*Global and Multinational Advertising* Basil G. Englis,2013-11-19 Few applied disciplines are more sensitive to cross-cultural issues than marketing and consumer psychology. The chapters prepared for this volume reflect awareness of both similarities and differences within and across cultures. They include analyses of methodological issues, theoretical investigations of cultural and social values and their implications for marketing specialists, studies of gender- and sub-culture specific advertising, and investigations of advertising efforts in several different international markets. The scholars and advertising professionals who contributed these chapters will have much to say to consumer psychologists and marketing specialists alike.

**The Recall, Second Edition** Joseph F. Zimmerman, 2013-12-12 The recall, or election in reverse, is meant to allow voters to remove an elected official from office prior to the completion of his/her term in office. In this revised second edition of *The Recall*, Joseph F. Zimmerman examines the rise of the recall in the United States and its use by American voters. Proponents of the recall believe the threat of removal from office would ensure that elected officials would act in accord with the public's will, while opponents fear their use would disrupt and inhibit public officers in the performance of their duties. Zimmerman provides a detailed analysis of how the recall has functioned in practice and discovers that the recall has seldom been employed against elected state officials. Although used more often against local government officials, the rate is still not exceptionally high when one considers the extremely large number of elected officials. After a century of use in the United States, the recall has not produced a new era of public official responsibility as hoped for by proponents, but neither has it caused extensive disruption of state and local governments, the original concern of early opponents.
