Four Battlegrounds: Power in the Age of Artificial Intelligence Paul Scharre,2023-02-28 An NPR 2023 Books We Love Pick One of the Next Big Idea Club's Must-Read Books An invaluable primer to arguably the most important driver of change for our future. —P. W. Singer, author of Burn-In An award-winning defense expert tells the story of today's great power rivalry—the struggle to control artificial intelligence. A new industrial revolution has begun. Like mechanization or electricity before it, artificial intelligence will touch every aspect of our lives—and cause profound disruptions in the balance of global power, especially among the AI superpowers: China, the United States, and Europe. Autonomous weapons expert Paul Scharre takes readers inside the fierce competition to develop and implement this game-changing technology and dominate the future. Four Battlegrounds argues that four key elements define this struggle: data, computing power, talent, and institutions. Data is a vital resource like coal or oil, but it must be collected and refined. Advanced computer chips are the essence of computing power—control over chip supply chains grants leverage over rivals. Talent is about people: which country attracts the best researchers and most advanced technology companies? The fourth “battlefield” is maybe the most critical: the ultimate global leader in AI will have institutions that effectively incorporate AI into their economy, society, and especially their military. Scharre's account surges with futuristic technology. He explores the ways AI systems are already discovering new strategies via millions of war-game simulations, developing combat tactics better than any human, tracking billions of people using biometrics, and subtly controlling information with secret algorithms. He visits China's “National Team” of leading AI companies to show the chilling synergy between China's government, private sector, and surveillance state. He interviews Pentagon leadership and tours U.S. Defense Department offices in Silicon Valley, revealing deep tensions between the military and tech giants who control data, chips, and talent. Yet he concludes that those tensions, inherent to our democratic system, create resilience and resistance to autocracy in the face of overwhelmingly powerful technology. Engaging and direct, Four Battlegrounds offers a vivid picture of how AI is transforming warfare, global security, and the future of human freedom—and what it will take for democracies to remain at the forefront of the world order.

The Rise of Extreme Porn Alexandros K. Antoniou,Dimitris Akrivos,2017-02-13 This book analyses the criminalisation of the possession of extreme pornography through ss 63-68 of the Criminal Justice and Immigration Act 2008. It documents the legislative history of the offence and offers a criminological perspective on the role of the media in the construction of the extreme pornography problem. It evaluates the elements of the s 63 offence and critically reflects upon their weaknesses. Moreover, the book presents an up-to-date account of the number of prosecutions initiated and convictions obtained under s 63 since it came into force, alongside an exploration into the corresponding sentencing trends. The first study of its kind in England and Wales since the controversial legal provisions at issue came into effect in 2009, this book contributes new evidence to the application of the extreme pornography provisions and will play an important role in shaping debates on the prosecution of similar offences in the coming years. This book will serve as an invaluable resource to all those with an interest in law, criminology, sociology of deviance, sexuality and pornography studies.

Manifestos for the Future of Critical Disability Studies Katie Ellis,Rosemarie Garland-Thomson,Mike Kent,Rachel Robertson,2018-10-03 This collection identifies the key tensions and conflicts being debated within the field of critical disability studies and provides both an outline of the field in its current form and offers manifestos for its future direction. Traversing a number of disciplines from science and technology studies to maternal studies, the collection offers a transdisciplinary vision for the future of critical disability studies. Some common thematic concerns emerge across the book such as digital futures, the usefulness of anger, creativity, family as disability allies, intersectionality, ethics, eugenics, accessibility and interdisciplinarity. However, the contributors who write as either disabled people or allies do not proceed from a singular approach to disability, often reflecting different or even opposing positions on these issues. Containing contributions from established and new voices in disability studies outlining their own manifesto for the future of the field, this book will be of interest to all scholars and students working within the fields of disability studies, cultural studies, sociology, law, history and education. The concerns introduced here are further explored in its sister volume Interdisciplinary approaches to disability: looking towards the future.

