Innovative Methods in Logistics and Supply Chain Management, 2014

Wikinomics Don Tapscott, Anthony D. Williams, 2008-04-17 The acclaimed bestseller that's teaching the world about the power of mass collaboration. Translated into more than twenty languages and named one of the best business books of the year by reviewers around the world, Wikinomics has become essential reading for business people everywhere. It explains how mass

collaboration is happening not just at Web sites like Wikipedia and YouTube, but at traditional companies that have embraced technology to breathe new life into their enterprises. This national bestseller reveals the nuances that drive wakinomics, and share fascinating stories of how masses of people (both paid and volunteer) are now creating TV news stories, sequencing the human genome, remixing their favorite music, designing software, finding cures for diseases, editing school texts, inventing new cosmetics, and even building motorcycles.

Social and Sustainability Marketing Jishnu Bhattacharyya,Manoj Kumar Dash,Chandana Hewege,M.S. Balaji,Weng Marc Lim,2021-09-26 ... an important intervention in the conversation around social and ecological sustainability that draws on both micromarketing and macromarketing scholarship to help the reader understand the challenges with

illustrations from insightful cases both from emerging and developed economies. This compilation should be essential reading for the discerning student of sustainable consumption and production.

-- Professor Pierre McDonagh, Associate Editor, Journal of Macromarketing (USA); Professor of Critical Marketing & Society, University of Bath, UK Experts in the field of economics, management science, and particularly in the marketing domain have always been interested in and acknowledged the importance of sustaining profitable businesses while incorporating societal and environmental concerns; however, the level of existing literature and availability of teaching cases reflect a dearth of real case studies, especially those focused on marketing for social good. This book of actual case studies will address that need. In addition, this book is important and timely in providing a case book for instructors (those in both industry and academia) to help them in teaching and training the next generation of leaders through corporate training and universities. Currently, marketing for social good is increasingly becoming a part of most curriculums under the umbrella of different titles, such as social marketing, green marketing, and sustainability marketing. The relevance of these studies is increasing across the globe. This book is composed of long and short real cases with varying complexity in different sectors. This case book will also cover some review articles for an overview of the recent developments in the study area. With these case studies, collections of questions, teaching materials, and real-life

marketing scenarios, this book offers a unique source of knowledge to marketing professionals, students, and educators across the world. The main objective of this case book is to understand the applicability of marketing science (marketing for social good context, such as social marketing and sustainability marketing) in internet marketing related to e-buying behavior and e-WOM. In addition, it illustrates the various types of existing marketing practices that are relevant from both theoretical and practical points of view in this electronic era, as well as discussing other non-electronic marketing practices and focusing on consumer buying behavior. As a result, marketing managers can treat their customers according to their desired value. This book particularly explores the possibilities and advantages created by social marketing and sustainability marketing through the presentation of thorough review articles and case studies. This case book helps corporate training centers and universities with compact teaching reference materials in their relevant courses.

Stakeholder Management and Social Responsibility
Ovidiu Nicolescu,Ciprian Nicolescu,2021-12-24 The main objective of this book is to provide an innovative set of concepts and tools regarding company management, internal and external stakeholders and social responsibilities, reflecting the necessities and opportunities generated by the digital transformation, the transition to a knowledge-based economy, and the COVID-19 crisis. The book, based on a holistic vision and contextual approach of business, contributes to the development of company management and stakeholder and social responsibility theories and practices, being structured in 12 chapters. The original company management vision, approaches, and tools are based on three pillars: a new manager-relevant stakeholder rather than manager-subordinate managerial paradigm; a new type of company social responsibility rather than corporate social responsibility; and a new concept of company-relevant stakeholder rather than that of salient stakeholders. The book contains two innovative managerial mechanisms: the managerial synapse and company-relevant stakeholders-based management system able to help companies and stakeholders face successfully the challenges of digital transformation and the COVID-19 crisis and to generate greater organization functionality and performance. The book will be of interest to

company managers and management specialists, management academics, consultants and researchers, and MBA students interested in a style of management with social responsibility at the forefront.

Innovation for Sustainability Nancy Bocken, Paavo Ritala, Laura Albareda, Robert Verburg, 2019-02-22

The aim of this edited book is to provide a comprehensive overview of the opportunities and challenges related to innovation for sustainability. Combining work from both emerging and established scholars in different academic fields, this book provides an integrated understanding of the topic from four perspectives. First, the big picture: frameworks, types, and drivers; second, strategy and leadership; third, measurement and assessment and fourth, tools, methods and technologies. Chapter 11 of this book is available open access under a CC BY 4.0 license at link.springer.com. The editors donate their remuneration for this book to conservation organisation the WWF.

