Companies that Mimic Life Joseph H. Bragdon, 2017-09-08 Industrial capitalism is broken. The signs, which transcend national ideologies, are everywhere: climate change; ecological overshoot; financial exhaustion; fraying social safety nets; corporate fraud; government deceit; civic unrest; terrorism; and war. But there is hope. This book tells how transformation is taking root in the corporate world – the last place many of us would look for solutions. The book tells the stories of seven exceptional companies. Their shared secret is a new mental model of the firm that is the virtual opposite of industrial capitalism. Each company, if not already a household name, is a significant player within their industry and, crucially, has outperformed their competitors. Lessons can be learned. It works like this. Instead of modeling themselves on the assumed efficiency of machines – a thought process that emerged during the industrial age – these firms model themselves on living systems. Firms with open, ethical, inclusive traditions – where employees have a voice and a stake in what happens – have a distinct advantage over traditionally managed companies where most decisions are made at the top. Understanding that everything of value ultimately arises from life, they place a higher value on living assets (people and Nature) than they do on non-living capital assets. The energy they invest in stewarding those assets – a practice described in the book as living asset stewardship (LAS) – is transformative.

The Integrated Reporting Movement Robert G. Eccles, Michael P. Krzus, 2014-11-17 An in-depth, enlightening look at the integrated reporting movement The Integrated Reporting Movement explores the meaning of the concept, explains the forces that provide momentum to the associated movement, and examines the motives of the actors involved. The book posits integrated reporting as a key mechanism by which companies can ensure their own long-term sustainability by contributing to a sustainable society. Although integrated reporting has seen substantial development due to the support of companies, investors, and the initiatives of a number of NGOs, widespread regulatory intervention has yet to materialize. Outside of South Africa, adoption remains voluntary, accomplished via social movement abetted, to varying degrees, by market forces. In considering integrated reporting's current state of play, the authors provide guidance to ensure wider adoption of the practice and success of the movement, starting with how companies can improve their own reporting processes. But the support of investors, regulators, and NGOs is also important. All will benefit, as will society as a whole. Readers will learn how integrated reporting has evolved over the years, where frameworks and standards are today, and the practices that help ensure effective implementation—including, but not limited to an

extensive discussion of information technology's role in reporting and the importance of corporate reporting websites. The authors introduce the concepts of an annual board of directors' "Statement of Significant Audiences and Materiality" and a "Sustainable Value Matrix" tool that translates the statement into management decisions. The book argues that the appropriate combination of market and regulatory forces to speed adoption will vary by country, concluding with four specific recommendations about what must be done to accelerate high quality adoption of integrated reporting around the world.

Sustainability and Law Volker Mauerhofer, Daniela Rupó, Lara Tarquinio, 2020-07-07 The book discusses sustainability and law in a multifaceted way. Together, sustainability and law are an emerging challenge for research and science. This volume contributes through an interdisciplinary concept to its further exploration. The contributions explore this exciting domain with innovative ideas and replicable approaches. It combines a variety of authors, from both the public and the private sectors, and thereby guarantees a broad view that enshrines the more theoretical arguments from the academic side as well as stronger practical applicable perspectives. The book provides space for thoughtful expansions of established theories as well as the hopeful emergence of innovative ideas. Moreover, the combination of three to five contributions into the eleven parts respectively aims toward a compression of like minded thoughts. This should lead to an intensification of exchange of viewpoints from different angles on a similar theme. Readers therefore also have the opportunity to concentrate on single chapters, but receive comprised knowledge and a variety of thoughts for new ideas on a particular theme.

Accounting for Sustainability Anthony Hopwood, Jeffrey Unerman, 2010-09-23 If businesses and other organizations are to meet the many and complex challenges of sustainable development, then they all, both public and private, need to embed sustainability considerations into their decision-making and reporting. However, the translation of this aspiration into effective action is often inhibited by the lack of systems and procedures that take sustainability into account. *Accounting for Sustainability: Practical Insights* will help organizations to address these issues. The book sets out a number of tools and approaches that have been developed and applied by leading organizations to:

- embed sustainability into decision-making, extending beyond an organization's boundaries to take into account suppliers, customers and other stakeholders;
- measure and link sustainability and financial performance;
- integrate sustainability into 'mainstream' reporting, both to management and external stakeholders.

