Samuel B.H. Faure, Christian Lequesne

The Oxford Handbook of Prehistoric Oceania Ethan E. Cochrane, Terry L. Hunt, 2018 The Oxford Handbook of Prehistoric Oceania presents the archaeology, linguistics, environment and human biology of Melanesia, Micronesia, and Polynesia. First colonized 50,000 years ago, Oceania witnessed the independent invention of agriculture, the construction of Easter Island's statues, and the development of the world's last archaic states.--Provided by publisher.

Employing People with Disabilities Ewa Giermanowska, Mariola Raclaw, Dorota Szawarska, 2019-09-05 Developing better employment and management practices for a diverse workplace is quickly becoming a major concern amongst most modern organisations; however, a lack of research into good practices has a limiting effect. Dealing specifically with disabilities, this pioneering work is based on international research spanning several European countries to demonstrate best practice. Aiming to fill a gap in knowledge, the authors offer interdisciplinary insights into managing diversity in the workplace, taking into account various social and cultural contexts. Providing analysis and recommendations for adapting organisational practices to different workplace settings, this Palgrave Pivot is a vital read for scholars of HRM and diversity management, as well as policy-makers and practitioners.

Improving Healthcare Quality in Europe Characteristics, Effectiveness and

Implementation of Different Strategies OECD, World Health Organization, 2019-10-17 This volume, developed by the Observatory together with OECD, provides an overall conceptual framework for understanding and applying strategies aimed at improving quality of care. Crucially, it summarizes available evidence on different quality strategies and provides recommendations for their implementation. This book is intended to help policy-makers to understand concepts of quality and to support them to evaluate single strategies and combinations of strategies.

The New World of Work Vaughan-Whitehead, Daniel, Ghellab, Youcef, de Bustillo Llorente, Rafael M., 2021-12-16 Actors in the world of work are facing an increasing number of challenges, including automatization and digitalization, new types of jobs and more diverse forms of employment. This timely book examines employer and worker responses, challenges and opportunities for social dialogue, and the role of social partners in the governance of the world of work.

OECD Skills Studies OECD Skills Strategy Flanders Assessment and Recommendations OECD, 2019-01-21 Migration has been at the centre of political debate across the OECD in recent years. Drawing on data from the OECD Survey of Adult Skills (PIAAC), this report provides new evidence on differences in migrants' characteristics and contexts and considers how these relate to the skills migrants ...

Energy Transformation towards Sustainability Manuela Tvaronaciene, Beata

Slusarczyk,2019-10-21 Energy Transformation towards Sustainability explores how researchers, businesses and policymakers can explore and usefully improve energy systems and energy consumption behavior, both to reflect the reality of climate change and related environmental degradation and to adapt to the expanding periphery of renewable energy technologies. It introduces the reader to a suite of potential policy pathways to the necessary transformation in societal energy consumption, usage and behavior. Solutions discussed include energy efficiency, energy security, the role of political leadership, green public policy, and the transition to renewable energy sources. International contributions address the range and depth of current research from a position of advocacy for 'energy stewardship' as the driver of this transformation. Case studies illustrate the range of various countries to diminish energy use. Finally, policy avenues are covered in depth. Reviews the interrelationship between economic growth, energy consumption and climate change Uses a wide variety of case studies to support practical implementation across national energy systems Highlights a wide spectrum of urgent issues, including threats related to energy use and secure and sustainable development Contains contributions that reflect a breadth and depth of scholarship from international backgrounds

Still Second Order or Critical Contests? The 2014 European Parliament Elections in Southern Europe Hermann Schmitt,Eftichia Teperoglou,2018-02-02 Southern Europe has been the EU region most exposed to the Eurozone sovereign debt crisis with consequences for national party systems and political stability. The 2014 European Parliament elections took place at a crucial time for Europe and Southern European societies more generally. This book analyses the Euroelections in Southern Europe, asking whether these followed the usual pattern of low-stimulus contests or whether the crisis context raised the bar. Country chapters on Italy, Greece, Spain, Portugal, Cyprus

and Malta investigate the background of the elections, the electoral campaign and the rise of Euroscepticism. The linkage between governments' economic performance, the Europhile or Eurosceptic stances of political parties, and their electoral performance are at the core of the analysis in each chapter. The findings reveal that the political and electoral consequences of the economic crisis have not fundamentally challenged the second-order character of the 2014 European Parliament elections in Southern Europe. However, electoral behaviour exhibits some indications of a more critical contest in which the EU divide becomes more significant and polarising in determining voting choices. This book was previously published as a special issue of South European Society and Politics.

The Oxford Handbook of the European Union Erik Jones, Anand Menon, 2012-08-30 This is an authoritative, one-volume, and independent treatment of the history, functioning and nature of the European integration. Written by a selection of leading scholars. It covers the major institutions, policies, and events in the history of integration, whilst also providing a guide to the major theoretical approaches that have been used to study it over time. By bringing together such a distinguished cast covering such a wide array of themes, the Handbook is intended as a one stop shop for all those interested in the European Union and its predecessors. Written in an accessible style, the volume is intended to shape the discipline of EU studies, and to establish itself as the essential point of reference for all those interested in European integration, both in universities and more broadly. It represents a timely guide to an institution that is much discussed but often only imperfectly understood.

