WDM Systems and Networks Neophytos (Neo) Antoniadou, Georgios Ellinas, Ioannis

Roudas, 2011-12-08 Modeling, Simulation, Design and Engineering of WDM Systems and Networks provides readers with the basic skills, concepts, and design techniques used to begin design and engineering of optical communication systems and networks at various layers. The latest semi-analytical system simulation techniques are applied to optical WDM systems and networks, and a review of the various current areas of optical communications is presented. Simulation is mixed with experimental verification and engineering to present the industry as well as state-of-the-art research. This contributed volume is divided into three parts, accommodating different readers interested in various types of networks and applications. The first part of the book presents modeling approaches and simulation tools mainly for the physical layer including transmission effects, devices, subsystems, and systems), whereas the second part features more engineering/design issues for various types of optical systems including ULH, access, and in-building systems. The third part of the book covers networking issues related to the design of provisioning and survivability algorithms for impairment-aware and multi-domain networks. Intended for professional scientists, company engineers, and university researchers, the text demonstrates the effectiveness of computer-aided design when it comes to network engineering and prototyping.

Spon's Civil Engineering and Highway Works Price Book 2019 AECOM,2018-11-13 SPON'S CIVIL ENGINEERING AND HIGHWAY WORKS PRICE BOOK 2019 from AECOM gives costs for both general and civil engineering works and highway works. It provides a full breakdown of labour, plant and material elements, with labour rates updated. cost guidance is given at a number of levels, varying from the more general functional costs to detailed resource costing, and in conformity with CESMM4 and the Highways Method of Measurement. In this 33rd edition: More emphasis has been given to sampling from major projects – of £20-£100m in value with no acute access or ground condition problems and run under NEC contracts. The rates, prices and outputs in the Resources and Unit Cost calculations include allowances for wastage, normal productivity and efficiency. Plus prices from specialists More research with contractors and suppliers allows for a more confident forecast in a volatile market – but outliers have been largely excluded. Prices are based more strongly on global structural steel grades and rates and extrapolated accordingly. Pipe lining is now included, as being more effective and economical than replacement of pipes in maintenance drainage works. Consideration is given to the possible scarcity of skilled labour. Novel Methods for Monitoring and Managing Land and Water Resources in Siberia Lothar Mueller,Askhad K. Sheudshen,Frank Eulenstein,2015-11-15 This book presents an analysis of land and water resources in Siberia, initially characterizing the landscapes, their ecosystems, crucial processes, human impacts on soil and water quality, and the status quo of available research. Further chapters deal with modern monitoring and management methods that can lead to a significant knowledge shift and initiate sustainable soil and water resources use. These include soil hydrological laboratory measurement methods; process-based field evaluation methods for land and water quality; remote sensing and GIS technology-based landscape monitoring methods; process and ecosystem modeling approaches; methods of resource and process evaluation and functional soil mapping; and tools for controlling agricultural land use systems. More than 15 of these concrete monitoring and management tools can immediately be incorporated into research and practice. Maintaining the

functions of great landscapes for future generations will be the reward for these efforts.

Scientific and Statistical Database Management Judith Bayard Cushing,James French,Shawn Bowers,2011-07-01 This book constitutes the refereed proceedings of the 23rd International Conference on Scientific and Statistical Database Management, SSDBM 2011, held in Portland, OR, USA, in July 2011. The 26 long and 12 short papers presented together with 15 posters were carefully reviewed and selected from 80 submissions. The topics covered are ranked search; temporal data and queries; workflow and provenance; querying graphs; clustering and data mining; architectures and privacy; and applications and models.

Human Behavior Understanding in Networked Sensing Paolo Spagnolo,Pier Luigi Mazzeo,Cosimo Distanto,2014-11-06 This book provides a broad overview of both the technical challenges in sensor network development, and the real-world applications of distributed sensing. Important aspects of distributed computing in large-scale networked sensor systems are analyzed in the context of human behavior understanding, including topics on systems design tools and techniques. Additionally, the book examines a varied range of applications. Features: contains valuable contributions from an international selection of leading experts in the field; presents a high-level introduction to the aims and motivations underpinning distributed sensing; describes decision-making algorithms in the presence of complex sensor networks; provides a detailed analysis of the design, implementation, and development of a distributed network of homogeneous or heterogeneous sensors; reviews the application of distributed sensing to human behavior understanding and autonomous intelligent vehicles; includes a helpful glossary and a list of acronyms.