In-depth cases studies from Aviva, BT, the Environment Agency, EDF Energy, HSBC,

Novo Nordisk, Sainsbury's and West Sussex County Council show in detail how accounting for sustainability works in practice in a wide range of organizational contexts. Published with The Prince's Charities: Accounting for Sustainability

Prescribing costs in primary care Great Britain: National Audit Office,2007-05-18 The National Health Service spends £8 billion a year on prescription drugs in primary care in England. This has grown 60% in real terms over the last decade and the trend continues to be upward. This report examines how the money could be spent more efficiently, without compromising clinical outcomes. It looks principally at the scope for more cost-effective prescribing; supporting the GPs and PCTs in getting better value for money; and the wastage of drugs. For four groups of drugs (which account for 19% of the total drugs bill), it finds a wide disparity in prescribing behaviour. It estimates that if all PCTs attained the standard of the best 25%, £200 million could be saved. The analysis shows that there are several mechanism to improve value for money. They include: personalised communication with GPs from local experts, financial and practical incentives, and involving the whole primary and local care community in decisions about drug policy. Wastage of drugs is a problem but the level is not monitored and the uptake of initiatives to reduce the amount of waste is low. Assessing whether local prescribing volumes are consistent with clinical need is complex, but combining prescription data with local prevalence data can provide benchmark information.

Putting Purpose Into Practice Colin Mayer,Bruno Roche,2021-03-02 In the face of constant change, the nature of business must evolve rapidly if it is to remain relevant to society at large. How

then should business change to meet the requirements of the 21st century, in which unbridled globalization and technological advancements are having profound affects on the wellbeing and prosperity of both the people and the planet? The achievement of purpose is the key to successful transformation - not just having a purpose, but making that purpose real at every level of the organization. This is the first book to provide a precise description of how companies can put purpose into practice. Based on a groundbreaking research project undertaken jointly between the Saïd Business School at the University of Oxford and Mars Catalyst, the think tank of Mars Inc., it provides a highly accessible account of how companies should determine and implement their corporate purposes. It outlines why corporate purpose is so important and how it can both address the major challenges the world faces today and deliver enhanced performance for business. Fourteen detailed case studies illustrate how companies of different sizes, sectors, and geographies have put purpose into practice and their experiences of doing so. These cases give deep insights into the way in which companies can build purposeful businesses, map and shape their ecosystems, identify failures and problems, align management, and create partnerships to deliver their purposes against which they can measure their performance. The achievement of purpose is a very real issue that every responsible leader in business, finance, and business academia must now face. This book will equip executives, managers, investors, and policymakers with the tools that they require to understand how the notion of corporate purpose should become a corporate reality.

Firms of Endearment Rajendra Sisodia, David Wolfe, Jagdish N. Sheth, 2003-01-30 Today's best companies get it. From Costco® to Commerce Bank, Wegmans to Whole Foods®: they're becoming the ultimate value creators. They're generating every form of value that matters: emotional, experiential, social, and financial. And they're doing it for all their stakeholders. Not because it's "politically correct": because it's the only path to long-term competitive advantage. These are the Firms of Endearment. Companies people love doing business with. Love partnering with. Love working for. Love investing in. Companies for whom "loyalty" isn't just real: it's palpable, and driving unbeatable advantages in everything from marketing to recruitment. You need to become one of those companies. This book will show you how. You'll find specific, practical guidance on transforming every relationship you have: with customers, associates, partners, investors, and society. If you want to be great—truly great—this is your blueprint. We're entering an Age of Transcendence, as people increasingly search for higher meaning in their lives, not just more possessions. This is transforming the marketplace, the workplace, the very soul of capitalism. Increasingly, today's most successful