Global Innovation Index 2020 Cornell University, INSEAD, World Intellectual Property Organization, 2020-08-13 The Global Innovation Index 2020 provides detailed metrics about the

innovation performance of 131 countries and economies around the world. Its 80 indicators explore a broad vision of innovation, including political environment, education, infrastructure and business sophistication. The 2020 edition sheds light on the state of innovation financing by investigating the evolution of financing mechanisms for entrepreneurs and other innovators, and by pointing to progress and remaining challenges – including in the context of the economic slowdown induced by the coronavirus disease (COVID-19) crisis.

Microplastics in Water and Wastewater Hrisi K. Karapanagioti, Ioannis K. Kalavrouzotis, 2019-09-15 This book covers the topic of microplastics in water and wastewater. The chapters start with introductory issues related to the growing interest in the scientific community on microplastics and the human water cycle and point out where the microplastics could interact with water. The subsequent chapters examine evidence of the microplastic presence in freshwater, such as in both rivers and lakes, in freshwater biota, and hazardous chemicals associated with microplastics in such systems. Another set of chapters discuss the presence of microplastics in wastewater: their sources; their transfer through a wastewater treatment plant; the concentration of microplastics in effluents throughout the world; the plastic biomedica used in wastewater treatment plants and the effect on the surrounding environment of effluent wastewater pipes. These chapters also discuss the sampling methods, the sample treatment and analysis techniques used so far for microplastics in wastewater. Additionally, the presence of microplastics in sewage sludge and in soils irrigated with wastewater or fertilized with sludge are discussed. The possible impact of plastics and their additives on plants, microalgae, and humans are reviewed and presented in a critical way. Finally, a chapter summarizes all the relevant regulations and initiatives that point to the necessity of a global directive for the protection of the environment from plastic and microplastic

pollution. The topic of microplastics in freshwater systems and in wastewater has scarcely been studied and requires more attention. *Microplastics in Water and Wastewater* aims to bring these initial findings to the attention of a broader audience and especially to operators and managers of freshwater and wastewater systems. It will also be helpful to people already aware of the marine debris problem to understand the sources of microplastics in the oceans, from freshwater systems and wastewater treatment plants.

The Elgar Companion to the European Union Samuel B.H. Demography of Population Health, Aging and Health Expenditures Christos H. Skiadas, Charilaos Skiadas, 2020-08-24 This book provides theoretical and applied material for estimating vital parts of demography and health issues including the healthy aging process along with calculating the healthy life years lost to disability. It further includes the appropriate methodology for the optimum health expenditure allocation. Through providing data analysis, statistical and stochastic methodology, probability approach and important applications, the book explores topics such as aging and mortality, birth-death processes, self-perceived age, life-time and survival as well as pension and labor-force. By providing a methodological approach to health problems in demography and society including and quantifying important parameters, this book is a valuable guide for researchers, theoreticians and practitioners from various disciplines.

The Rich and the Poor in Modern Europe, 1890-2020 Hartmut Kaelble, 2023-04-14 As social inequality grows, historical analysis on wealth and income distribution across the 20th century often

does not take into account inequality of education, health, housing and chances of social mobility, nor does it differentiate statistical inequality from the realities of peoples' actual experience. With this broad understanding in mind, in a long look back on the history of social inequality in Europe, *The Rich and the Poor in Modern Europe* addresses these neglected subjects. It also tackles the commonplace notion that modern capitalism inevitably produces wealth gaps and asks whether the facts and figures we possess also lead to alternate interpretations of examples of mitigated inequality. Covering the 20th century and the beginnings of the 21st century in Europe through wars, and economic crises, through periods of unprecedented economic prosperity and staggering economies, both exacerbating and dampening the problem, acclaimed historian Hartmut Kaelble offers a rigorous response to understanding our present-day challenge of social inequality.

Migrant Resistance in Contemporary Europe Maurice Stierl, 2018-10-31 Over the past few years, increased 'unauthorised' migrations into the territories of Europe have resulted in one of the most severe crises in the history of the European Union. Stierl explores migration and border struggles in contemporary Europe and the ways in which they animate, problematise, and transform the region and its political formation. This volume follows public protests of migrant activists, less visible attempts of those on the move to 'irregularly' subvert borders, as well as new solidarities and communities that emerge in interwoven struggles for the freedom of movement. Stierl offers a conceptualisation of migrant resistances as forces of animation through which European forms of

border governance can be productively explored. As catalysts that set socio-political processes into frictional motion, they are developed as modes of critical investigation, indeed, as method. By ethnographically following and being implicated in different migration struggles that contest the ways in which Europe decides over and enacts who does, and does not, belong, the author probes what they reveal about the condition of Europe in the contemporary moment. This work will be of great interest to students and scholars of Migration, Border, Security and Citizenship Studies, as well as the Political Sciences more generally.