Factfulness Hans Rosling,Anna Rosling Rönnlund,Ola Rosling,2018-04-03 INSTANT NEW YORK TIMES BESTSELLER “One of the most important books I’ve ever read—an indispensable guide to thinking clearly about the world.” – Bill Gates “Hans Rosling tells the story of ‘the secret silent miracle of human progress’ as only he can. But Factfulness does much more than that. It also explains why

progress is so often secret and silent and teaches readers how to see it clearly.” —Melinda Gates

Factfulness by Hans Rosling, an outstanding international public health expert, is a hopeful book about the potential for human progress when we work off facts rather than our inherent biases. - Former U.S. President Barack Obama

Factfulness: The stress-reducing habit of only carrying opinions for which you have strong supporting facts. When asked simple questions about global trends—what percentage of the world’s population live in poverty; why the world’s population is increasing; how many girls finish school—we systematically get the answers wrong. So wrong that a chimpanzee choosing answers at random will consistently outguess teachers, journalists, Nobel laureates, and investment bankers. In Factfulness, Professor of International Health and global TED phenomenon Hans Rosling, together with his two long-time collaborators, Anna and Ola, offers a radical new explanation of why this happens. They reveal the ten instincts that distort our perspective—from our tendency to divide the world into two camps (usually some version of us and them) to the way we consume media (where fear rules) to how we perceive progress (believing that most things are getting worse). Our problem is that we don’t know what we don’t know, and even our guesses are informed by unconscious and predictable biases. It turns out that the world, for all its imperfections, is in a much better state than we might think. That doesn’t mean there aren’t real concerns. But when we worry about everything all the time instead of embracing a worldview based on facts, we can lose our ability to focus on the things that threaten us most. Inspiring and revelatory, filled with lively anecdotes and moving stories, Factfulness is an urgent and essential book that will change the way you see the world and empower you to respond to the crises and opportunities of the future. --- “This book is my last battle in my life-long mission to fight devastating ignorance...Previously I armed myself with huge data sets, eye-opening software, an energetic learning style and a Swedish bayonet for sword-swallowing. It wasn’t enough. But I hope this book will be.” Hans Rosling, February 2017.

Emergency and Disaster Management: Concepts, Methodologies, Tools, and Applications

Management Association, Information Resources, 2018-07-06 In a world of earthquakes, tsunamis, and terrorist attacks, emergency response plans are crucial to solving problems, overcoming challenges, and restoring and improving communities that have been affected by these catastrophic events. Although the necessity for quick and efficient aid is understood, researchers and professionals continue to strive for the best practices and methodologies to properly handle such significant events. Emergency and Disaster Management: Concepts, Methodologies, Tools, and Applications is an innovative reference source for the latest research on the theoretical and practical components of

initiating crisis management and emergency response. Highlighting a range of topics such as preparedness and assessment, aid and relief, and the integration of smart technologies, this multi-volume book is designed for emergency professionals, policy makers, practitioners, academicians, and researchers interested in all aspects of disaster, crisis, and emergency studies.

The Fat Guy from Greenwich Jane Genova,2009-11 The Fat Guy From Greenwich is an earthy ironic peek at the underbelly of ambition and success in America. The time frame extends from the 1990s boom through the crash and into post-affluence. The setting is the Gold Coast of Connecticut. The anti-hero Jonathan Miller II aka The Fat Guy From Greenwich wins by ignoring rules. The others lose by hoping that following the rules will pay off. It doesn't. Neither does hope, which is depicted as a dangerous drug. Author Jane Genova aka The Jersey City Kid has been widely published. That includes opinion-editorials in THE WALL STREET JOURNAL and THE NEW YORK TIMES. Short Short Fiction such as The Last Cannoli. And four nonfiction books Saving Souls on Park Avenue, K Street and Greenwich, Connecticut, Geezer Guts: Making a buck at any age, Our Emotional

10:04 Ben Lerner, 2015-09-15 Ben Lerner is a brilliant novelist, and one unafraid to make of the novel something truly new. **10:04** is a work of endless wit, pleasure, relevance, and vitality. --Rachel Kushner, author of *The Flamethrowers* Leaving the Atocha Station was hailed as one of the truest (and funniest) novels...of his generation (Lorin Stein, *New York Review of Books*), a work so luminously original in style and form as to seem like a premonition, a comet from the future (Geoff Dyer, *The Observer*). Now Lerner's second novel departs from Atocha's exquisite ironies in order to explore new territories of thought and feeling. In the last year, the narrator of **10:04** has enjoyed unexpected literary success, has been diagnosed with a potentially fatal heart condition, and has been asked by his best friend to help her conceive a child, despite his dating a rising star in the visual arts. In a New York of increasingly frequent super storms and political unrest, he must reckon with his biological mortality, the possibility of a literary afterlife, and the prospect of (unconventional) fatherhood in a city that might soon be under water. In prose that Jonathan Franzen has called hilarious...cracklingly intelligent...and original in every sentence, Lerner captures what it's like to be alive now, when the difficulty of imagining a future has changed our relation to both our present and our past. Exploring sex, friendship, medicine, memory, art, and politics, **10:04** is both a riveting work of fiction and a brilliant examination of the role fiction plays in our lives.