companies are bringing love, joy, authenticity, empathy, and soulfulness into their businesses: they are delivering emotional, experiential, and social value—not just profits. Firms of Endearment illuminates this, the most fundamental transformation in capitalism since Adam Smith. It's not about "corporate social responsibility": it's about building companies that can sustain success in a radically new era. It's about great companies like IDEO and IKEA®, Commerce Bank and Costco®, Wegmans and Whole Foods®: how they earn the powerful loyalty and affection that enables truly breathtaking performance. This book is about gaining "share of heart," not just share of wallet. It's about aligning stakeholders' interests, not just juggling them. It's about building companies that leave the world a better place. Most of all, it's about why you must do all this, or risk being left in the dust... and how to get there from wherever you are now.

Corporation 2020 Pavan Sukhdev, 2012-10-01 Business as usual' isn't working. There is an emerging consensus that all is not well with today's market-centric economic model. Although it has delivered wealth over the last half-century and pulled millions out of poverty, it is recession-prone, leaves too many people unemployed, creates ecological scarcities and environmental risks, and widens the gap between the rich and the poor. In Corporation 2020, Pavan Sukhdev lays out a sweeping new vision for tomorrow's corporation: one that will increase human well being and social equity, decrease environmental risks and ecological losses, and still generate profit. Sukhdev illustrates his vision with examples ranging from Infosys's creation of human capital to Citibank's having to change its project finance policy due to rainforest destruction. From its insightful look into the history of the corporation to the thoughtful discussion of the steps needed to craft a better corporate model, Corporation 2020 offers a hopeful vision for the role of business in shaping a more equitable, sustainable future.

The MultiCapital Scorecard Martin P. Thomas, Mark W. McElroy, 2016 For decades now, organizations have been struggling to find the best way to address their social and environmental responsibilities alongside their economic obligations. In other words, they want to know how best to effectively manage their operations based on a triple bottom line (3BL)—one that reflects social, environmental, and economic performance. Recently, an international standard for integrated reporting has emerged that in principle emphasizes the importance of managing toward a triple bottom line. But it fails to provide specific guidance on how to do so. Organizations have been left to their own devices to respond. How should 3BL management actually be done? In this book, sustainability and performance experts Martin Thomas and Mark McElroy introduce the world's most advanced 3BL

performance accounting methodology: The MultiCapital Scorecard. It is the first context-based integrated measurement, management, and reporting system. And, it can help corporations, public institutions, and other organizations answer the question they should be asking themselves for every aspect of their operations: How much is enough for us to be sustainable? The answers set internal performance standards against which operations and their impacts can be measured. Nothing less will do! The MultiCapital Scorecard describes this open-source methodology, which consists of a structured, quantitative measurement and reporting system that complies with international standards for 3BL integrated measurement and reporting. Moreover, the MultiCapital Scorecard is designed to help organizations assess their own 3BL performance in their own contexts with context-based metrics of their own choosing. An eminently practical management aid for integrated thinking, it can be tailored to any organization's needs. The authors also describe how and why businesses are gradually shifting from managing impacts on only one type of capital (economic) to managing impacts on multiple types. They also provide detailed examples of worked reports, showing how organizations might develop and quantify the interim and long-term goals to meet their obligations to their employees, community, shareholders, and the environment. The examples also show how an organization can use the Multicapital Scorecard methodology to assess their progress in meeting those goals, and convey that progress to their stakeholders.

Laboratory Techniques in Thrombosis – a Manual J. Jespersen, R.M. Bertina, F.

