The Chicago Homer Ahuvia Kahane,Martin Mueller,Craig Berryman,Bill Parod,2000-09-01 Richimond Lattimore's elegant and exceptionally faithful line-by-line translations of the Iliad and the Odyssey introduced these classics to a new audience of English readers. Now The Chicago Homer presents an easily searchable, web-accessible database of Homer in the original and in Lattimore's translations. The Greek texts of the Homeric Hymns and the poems of Hesiod are also included, along with English translations by Daryl Hine, providing students and scholars with unparalleled access to the whole of Early Greek epic. In addition to providing Greek and English texts in an interlinear display, The Chicago Homer gives complete information (tense, mood, voice, case, gender, and number) on the morphology of each Greek word. Invaluable for students learning Greek, this information is also important to researchers investigating the frequency or distribution of grammatical phenomena; only The Chicago Homer provides these data in readily searchable electronic form. But the most distinctive feature of The Chicago Homer is its ability to analyze and display the wealth of repeated phrases -- such as rosy-fingered dawn and swift-footed Achilles -- that are considered to be the hallmark of Homeric poetry. For the first time in any medium, The Chicago Homer presents a complete index of all repeated phrases in Early Greek epic. These phrases may be sorted by a number of criteria, including length, frequency, who spoke them, and the words they contain. Most impor

Shadow Libraries Joe Karaganis,2018-05-04 How students get the materials they need as opportunities for higher education expand but funding shrinks. From the top down, Shadow Libraries explores the institutions that shape the provision of educational materials, from the formal sector of universities and publishers to the broadly informal ones organized by faculty, copy shops, student unions, and students themselves. It looks at the history of policy battles over access to education in the post-World War II era and at the narrower versions that have played out in relation to research and textbooks, from library policies to book subsidies to, more recently, the several “open” publication models that have emerged in the higher education sector. From the bottom up, Shadow Libraries explores how, simply, students get the materials they need. It maps the ubiquitous practice of photocopying and what are—in many cases—the more marginal ones of buying books, visiting libraries, and downloading from unauthorized sources. It looks at the informal networks that emerge in many contexts to share materials, from face-to-face student networks to Facebook groups, and at the processes that lead to the consolidation of some of those efforts into more organized archives that circulate offline and sometimes online— the shadow libraries of the title. If Alexandra Elbakyan's Sci-Hub is the largest of these efforts to date, the more characteristic part of her story is the prologue: the personal struggle to participate in global scientific and educational communities, and the recourse to a wide array of ad hoc strategies and networks when formal, authorized means are lacking. If Elbakyan's story has struck a chord, it is in part because it brings this contradiction in the academic project into sharp relief—universalist in principle and unequal in practice. Shadow Libraries is a study of that tension in the digital era.
