Lapland: A Natural History Derek Ratcliffe, 2010-06-30 This stunning new Poyser title looks at the flora and fauna of Lapland - that area of northern Europe and northwestern Russia which lies within the Arctic circle. After general introductions, the book examines the Lapland ecosystems and species by habitat type, with one chapter dealing with freshwater habitats, another with open tundra and so on. The history of natural history study in the region, and the conservation issues affecting it today, are also discussed. The book is illustrated throughout with a wealth of the author's own colour photographs, and there are also some line drawings and a number of maps and other figures to illustrate key points. This is a wonderfully evocative book which creates a vivid sense of place for one of the planet's last wildernesses, and will appeal to anyone who loves wildlife and wild places. A rare window onto one of Europe's most unspoiled areas, by the outstanding British field naturalist of the late 20th century. The Independent An informative and easy-to-read text on a part of the natural world unfamiliar to many. It is a fascinating, enjoyable book. Wildlife Activist, Summer 2006

Authentic Norwegian Cooking Astrid Karlsen Scott, 2015-03-10 Norway is a culturally rich country, covered in snow the majority of the year, filled with mountainous terrain, and populated by sincere people. With this book, you too can enjoy all of Norway's finest traditional foods. With more than 300 recipes gathered from throughout Norway, this Authentic Norwegian Cooking is easy to use, includes recipes for every occasion, provides the history of the dishes, and includes a complete index and recipe titles in English and Norwegian. Included among full-color photographs are the recipes for delectable dishes, such as: • Pickled mackerel • Marinated salmon • Stuffed cabbage leaves • Lamb roll • Bergen pretzels • Spinach pie • Rhubarb soup • Thick rice pancakes • Sweet cardamom bread • Marzipan cake • And more! Astrid Karlsen Scott a native of Norway, is internationally known for her books on Norwegian culture. Her award-winning video, Christmas in Norway, has been shown on television in the United States and in Europe. She is also president of Nordic Adventure, a company dedicated to the promotion of Norwegian culture. She and her husband, Melvin McCabe Scott, Jr., live in Olympia, Washington. Skyhorse Publishing, along with our Good Books and Arcade imprints, is proud to publish a broad range of cookbooks, including books on juicing, grilling, baking, frying, home brewing and winemaking, slow cookers, and cast iron cooking. We've been successful with books on gluten-free cooking, vegetarian and vegan cooking, paleo, raw foods, and more. Our list includes French cooking, Swedish cooking, Austrian and German cooking, Cajun cooking, as well as books on jerky, canning and preserving, peanut butter, meatballs, oil and vinegar, bone broth, and more. While not every title we publish becomes a New York Times bestseller or a national bestseller, we are committed to books on subjects that are sometimes overlooked and to authors whose work might not otherwise find a home.

Utdrag: Fugler (Aves) er tobeinte, varmblodige virveldyr som nedstammer fra de skjellkledte, oglelignende sauropsidene. Fugler karakteriseres imidlertid av en fjaerkledt kropp, et hode der munnen former et nebb av hornstoff, forlemmer som har utviklet seg til vinger, og en hul beinbygning som gjør individet svært lett i forhold til størrelsen. Den siste resten av skjellkledningen som dekket deres fjerne forfedre, finnes på lemmene deres, men hos noen arter er også disse sporene forsvunnet. I de tilfeller er lemmene dekket av fjaer. Avhengig av hva man regner som en art, finnes det i dag nærmere 10 000 fuglearter i verden. Fuglene varierer mye i størrelse. Den minste arten er bikolibri som kun veier omkring 2 g, mens den største er strutsen som kan veie opp mot 100 kg. Fugler er svært forskjellige, også med hensyn til ernæring. De fleste artene er dagaktive, men noen er også nattaktive, for eksempel ugler. Noen

arter er svært gode flygere som kan vaere pa vingene i flere ar (seilere), uten a vaere nedom landjorden, mens andre tilbringer hele eller store deler av livet pa bakken (kivier), traerne (kakapo) eller i tilknytning til vann (pingviner, andefugler). Mange trives best i tropiske eller subtropiske strok, mens andre har tilpasset seg den tempererte eller

The Zoological Record, 1923 Indexes the world's zoological and animal science literature, covering all research from biochemistry to veterinary medicine. The database provides a collection of references from over 4,500 international serial publications, plus books, meetings, reviews and other non-serial literature from over 100 countries. It is the oldest continuing database of animal biology, indexing literature published from 1864 to the present. Zoological Record has long been recognized as the unofficial register for taxonomy and systematics, but other topics in animal biology are also covered.

