Physics, one Chemistry, and five Physiology or Medicine Prizes. Although only one recipient is internationally famous -- Niels Bohr, who won the Prize in 1922 for his application of quantum ideas to atomic structure -- the more obscure laureates are of interest precisely because they are obscure. Why were they selected? Who were they up against? How was the news about their prize received by colleagues abroad? Did the honor help or hinder their subsequent careers? Prior to 1974, all deliberations behind the awarding of the Prize were strictly confidential. In that year, the Nobel Foundation granted access to the archives relating to prizes more than fifty years old, and this now applies to nine of the Danish prizes. With regard to these prizes, the book explores what went on behind the scenes -- who nominated the laureates, how their achievements were assessed, and what role politics may have played. On the four more recent prizes, the authors interviewed the laureates about the work the Prize rewarded and the Prize's personal and professional aftermath. Before this book, such questions were impossible to answer, since nothing had been written about the circumstances that led to any of the Danish prizes, nor about how any of the thirteen laureates felt about receiving the most prestigious validation possible for a person's work. Neighbouring Nobel will be a valuable addition both to the literature on the Nobel Prize and to the study of 20th century Danish history.

*Nobel* Michael Worek,2010 The Nobel Prize is widely regarded as the most prestigious award one can receive. The Prize is administered by the Nobel Foundation, and the award ceremonies receive extensive media coverage. The awards are often politically controversial, and many winners use their acceptance speech to further personal causes. Along with background information, the book provides a look at the 200 most famous and most interesting Nobel winners. They are profiled by prize and by year. A photo or illustration appears with each profiled Laureate. Other illustrations help to explain complex subjects in science and make it easier for the reader to appreciate the accomplishments for which the prize has been awarded. A number of fascinating facts emerge from this lively account. For example, only 34 of about 800 Nobel Laureates have been women, among them Marie Curie, who won twice. Linus Pauling is the only person to have been awarded two unshared Nobel Prizes, the 1954 Nobel Prize in Chemistry and the 1962 Nobel Peace Prize. The youngest Laureate is Lawrence Bragg, who was 25 years old when he received the Nobel Prize in Physics with his father in 1915. The oldest is 90-year-old Leonid Hurwicz, who received the 2007 Economics Prize. Two Laureates have declined the Nobel Prize: Jean-Paul Sartre, and Le DucTho. Other famous names include Ernest Hemingway, Albert Einstein, Albert Schweitzer, and James Watson and Francis Crick, discoverers of DNA. Nobel: A Century of Prize Winners is sure to find a readership among the millions who follow the awards each year and want to understand more about the most important prize in the world. AUTHOR: Michael Worek is an editor and publisher with a background in international history. b/w photographs

The Nobel Prize Winners in Literature, 1901-1931 (Classic Reprint) Annie Russell Marble,2018-10-12 Excerpt from The Nobel Prize Winners in Literature, 1901-1931 Thirty years have passed since the first awards were made from the Nobel Foundation to those persons who shall have contributed most materially to benefit mankind, in physics, chemistry, medicine, in the field of literature, and the promotion of peace. The Nobel Foundation calls these recipients laureates. In these days of fleeting interests and restless moods, it is difficult to keep public attention focused upon annual events of an unsensational kind. Clever devices are used to gain publicity for recurring events. The Nobel Institutes have resorted to no such baits to keep interest alive; they work quietly and secretly, yet every year, for three decades, the press of every country has shown expectant interest in the

annual awards, while discussion of the Laureates. Especially in literature, has become more urgent, and sometimes turbulent, in later years. Whether the choice of the Swedish Academy judges is approved or regretted, the interest is vital, both in speculation and in retrospect. About the Publisher

**Nobel Prize Women in Science** Sharon Bertsch McGrayne, 1998 Only nine of the more than 300 Nobel prizes awarded in science since 1901 have been won by women, notes science writer Bertsch as she sets the context for the biographical essays that follow. Examining the careers and lives of 14 women scientists who either won a Nobel Prize or played a crucial role in a Nobel winning project, she movingly depicts their battles against gender discrimination for recognition and respect and she describes the self-conflict about their roles. Subjects range from Marie Curie (1867-1934) to such contemporaries as Rosalyn Yalow, awarded a Nobel Prize in 1977 for her work as a medical physicist, and Jocelyn Bell Burnell, an astrophysicist credited, at the age of 24, with the 1968 discovery of pulsars, who made large personal sacrifices for her science.

**The Beginner's Guide to Winning the Nobel Prize** Peter Doherty, 2006 In *The Beginner's Guide to Winning the Nobel Prize*, Doherty recounts his unlikely path to becoming a Nobel Laureate. Beginning with his humble origins in Australia, he tells how he developed an interest in immunology and describes his award-winning, influential work with Rolf Zinkernagel on T-cells and the nature of immune defense. In prose that is at turns amusing and astute, Doherty reveals how his nonconformist upbringing, sense of being an outsider, and search for different perspectives have shaped his life and work. Doherty offers a rare, insider's look at the realities of being a research scientist. He lucidly explains his own scientific work and how research projects are selected, funded, and organized; the major problems science is trying to solve; and the rewards and pitfalls of a career in scientific research. For Doherty, science still plays an important role in improving the world, and he argues that scientists need to do a better job of making their work more accessible to the public. Throughout the book, Doherty explores the stories of past Nobel winners and considers some of the crucial scientific debates of our time, including the safety of genetically modified foods and the tensions between science and religion. He concludes with some tips on how to win a Nobel Prize, including advice on being persistent, generous, and culturally aware, and he stresses the value of evidence. *The Beginner's Guide to Winning the Nobel Prize* is essential reading for anyone interested in a career in science.

**The World's Most Prestigious Prize** Geir Lundestad, 2019-09-12 *The World's Most Prestigious Prize: The Inside Story of the Nobel Peace Prize* is a fascinating, insider account of the Nobel peace prize. Drawing on unprecedented access to the Norwegian Nobel Institute's vast archive, it offers a gripping account of the founding of the prize, as well as its highs and lows, triumphs and disasters, over the last one-hundred-and-twenty years. But more than that, the book also draws on the author's unique insight during his twenty-five years as Director of the Norwegian Nobel Institute and Secretary of the Norwegian Nobel Committee. It reveals the real story of all the laureates of that period - some of them among the most controversial in the history of the prize (Gorbachev, Arafat, Peres and Rabin, Mandela and De Klerk, Obama, and Liu Xiaobo) - and exactly why they came to receive the prize. Despite all that has been written about the Nobel Peace Prize, this is the first-ever account written by a prominent insider in the Nobel system.

**A Century of Nobel Prize Recipients** Francis Leroy, 2003-03-13 Celebrating a century of revolutionary contributions to our understanding of life, the world, and the universe, this encyclopedic desk reference traces the discoveries that earned nearly 500 distinguished scientists Nobel honors in the

areas of chemistry, physics, and medicine. The School of Library Journal called it ...eye-catching... Original ar