Haverkate, 2013-12-01 The first edition of this manual appeared in 1992 and was entitled ECAT Assay Procedures. It was the result of a unique cooperation between experts brought together by the European Concerted Action on Thrombosis and Disabilities (ECAT). The Concerted Action was at that time under the auspices of the Commission of the European Union. The second edition, like the first edition, deals with diagnostic tests within the field of thrombosis. However, the second edition has a broader scope because it is no longer limited by the frontiers of ECAT. Experts all over the world, in and outside ECAT, have contributed to this edition. The editors are very grateful for their contributions. The need for a new edition is obvious. Since 1992 new assays have been introduced for research, diagnosis, and therapy of thrombosis; for other assays improvements have been suggested, while a few others became redundant. The editors waived the radioimmunoassays of ~-thromboglobulin and platelet factor 4 due to the fact that the kits required for these assays are rarely, or no longer, available. Also the PAI-1 activity assay was waived as it is liable to many inconsistencies and to large variations. A list of names and addresses of manufacturers marketing the kits and reagents has been

compiled, together with a list of the recommended nomenclature of quantities in thrombosis and haemostasis, in order to facilitate the use of the updated version. These lists have been carefully compiled by Johannes J. Sidelmann, PhD, Department of Clinical Biochemistry in Esbjerg, Denmark.

Cannibals with Forks John Elkington, 1999 Based on first-hand experience with companies such as Volvo, BP, Proctor and Gamble, ICI and Fuji Xerox, Elkington defines the triple bottom line of 21st century business as profit, environmental sustainability and social responsibility.

Corporate Social Responsibility and International Development Michael Hopkins, 2012-05-04 Presenting ideas for how business can lead the way in deriving the good from globalisation, this book makes the case that governments and their international agencies, grouped under the umbrella of the United Nations, have failed in their attempts to rid the planet of underdevelopment and poverty.

Corporate Social Responsibility Across Europe André Habisch, Jan Jonker, Martina Wegner, René Schmidpeter, 2005-12-05 Corporate Social Responsibility (CSR) has become an increasingly important topic in our global society. *Corporate Social Responsibility Across Europe* is the first volume of its kind to bring together twenty-three national perspectives on this issue. Thirty-seven European researchers worked on the book, which provides a comprehensive and structured survey of CSR developments and progress at national levels. An overview and analysis is provided for each country. Topics addressed include business and societal mindsets in the different cultural settings, national drivers for the current development of CSR, and prospects for the individual countries in the future. Furthermore it contains three comprehensive pan-European analyses. The chapters also contain practical information and references to the Internet as well as relevant literature in order to support further research and stimulate business activities in this field. The result is a rather unique collection of essays on the topic of CSR across Europe.

Taking Stock of Industrial Ecology Roland Clift, Angela Druckman, 2015-12-11 How can we design more sustainable industrial and urban systems that reduce environmental impacts while supporting a high quality of life for everyone? What progress has been made towards reducing resource use and waste, and what are the prospects for more resilient, material-efficient economies? What are the environmental and social impacts of global supply chains and how can they be measured and improved? Such questions are at the heart of the emerging discipline of industrial ecology, covered in *Taking Stock of Industrial Ecology*. Leading authors, researchers and practitioners review how far industrial ecology has developed and current issues and concerns, with illustrations of what the industrial ecology paradigm has achieved in public policy, corporate strategy and industrial practice. It

provides an introduction for students coming to industrial ecology and for professionals who wish to understand what industrial ecology can offer, a reference for researchers and practitioners and a source of case studies for teachers.

Attestation Engagements on Sustainability Information (Including Greenhouse Gas Emissions Information) AICPA, 2017-09-25 New Authoritative Guide for SSAE No. 18 and Sustainability Organizations are increasingly seeking to add credibility to sustainability information: According to the CFA Institute, 73 percent of portfolio managers and research analysts surveyed take sustainability matters into account when making investment decisions and 69 percent believe it is important that such information be subject to independent assurance. This new guide will assist CPAs with interpreting and applying the clarified attestation standards (SSAE No. 18) when performing examination or review engagements on sustainability information. Note: This guide supersedes AICPA Statement of Position (SOP) 13-1, Attest Engagements on Greenhouse Gas Emissions Information. The content of that SOP has been updated for the clarified attestations standards and included in the guide.