Shaping the Emerging World Waheguru Pal Singh Sidhu, Pratap Bhanu Mehta, Bruce D. Jones, 2013-08-01
India faces a defining period. Its status as a global power is not only recognized but increasingly institutionalized, even as geopolitical shifts create both opportunities and challenges. With critical interests in almost every multilateral regime and vital stakes in emerging ones, India has no choice but to influence the evolving multilateral order. If India seeks to affect the multilateral order, how will it do so? In the past, it had little choice

but to be content with rule taking—adhering to existing international norms and institutions. Will it now focus on rule breaking—challenging the present order primarily for effect and seeking greater accommodation in existing institutions? Or will it focus on rule shaping—contributing in partnership with others to shape emerging norms and regimes, particularly on energy, food, climate, oceans, and cyber security? And how do India's troubled neighborhood, complex domestic politics, and limited capacity inhibit its rule-shaping ability? Despite limitations, India increasingly has the ideas, people, and tools to shape the global order—in the words of Jawaharlal Nehru, not wholly or in full measure, but very substantially. Will India emerge as one of the shapers of the emerging international order? This volume seeks to answer that question.

Ch@nge ,2013 The Internet has so entirely transformed virtually all aspects of everyday life that it seems almost impossible to assess its impact. Here, 19 esteemed scholars from around the world tackle the topic from different angles. Manuel Castells, David Gelernter, Juan Ignacio Vázquez, Evgeni Morozov, Mikko Hyppönen, Yochai Benkler, Federico Casalegno, David Crystal, Lucien Engelen, Patrik Wikström, Peter Hirshberg, Paul DiMaggio and Edward Castranova address such matters as the Internet of things; the sociology of the Internet; cybercrime and Internet security; the future of work; the Internet and urban-rural sustainability; the Worldstream and the Cybersphere; gaming and society; the Internet's influence on languages and new economic systems; the massive changes wrought by the net in the music industry; and other aspects of its many cultural, social and political ramifications.

The Future of Work Darrell M. West,2018-05-15

Looking for ways to handle the transition to a digital economy Robots, artificial intelligence, and driverless cars are no longer things of the distant future. They are with us today and will become increasingly common in coming years, along

with virtual reality and digital personal assistants. As these tools advance deeper into everyday use, they raise the question—how will they transform society, the economy, and politics? If companies need fewer workers due to automation and robotics, what happens to those who once held those jobs and don't have the skills for new jobs? And since many social benefits are delivered through jobs, how are people outside the workforce for a lengthy period of time going to earn a living and get health care and social benefits? Looking past today's headlines, political scientist and cultural observer Darrell M. West argues that society needs to rethink the concept of jobs, reconfigure the social contract, move toward a system of lifetime learning, and develop a new kind of politics that can deal with economic dislocations. With the U.S. governance system in shambles because of political polarization and hyper-partisanship, dealing creatively with the transition to a fully digital economy will vex political leaders and complicate the adoption of remedies that could ease the transition pain. It is imperative that we make major adjustments in how we think about work and the social contract in order to prevent society from spiraling out of control. This book presents a number of proposals to help people deal with the transition from an industrial to a digital economy. We must broaden the concept of employment to include volunteering and parenting and pay greater attention to the opportunities for leisure time. New forms of identity will be possible when the job no longer defines people's sense of personal meaning, and

they engage in a broader range of activities. Workers will need help throughout their lifetimes to acquire new skills and develop new job capabilities. Political reforms will be necessary to reduce polarization and restore civility so there can be open and healthy debate about where responsibility lies for economic well-being. This book is an important contribution to a discussion about tomorrow—one that needs to take place today.

The Search for Europe Daron Acemoglu, Alberto Alesina, Christopher J. Bickerton, 2016 This volume is now the eighth in the annual series sponsored by BBVA as part of its OpenMind initiative, which is devoted to disseminating knowledge on key issues of our time. The Search for Europe analyses the present and future of the old continent and its integration project, surely the most ambitious political and economic integration project ever attempted in history, a benchmark for similar processes in other regions. The book is divided into three main sections: The economic foundations of the European project, Europe and its nations: Politics, society and culture, and The unresolved Limits of Europe and the new global powers. It features pieces written by international experts such as Javier Solana, Barry Eichengreen, Philip Cooke, Bichara Khader, Vivien Ann Schmidt, John Peet and Thomas Christiansen, among others.