The Gyr Falcon Evgeni Potapov, Richard Sale, 2005-01-01 This book is the definitive guide to the largest and most charismatic species of falcon in the world, the Gyr Falcon. With detailed information on life history characteristics, ecology, conservation issues, and much more, the book presents the most accurate, up-to-date, and complete view of this spectacular bird ever published. Drawing on extensive research and travel to every country within the range of the Gyr Falcon, Eugene Potapov and Richard Sale delineate a new map of the bird's range, conclude that the Gyr Falcon is more adaptable than previously thought, and restore the traditional Linnean scientific name of the species, *Falco gyrfalco*. The authors also reveal that Gyrfalcons, for much of their lives, are true stenophagous raptors, a rarity not only among raptors but among all birds. Elegantly illustrated with many photographs and line drawings, this is an essential volume for ornithologists, ecologists, wildlife rehabilitators, falconers, and all others fascinated by birds of prey.

The Birds Tarjei Vesaas, 2016-05-03 "Tarjei Vesaas has written the best Norwegian novel ever, *The Birds*— it is absolutely wonderful, the prose is so simple and so subtle, and the story is so moving that it would have been counted amongst the great classics from the last century if it had been written in one of the major languages." — Karl Ove Knausgaard *The Birds* tells the story of Mattis, a deeply sensitive, intellectually disabled young man living in a small house in the Norwegian countryside with his sister Hege. Eking out a modest living knitting sweaters, Hege encourages her brother to find work to ease their financial burdens, but his attempts come to nothing. When he finally sets himself up as a ferryman, the only passenger he manages to bring across the lake is a lumberjack, Jørgen. But when Jørgen and Hege become lovers, Mattis finds the safety of his familial life threatened and his jealousy quickly spirals. In *The Birds*, Norway's most celebrated writer of the twentieth century allows us to rediscover the world. By turns frightening, beautiful, confounding, and full of mystery, it is a world we come to see more vividly through Mattis's eyes.

Fennoscandian Tundra Ecosystems Frans Emil Wielgolaski, P. Kallio, H. Kauri, E. Ostbye, T. Rosswall, 2012-12-06 Animals are important components of any ecosystem and it is impossible to describe structure and functioning of the Fennoscandian tundra ecosystems without including this part of the system. However, the strong diversity between functionally highly different fauna groups makes it impossible to study all groups in great detail with the funds and expertise available in Fennoscandia. Relatively few productivity studies were carried out on animals in Fennoscandian tundra regions before the IBP projects started in 1969-1970. Within IBP, more fauna groups have been investigated in the Norwegian tundra project than in the other countries, due to better financial support. Even in Norway, however, only a limited number of invertebrate and vertebrate taxons is studied. General lack of information on the same animals in various parts of the Fennoscandian tundra makes it more difficult to present structural and functional comparisons of fauna for the whole region than in plants and microorganisms (see Part 1 of Fennoscandian Tundra

Ecosystems). Brief surveys on faunal problems within the area are given in the introduction to the animal section, and general aspects are also discussed in the four first papers of the volume.