Aspen Treatise for Evidence Christopher B. Mueller,Laird C. Kirkpatrick,Liesa Richter,2018-05-01 Evidence is the most complete reference on evidence law available, written at a level that makes it an accessible, indispensable resource for students. The text emphasizes contemporary judicial interpretations of the Federal Rules of Evidence, making the law relevant to students. Organization around the Federal Rules of Evidence makes the text particularly understandable, with common-law coverage given where an issue is not codified. Throughout the text, Evidence features straightforward explication of the rules, analysis of leading case law, and thorough coverage of both the Federal Rules and state evidence codes. Pedagogical features include helpful marginal headings, mini-summaries of contents at the beginning of each chapter, generous footnotes, and useful case citations. The authors strong reputations as casebook authors and authors of Aspen's practitioner Evidence treatise continue to attract users to this book.

Evaluation and Decision Models with Multiple Criteria Raymond Bisdorff,Luis C. Dias,Patrick Meyer,Vincent Mousseau,Marc Pirlot,2015-06-09 This book showcases a large variety of multiple

criteria decision applications (MCDAs), presenting them in a coherent framework provided by the methodology chapters and the comments accompanying each case study. The chapters describing MCDAs invite the reader to experiment with MCDA methods and perhaps develop new variants using data from these case studies or other cases they encounter, equipping them with a broader perception of real-world problems and how to overcome them with the help of MCDAs.

The Gothic Cathedral Otto Georg von Simson,2020-06-16 The classic work on Gothic religious architecture, now with added illustrations and a new section by the author on rose windows No other monument of a culture so radically different from our own is as much a part of contemporary life as the Gothic cathedral. In this illuminating book, esteemed art historian Otto Georg von Simson explores how Gothic architecture is an expression of supernatural reality, and shows how, to those who designed and worshipped in the great cathedrals of France in the twelfth and thirteenth centuries, this symbolic function of sacred architecture overshadowed all others. The Gothic Cathedral takes readers from the birth of the Gothic style with the Basilica of St.-Denis to the consummation of the form in the majestic Cathedral of Chartres, revealing how these incomparable architectural masterpieces embodied the spiritual and intellectual order of the medieval world.

Crossing Over the Line David J. Langum,2006 Crossing over the Line describes the folly of the Mann Act of 1910—a United States law which made travel from one state to another by a man and a woman with the intent of committing an immoral act a major crime. Spawned by a national wave of white slave trade hysteria, the Act was created by the Congress of the United States as a weapon against forced prostitution. This book is the first history of the Mann Act's often bizarre career, from its passage to the amendment that finally laid it low. In David J. Langum's hands, the story of the Act becomes an entertaining cautionary tale about the folly of legislating private morality. Langum recounts the colorful details of numerous court cases to show how enforcement of the Act mirrored changes in America's social attitudes. Federal prosecutors became masters in the selective use of the Act: against political opponents of the government, like Charlie Chaplin; against individuals who eluded other criminal charges, like the Capone mobster Machine Gun Jack McGurn; and against black men, like singer Chuck Berry and boxer Jack Johnson, who dared to consort with white women. The Act engendered a thriving blackmail industry and was used by women like Frank Lloyd Wright's wife to extort favorable divorce settlements. Crossing over the Line is a work of scholarship as wrought by a civil libertarian, and the text . . . sizzles with the passion of an ardent believer in real liberty under reasonable laws.—Jonathan Kirsch, Los Angeles Times

Communication in Kink Jessica M Kratzer,2020-01-31 This edited collection focuses on varying communication perspectives in the Fifty Shades of Grey series. In particular, the chapters focus on kinky people's perceptions of the series; consent, ownership, feminist desire in 24/7 BDSM; erotic romance writing in the post Fifty Shades of Grey landscape; sexual education; news coverage of the series; the rhetoric used in the series; and depictions of consent. The contributors address how a series as dominant in popular culture as Fifty Shades of Grey can affect people involved in a community, those on the outside, and those waiting for an opportunity to explore. Scholars of popular culture, communication, media studies, literary studies, and sociology will find this book particularly useful.