Tundra Plovers Des Thompson, Ingvar Byrkjedal, 2011-11-30 There are four species of tundra plover: the Grey Plover, and the Eurasian, Pacific, and American golden plovers. They breed only in the northern hemisphere, principally on tundra, and migrate far south to coastal mudflats, saltings and agricultural landscapes. They have attracted avid interest from birdwatchers and researchers worldwide, not least the authors who have studied all four species. The Eurasian Golden Plover has a special claim to fame as questions over its flight speed first prompted the compilation of the world bestseller the Guinness Book of Records! This ground-breaking book on shorebirds (waders) examines the taxonomy, appearance, behaviour, ecology and conservation of Golden and Grey plovers, and compares and contrasts their natural history and biogeography. There are detailed accounts on all aspects of their lifestyle including feeding, mating, parental care, moults, migration and avoidance of predators. The personal touches in this book add immensely to its value, not least the authors' first hand experiences of the birds and their haunts. Most of their work presented here has not been published before, adding to the significance of this highly original book. Long-awaited considerations of differences in plumage, vocalisations, habitat use, breeding, movements and food are included. The links between phylogeny, biogeography and behaviour are bound to excite interest. The comparative approach is highly detailed and refreshing, and marks the book as a classic. Ingvar Byrkjedal has also contributed all of the wonderful colour and line illustrations. Over fifty-five photographs, over one hundred and twenty tables and figures, and many other embellishments complete this definitive book.

Winter Birds Lars Jonsson, 2017-10-19 In this stunning book, Lars Jonsson celebrates and explores the beauty of the birds that surround him during the Swedish winter months. Inspired by the desolate, wintry landscapes, the dazzling light and the stark contrast of colours he observes against the snow, Jonsson has created an unparalleled collection of art. Jonsson illustrates each bird in his classic style, and his text provides information on their behaviour and insights into how to identify them as he shares personal observations as both an artist and ornithologist. This unique combination offers an intimate and compelling opportunity to better understand the method behind one of the world's preeminent bird artists.

The Archaeology of Prehistoric Coastlines Geoff Bailey, John Parkington, 1988-04-07 The Archaeology of Prehistoric Coastlines offers a conspectus of recent work on coastal archaeology examining the various ways in which hunter-gatherers and farmers across the world exploited marine resources such as fish, shellfish and waterfowl in prehistory. Changes in sea levels and the balance of marine ecosystems have altered coastal environments significantly over the last ten thousand years and the contributors assess the impact of these changes on the nature of human settlement and subsistence. An overview of coastal archaeology as a developing discipline is followed by ten case studies from a wide variety of places including Scandinavia, Japan, Tasmania and New Zealand, Peru, South Africa and the United States.

In Search of Arctic Birds Richard Vaughan, 2010-10-30 Arctic birds have long held a fascination for Richard Vaughan, whose trips to the region, watching and photographing birds, have provided the raw material for a number of previous publications. Here, he focuses on the historical aspects of Arctic ornithology, bringing to life not only the birds but the activities of those who have lived with them, or explored in search of them. A general introduction to the Arctic and the forces that shape its bird populations and their biology is followed by sections on native peoples, whaling

and discovery ships, and the famous ornithologists who have investigated these often inhospitable habitats. Conservation, both of individual species and of habitats, is discussed against the background of threats to the Arctic environment. Since half the Arctic lies in Russia, detailed consideration is naturally given to Arctic bird studies in that country, as well as in North America and Greenland. Purely ornithological interludes look in detail at the Gyrfalcon, Knots, Ross's Gull, geese, divers, Snowy Owls and many more. The book includes practical advice on how to visit the Arctic and where and when to go. Richard Vaughan's own photographs and the drawings of Swedish artist Gunnar Brusewitz do real justice to the beauty of both the environment and its birds.

The Goshawk Robert Kenward, 2010-01-30 A large and spectacular bird of prey, the Goshawk lives in boreal forests throughout the Northern hemisphere. The Goshawk is an authoritative yet highly readable monograph of the species. A powerful hunter of large birds and woodland mammals, it was persecuted for many years by game keepers to the point of extinction in the UK. However, escaped falconry birds led to the establishment of a new population in the 1960s, though the species remains rare and elusive - birders need a combination of hard work and a little luck to see this magnificent raptor. The Goshawk includes chapters on nomenclature, races and morphs, biometrics, nesting, incubation and chick-rearing, migration, feeding ecology, population dynamics, and conservation, punctuated throughout with illuminating tales from author Robert Kenward's extensive field research. The book is packed with illustrations, figures and maps, and contains a selection of the author's superb photographs of the birds. The product of almost 30 years work, this title is a classic Poyser monograph; birders will enjoy the fascinating insights into the biology of the bird, while academics will appreciate the book's comprehensive literature review.
